Leading Index continues to signal recession

Despite another modest improvement this month, the index growth rate remains in deep negative territory consistent with recession.

Easing social restrictions have allowed for some lift in activity in June. This is best captured by the increase in contribution to the growth rate in June from US industrial production (added 1.1ppt) and hours worked (added 0.6ppt).

The lift in hours worked in June (ABS estimate showing a 4% rise) is particularly encouraging and means that the contraction in hours worked through the whole of the June quarter was ‘only’ 6.9% compared to the 20% contraction originally expected by the official sector.

That puts some upside risk to Westpac’s current forecast of a 7% contraction in the economy in the June quarter. However, the developments in July, including the renewed shutdown in Melbourne and the associated 6.1% fall in the Westpac-Melbourne Institute Index of Consumer Sentiment suggest that the profile of the recovery will not be smooth. Westpac is forecasting the economy to grow by 3.5% in the second half of 2020 but we have recently moved more of that recovery from the September quarter to the December quarter.

Needless to say, the first half of 2020 has seen a dramatic weakening with the Leading Index growth rate dropping nearly 4ppts between January and June – the three months to April marking the sharpest decline in the 60 year history of the measure. Looking over the full six months, two components account for the bulk of the slump: US industrial production (~2.2ppt) and aggregate monthly hours worked (~1.2ppt). Both recorded exceptionally large contractions as shutdowns impacted through April-May, posting gains in June as economies started to reopen but with activity still well down on pre-COVID levels (10.8% in the case of US industrial production and 6.9% for aggregate hours worked).

Other components have had a more mixed contribution over the first half. Equity markets have provided an additional 0.5ppt drag, with a further 0.4ppt drag from dwelling approvals which posted a particularly sharp 16.9% fall in the May month. However, this has been partially offset by more supportive reads on commodity prices (+0.3ppts) and the yield spread (+0.3ppt).

Sentiment-based components have also had a mixed impact over the first six months but, as noted, showed a sharp decline in early July as the return to lockdown conditions in Victoria impacted. The Westpac-Melbourne Institute Consumer Sentiment Expectations Index fell 10% in the month while the Westpac-Melbourne Institute Unemployment Expectations Index jumped 12.1%, indicating a significant worsening in the outlook for the labour market.

Overall, the component mix points to downside risks near term with the drivers behind the weak July readings on sentiment likely to impact on other, less timely, components that track real activity in coming months.

Yesterday the government released its extensions for the JobKeeper and JobSeeker packages. The JobKeeper extensions only run to March and JobSeeker to December.

The near-term extensions are broadly in line with the estimates underlying our forecast for a $240 billion budget deficit for 2020/21.

However, our forecast assumes additional stimulus of $15 billion to be announced in the Federal Budget in October and a further $15 billion to extend both JobKeeper and JobSeeker through to the end of the fiscal year. Consequently, if the government’s estimate of the budget deficit in tomorrow’s economic statement includes no more policy adjustments, we would expect an official forecast in the order of $210 billion, ($30 billion less than the $240 billion).

What is clearer after yesterday is the likely financial injection from government policies into the economy in the December quarter. We had expected around $15.6 billion but that now appears to be lower at $13.5 billion.

The challenge for the economy, given that the stimulus in the June quarter was an estimated $65 billion with a further $95 billion for the September quarter, is to adjust to such a sudden reduction in the size of government support.

Investment Recommendations Disclosure

The material may contain investment recommendations, including information recommending an investment strategy. Reasonable steps have been taken to ensure that the material is presented in a clear, accurate and objective manner. Investment Recommendations for Financial Instruments covered by MAR are made in compliance with Article 20 MAR. Westpac does not apply MAR Investment Recommendation requirements to Spot Foreign Exchange which is out of scope for MAR.

Unless otherwise indicated, there are no planned updates to this Investment Recommendation at the time of publication. Westpac has no obligation to update, modify or amend this Investment Recommendation or to notify the recipients of this Investment Recommendation should any information, including opinion, forecast or estimate set out in this Investment Recommendation change or subsequently become inaccurate.

Westpac will from time to time dispose of and acquire financial instruments of companies covered in this Investment Recommendation as principal and act as a market maker or liquidity provider in such financial instruments.

Westpac does not have any proprietary positions in equity shares of issuers that are the subject of an investment recommendation.

Westpac may have provided investment banking services to the issuer in the course of the past 12 months.

Westpac does not permit any issuer to see or comment on any investment recommendation prior to its completion and distribution.

Individuals who produce investment recommendations are not permitted to undertake any transactions in any financial instruments or derivatives in relation to the issuers covered by the investment recommendations they produce.

Westpac has implemented policies and procedures, which are designed to ensure conflicts of interests are managed consistently and appropriately, and to treat clients fairly.

The following arrangements have been adopted for the avoidance and prevention of conflicts in interests associated with the provision of investment recommendations.

i. Chinese Wall/Cell arrangements;
ii. physical separation of various Business/Support Units;
iii. strict and well defined wall/cell crossing procedures;
iv. a “need to know” policy;
v. documented and well defined procedures for dealing with conflicts of interest;
vi. reasonable steps by Compliance to ensure that the Chinese Wall/Cell arrangements remain effective and that such arrangements are adequately monitored.
