Additional Information

Indexed Valuation

The Reference Indexed Valuation means the valuation of the property increased or decreased as appropriate by the increase or decrease in the Reference Index since the date of that valuation.

The Reference Index is currently the CoreLogic House Price Index quarterly index. Therefore, the underlying property values used in relation to the covered bond pool of residential mortgages is updated to reflect current property market values at least quarterly. In the Asset Coverage Test and the Amortisation Test, the Indexed Valuation means where:

- The Reference Indexed Valuation is less than the valuation of the property, then the Reference Indexed Valuation is used;
- The Reference Indexed Valuation is greater than the valuation of the property, then only 85% of the increase is applied.
