All references to \$ in this document are to Australian Dollars unless otherwise stated.

All references made to pro-forma results in this document relate to the six months ended 31 March 2009 (First Half 2009). Pro-forma results were prepared in 2009 and have remained unchanged since that time. These were prepared on the assumption that the St.George merger (the merger) was completed on 1 October 2008 with the exception of the impact of the allocation of purchase consideration, associated fair value adjustments and accounting policy alignments, which were only incorporated from and including 18 November 2008 being the accounting consolidation date. The pro-forma results are unaudited. They are provided for illustrative information purposes to facilitate comparisons of the six months ended 31 March 2010 (First Half 2010) with First Half 2009 and are not meant to be indicative of the results of operations that would have been achieved had the merger actually taken place at the date indicated. For additional information please refer to the 2009 Full Year Profit Announcement and Section 7.1.

1.0 Press Release and Outlook

5 May 2010

The Westpac Group posts good result and continues to invest for growth

Key financial highlights¹

- Statutory net profit of \$2,875 million, up 32%
- Cash Earnings of \$2,983 million, up 30%
- Core earnings of \$5,183 million, up 5%
- Cash Earnings per share of 100.8 cents, up 22%
- Fully franked interim dividend of 65 cents, up 16%
- Economic Profit of \$1,836 million

Interim Profit Result

The Westpac Group today announced Cash Earnings of \$2,983 million for the half year ended 31 March 2010, up 30%. Statutory net profit after tax increased 32% to \$2,875 million.

Cash Earnings per share of 100.8 cents for the half were 22% higher than for the prior corresponding period.

Westpac declared an interim dividend of 65 cents, fully franked, representing a payout ratio of 65%.

Westpac Chief Executive Officer, Gail Kelly, said: "I am pleased with our interim result for 2010. It reflects a much improved Australian economy and good momentum across all our businesses. We have also taken the opportunity to further strengthen our balance sheet. Overall, it is very clear that The Westpac Group is emerging from the global financial crisis in a stronger position and with a sustainable platform for growth.

"Over the past 12 months, in meeting customer needs, and as a direct result of our decision to remain open for business, we grew our Australian home lending balances by \$43 billion and our Australian market share in this strategically important segment by two percentage points to 27%. This step up in market share includes providing over 355,000 new mortgages.

"At the same time we grew our customer deposits by \$15 billion and our Australian market share from 23% to 24%, representing growth of 1.3 times system for the year. We also materially reduced bank fees, delivering significant benefits to Australia and New Zealand retail and business customers," Mrs Kelly said.

"Our Institutional Bank and Wealth businesses have been particularly strong over the half. These businesses had been significantly impacted by the global financial crisis, and their rapid rebound reflects their underlying quality, coupled with disciplined, experienced management.

"Another highlight of the half has been the continuing success of the St.George merger. St.George has grown its customer numbers and increased the depth of its customer relationships. It also has customer Net Promoter Scores² well ahead of the major bank average and a brand proposition that is stronger than ever.

"Pleasingly our decision to integrate Westpac and St.George taking the best from both has resulted in a Group with significantly more capability than either organisation had on a stand-alone basis."

Mrs Kelly said that the financial performance for the half, when viewed as a whole, reflects the impacts of both structural adjustments in the financial services industry and continued investment across the Group.

"Customer margins have been impacted by the increasing cost of wholesale funds at a time when we have been significantly increasing our market share. We have also secured a larger proportion of long-term funding which, while more expensive, provides certainty in supporting our customers," Mrs Kelly said.

"We are also making major investments in technology and banking operations. For example, significant progress has been made in the mortgage area, with processing times reduced by 40% over the last 12 months."

¹ All comparisons in this Media Release are with the prior corresponding period unless otherwise indicated. First Half 2009 information is provided on a pro-forma basis as if the Westpac and St.George merger was completed on 1 October 2008, to assist comparison with the current period.

² A measure of customer advocacy.

Result Highlights

- Growth in mortgages of 1.6 times banking system and household deposit growth of 1.3 times banking system;
- A \$732 million reduction in impairment charges, most notably in the Institutional Bank, reflecting an improved operating environment, a stabilisation in asset quality and relatively lower risk loan book;
- Westpac Institutional Bank consolidating its position as the clear number one¹ Institutional Bank in Australasia with deep relationships across key industry sectors and strong customer advocacy;
- Significant improvement in Wealth, with the BT administration platforms receiving around 1 in every 4 dollars invested in platforms during the half; and
- Further strengthening of The Westpac Group's financial position including higher capital levels, an improved stable funding ratio, increased liquid assets and sector leading provisioning coverage ratios.

Revenue of \$8,621 million was up 4%, with market share gains in mortgages and deposits supported by a solid contribution from the Institutional Bank and Treasury. The wealth business, BTFG, also performed strongly, driven by improving asset markets and strong cross-sell.

Continuation of the Group's disciplined approach to expense management saw expense growth moderate over the year to 2%, with contributions from merger scale benefits and flat fixed remuneration for executives. This was achieved notwithstanding further investment in the Group's customer-focussed strategy, including opening 19 more branches across the Group, hiring over 500 more front-line bankers as part of the Westpac Local rollout and increasing our project spend on customer facing initiatives. The Group's cost to income ratio fell to just below 40%.

Net interest margins continue to be impacted by the changing operating environment and over the past six months declined by 11 basis points to 2.28%. A major factor was a 10 basis point drop from Treasury due to lower revenue and holding higher liquid assets.

Higher funding costs for both wholesale funding and customer deposits also impacted margins in our consumer and business banking divisions, which were down 8 basis points.

The Westpac Group continues to strengthen its balance sheet. The Group has increased its provisioning through the half, with total provisions of \$5.3 billion, including the economic overlay, which remains unchanged at \$502 million. Collective provisions to credit risk weighted assets increased by 25 basis points to 150 basis points, a sector leading coverage ratio. The credit health of the portfolio has largely stabilised, including 90 day mortgage delinquencies, which fell 11 basis points.

In addition, Tier 1 capital improved during the half, increasing by 53 basis points to 8.64%. The Group also improved its funding profile, with its Stable Funding Ratio at 79%, up from 77%.

Customer initiatives

Initiatives included:

- Westpac Local – Excellent progress has been made in implementing Westpac Local, as we bring back grass roots banking through significant investment in local branches, including the hiring of 669 new Bank Managers and 59 Regional Managers. In addition, Westpac Retail and Business Banking opened 11 new branches and 4 new business bank centres over the year. The Westpac Local model is also being rolled out in New Zealand.
- St.George has successfully introduced new products in its branch network, including BT Super for Life in January 2010.
- The Westpac Group reduced all exception fees for both consumer and business customers to \$9 from 1 October 2009, creating a simpler and cheaper bank fee model. This has reduced bank fees charged to customers by \$158 million in the half, leading to an 80% drop in fee related customer complaints.
- Continued expansion of the Westpac Assist and St.George Assist customer support initiatives. During the half these programs directly assisted 22,000 customers.
- Westpac Institutional Bank invested in capability in key customer segments, with a focus on industrials and resources.
- Significant investment has also been made in improving core technology stability for better system reliability and improved customer experience.

Merger Progress

Our integration with St.George remains ahead of target on key metrics. St.George Bank is stronger than ever and customer numbers are 2% higher over the year. Merger expense synergies are on plan.

Other major milestones met over the half included moving onto a single general ledger, combining HR systems, moving to a single ADI and launching BT Super for Life through the St.George Bank and BankSA networks.

¹ Based on Peter Lee Large Corporate and Institutional Relationship Banking survey (Australia 2009).

Business Unit Performance

Divisions	Cash Earnings \$A millions				
	Half Year March 2010	Half Year Sept 2009	Half Year March 2009	Half Year Sept 2009 % Change	Half Year March 2009 % Change
WBC Retail and Business Banking	873	918	990	(5)	(12)
Westpac Institutional Bank ¹	807	203	158	large	large
St.George Bank ¹	472	470	573	-	(18)
BT Financial Group ¹	301	278	215	8	40
Westpac New Zealand (NZD)	125	34	202	large	(38)

WBC Retail and Business Banking (Westpac RBB) – The business has good underlying momentum although Cash Earnings eased over the past year as a result of the decision to reduce bank fees, higher funding costs and the lagged impact of slower activity increasing impairment charges by \$78 million. The business has delivered strong mortgage growth of 21% (1.8 times banking system) and sound deposit growth of 11% (household deposits 1.5 times banking system).

Westpac Institutional Bank (WIB) – Cash Earnings increased strongly, up \$649 million, primarily driven by solid operating income (up 5%) and a material decline in impairment charges. Our number one lead bank position helped lift core earnings 6% with higher margins and stronger fee income more than offsetting a 15% decline in loans and lower foreign exchange income. Debt Markets performed strongly again, with good customer flows and improving credit spreads driving income.

St.George Bank – The business has delivered good growth with lending up 9% and improved market share (mortgages growing at 1.3 times banking system) although reductions in bank fees and higher funding costs have limited revenue growth. In addition, the slowdown in economic activity and weakness in the commercial property sector significantly impacted St.George earnings, with a material uplift in impairment charges compared to the first half 2009. Despite the property sector having stabilised and property impairments looking to have peaked, these factors, in aggregate, led to Cash Earnings being unchanged between this half and second half 2009. BankSA continued to perform extremely strongly and generated a 9 per cent increase in Cash Earnings to \$109 million.

BT Financial Group (BTFG) – Cash Earnings increased strongly, up 40%, driven by stronger investment markets and an improved insurance result. Funds Management Cash Earnings growth of 37% was driven by higher average Funds under Management (FUM) and Funds under Administration (FUA), with BTFG maintaining number 1 position in wealth administration platforms for both FUA balances and net flows. Insurance Cash Earnings growth of 19% was driven by good cross sell into both the Westpac and St.George networks.

Westpac New Zealand – The prolonged recession in New Zealand, and the weakness of the property market, have impacted earnings in this division. While Cash Earnings for the half were significantly lower than the prior corresponding period, they were up sharply on 2H09. These movements reflect impairment charges peaking in 2H09, and now easing. As the New Zealand economy recovered, underlying performance began to show good momentum in the half with above system growth across both mortgages (up 6%) and business lending (up 1%). However, similar to Australia, improved growth has been more than offset by higher funding costs and the decision to reduce bank fees.

¹ First Half 2009 on a pro-forma basis.

Outlook

The recent period has seen a key turning point for the Australian banking system, with the improved economic environment leading to a stabilisation in asset quality and a material reduction in impairment charges. Total system credit demand is expected to improve as business investment gradually returns, with mortgages likely to remain solid.

While the Australian and New Zealand economies have shown marked signs of improvement, The Westpac Group remains cautious. Mrs Kelly said: "We expect the effects of the global financial crisis to be with us for many years. Indeed, recent issues in Europe have highlighted the fragile nature of the recovery in some global markets. In Australia we will continue to see impacts particularly over the next two years, as the transition towards new regulatory arrangements begins and the economy adjusts to post crisis credit costs. As a result we believe it is important to retain prudent balance sheet settings to deal with the challenges ahead."

Mrs Kelly concluded: "By supporting customers through the global financial crisis, and investing heavily in the front line, The Westpac Group has materially strengthened its business. We are very well positioned to further improve service to customers and returns for our shareholders."

Ends.

Net profit attributable to owners for First Half 2010 was \$2,875 million, an increase of \$700 million or 32% compared to First Half 2009. This result was driven by a 5% growth in core earnings and a 44% reduction in impairment charges.

Growth in reported core earnings was driven by the factors outlined in Section 4 and the timing of the St.George merger, with the result for First Half 2009 excluding six weeks of St.George earnings. Lower contributions from TPS revaluations and the St.George short term wholesale funding and deposit merger adjustments offset these items.

Of the components of core earnings, net interest income increased by \$455 million or 8% with a large part of the growth attributable to the inclusion of the St.George earnings for the full period. The remainder of the increase in net interest income was primarily driven by strong volume growth. This is discussed further in Section 4.2.1.

Non-interest income increased \$39 million or 2%. The increase from the full period impact of including St.George non-interest income was offset by lower fees and commissions and lower contribution from the TPS revaluations. The drivers of the lower fees are discussed further in Section 4.2.2.

Operating expenses increased by \$263 million or 8%, with a significant part of this increase the result of the St.George merger. In particular the full period impact of including the St.George expense base, higher amortisation from St.George intangibles and merger integration costs all contributed to the higher expense growth. The merger related cost increases were partially offset by lower non-lending losses. Drivers of other costs increases are discussed in Section 4.2.3.

Impairment charges decreased by \$678 million from \$1,557 million to \$879 million compared to First Half 2009. The impact of including St.George impairments for the full period was not significant. Lower Institutional Bank impairments were the primary driver of the reduction in impairments. This is further discussed in Section 4.2.4.

The effective tax rate decreased to 28% from 29% in First Half 2009 driven primarily by a \$106 million (AUD) excess provision reversal following the settlement of the dispute with the New Zealand Commissioner of Inland Revenue related to New Zealand Structured Finance Transactions.

Notes explained on page 5.

Notes to sections 2.1, 2.2, and 2.3

¹ Our principles for calculating Cash Earnings are discussed in Section 3.1. Outlined below are the current Cash Earnings adjustments to the reported result:

- *TPS revaluations – Adjustment for economic hedges, including associated tax effects impacting the Foreign Currency Translation Reserve, relating to hybrid instruments classified as non-controlling interests. The hybrid instrument is not fair valued, however, the hedge is fair valued and therefore there is a mismatch in the timing of income recognition in the statutory results. The mismatch is added back in deriving Cash Earnings as it does not affect the Group's profits over time;*
- *Treasury shares – Under A-IFRS, Westpac shares held by the Group in the managed funds and life business are deemed to be Treasury shares and the results of holding these shares are not permitted to be recognised as income. In deriving Cash Earnings, these results are included to ensure there is no asymmetrical impact on the Group's profits because the Treasury shares support policyholder liabilities and equity derivative transactions which are re-valued in deriving income;*
- *Fair value gain/(loss) on other economic hedges (which do not qualify for hedge accounting under A-IFRS) comprises:*
 - *The unrealised fair value gain/(loss) on foreign exchange hedges of future New Zealand earnings impacting non-interest income is reversed in deriving Cash Earnings in the current period as they may potentially create a material timing difference on reported earnings but do not affect the Group's profits over the life of the hedge;*
 - *The unrealised fair value gain/(loss) on foreign exchange hedges of fees payable for the use of the government guarantee on foreign denominated wholesale funding is reversed in deriving Cash Earnings in the current period as they may potentially create a material timing difference on reported earnings but do not affect the Group's profits over the life of the hedge; and*
 - *The unrealised fair value gains/(losses) on cross currency swaps hedging accrual accounted term funding transactions are reversed in deriving Cash Earnings in the current period as they may potentially create a material timing difference on reported earnings but do not affect the Group's profits over the life of the hedge.*
- *Ineffective hedges – The gain/loss on ineffective hedges is reversed in deriving Cash Earnings for the period because the gain or loss arising from the fair value movement in these hedges reverses over time and does not affect the Group's profits over time;*
- *Amortisation of intangible assets – The merger with St.George resulted in the recognition of core deposits intangibles and relationships intangible assets that will be amortised over their useful lives ranging between 5 and 9 years. The amortisation of intangible assets (excluding software) is a Cash Earnings adjustment because it is a non-cash flow item and does not affect cash distributions available to shareholders;*
- *Significant Items:*
 - *As part of the merger proposal with St.George, we announced the level of transaction and integration expenses expected to be incurred over a three year period. These expenses are incurred and they are being treated as Cash Earnings adjustments as they do not impact the earnings we expect St.George to generate following the integration period;*
 - *In Second Half 2009, the Group increased tax provisioning by \$703 million with respect to New Zealand structured finance transactions entered into between 1998 and 2002. The increase in the provision followed the High Court in New Zealand finding in favour of the New Zealand Commissioner of Inland Revenue (CIR) in proceedings where Westpac challenged amended tax assessments in relation to these transactions. Due to the significant size and historical nature of the issue, it has been treated as a Cash Earnings adjustment. In First Half 2010, the Group reached a settlement with the CIR by agreeing to pay 80% of the full amount of primary tax and interest. The reversal of tax provision of \$106 million in First Half 2010 has also been treated as a Cash Earnings adjustment;*
 - *The deposit and short-term wholesale funding fair value adjustment associated with the accounting for the merger with St.George was fully amortised during the year ended 30 September 2009 reflecting the contractual maturity of the deposits and borrowings and increased net interest income by \$55 million (\$38 million after tax) in Second Half 2009 and \$168 million (\$118 million after tax) in First Half 2009. Due to the significant size and short-term nature of this adjustment, it has been treated as a Cash Earnings adjustment; and*
 - *The Group recognised a provision of \$121 million (\$85 million after tax) with respect to long-standing legal proceedings, where a judgment was received during First Half 2009 with subsequent clarification of the judgment received during Second Half 2009. This was treated as a Cash Earnings adjustment due to its size and the historical nature of the proceedings.*

² St.George Cash Earnings prior to the merger relates to 1 October 2008 to 17 November 2008 for First Half 2009. St.George was consolidated from and including 18 November 2008, the date of the merger for accounting purposes.

³ Non-housing loans have been determined on a loan purpose basis.

3.1 Cash Earnings Results

In assessing its financial performance, including divisional results, The Westpac Group uses a measure of performance referred to as “Cash Earnings”¹. To calculate Cash Earnings Westpac adjusts the statutory results for the items outlined below. This allows the Group to more effectively assess performance for the current period against prior periods and to compare performance across business divisions and across peer companies.

Four categories of adjustments are made to statutory results to determine Cash Earnings:

- Material items that key decision makers at Westpac believe do not reflect ongoing operations;
- Items that are not considered when dividends are recommended, such as the amortisation of intangibles and economic hedging impacts;
- Accounting reclassifications between individual line items that do not impact statutory results, such as policy² holder tax recoveries; and
- In First Half 2009, inclusion of the St.George earnings from 1 October 2008 to 17 November 2008, being the earnings for the 6 week period before the merger occurred.

Throughout this profit announcement, reporting of financial performance for First Half 2010 and Second Half 2009 will refer to “Cash Earnings results”, with Cash Earnings results for First Half 2009 including pro-forma³ adjustments related to the St.George merger, unless otherwise stated.

Analysis of Cash Earnings by key line item			Pro forma ⁴	% Mov't	% Mov't
	Half Year March 10	Half Year Sept 09	Half Year March 09	Sept 09- Mar 10	Mar 09- Mar 10

Movements in the Australian dollar (A\$):New Zealand dollar (NZ\$) exchange rate impact both individual line items and reported Cash Earnings. Movements in exchange rates increased Cash Earnings by \$3 million compared to First Half 2009 and decreased Cash Earnings by \$3 million compared to Second Half 2009. The FX impact in Second Half 2009 included a small benefit from hedging volumes being higher than actual profits.

The impact of the NZ\$ hedges is reflected in non-interest income and was based on the hedge rates of 1.1815 for First Half 2010 compared to 1.1975 for Second Half 2009 and 1.2223 for First Half 2009.

Movements in average exchange rates impact individual line items as each line is translated at the actual average exchange rate. The average rate for First Half 2010 was 1.2619 when compared to 1.2482 for Second Half 2009 and 1.2050 for First Half 2009.

¹ Pro-forma Cash Earnings reconciliation is provided in Section 10.4

Overview

First Half 2010 has been a key turning point for the Australian economy. Early signs of improvement evident in Second Half 2009 have consolidated and activity is on an improving path. Key metrics, such as GDP growth, house prices, equity markets, the unemployment rate, and business and consumer confidence, have all performed strongly.

At the same time, the Global Financial Crisis (GFC) is likely to be largely behind us with more stable financial markets and governments winding back their support to the sector by removing the government guarantees for wholesale debt. In Australia, securitisation markets are becoming more accessible and corporates are beginning to be able to tap global capital markets. Notwithstanding this, the recovery has the potential to be volatile as evidenced in recent events in relation to European sovereign debt.

The GFC and associated economic impacts also led to a slowing in credit growth, particularly business, as companies have reassessed what are acceptable levels of gearing. Housing credit growth has remained reasonably robust, with the government initially supporting the sector with stimulus packages, and then, as conditions improved, growth became more self sustaining supported by good demand for housing. The strength of this sector has been central to the resilience of the Australian economy.

While the direct risks of the GFC appear to be largely behind us, the learnings and subsequent impact on the operating and regulatory environment will be more enduring.

Within markets, conditions are expected to remain more cautious with investors being more discerning about where they allocate funds and the price received for those funds. Offshore risks still remain including some caution around sovereign risks, especially in Europe.

For the banking sector, the more appropriate pricing for risk has seen average funding costs continue to rise as relatively cheap pre-GFC funding is replaced with higher cost post-GFC funding. Funding costs are also rising from a shift in the mix of funding to more high quality and higher cost term wholesale funding and from the increased competition for retail deposits.

Additionally, in seeking to manage potential flow-on effects from the GFC, the banking sector increased its capital levels and boosted its holdings of liquid assets. The higher levels are likely to be consistent with the direction of new regulatory requirements as global regulators seek to reduce the risks across the banking sector.

Westpac's strategy has continued to be centred on the customer. Through the GFC this was evidenced by:

- Building deeper relationships by pro-actively supporting customers through the GFC and meeting specific areas of demand. This included support for the First Home Buyer market and assisting corporate customers who needed time and support to reduce gearing over this period;
- An across the board reduction in customer fees for both consumer and business customers. This has assisted customers in difficulty and reduced associated complaints by 80%;
- Continuing to invest in the future including:
 - adding over 14 branches to the network – the only major Australian bank to organically expand its branches over 2008/2009¹;
 - Continuing to improve the capability of the sales force including 600 new bank managers for Westpac RBB;
 - Successfully bedding down the St.George merger and further investing in St.George's unique brand position; and
 - Strengthening the Group's financial position, including lifting capital levels, improving the stable funding ratio, increasing liquid assets and lifting provisioning cover ratios. These measures created a more sustainable base from which to continue supporting customers.

The Group has also further strengthened the quality of its funding base by increasing the duration of wholesale funding and lifting its share of Customer Deposits. Both activities have increased the Group's cost of funds trajectory but are important steps to sustainably support new loan growth, particularly mortgage lending.

The Westpac Group was recognised for its achievement in sustainably growing its business during the year at the World Economic Forum in Davos, where Westpac ranked 15th in the Top 100 global companies in sustainability. The Westpac Group was also the leading Australian company and the only bank in the Top 60.

As a result of its focussed strategy, The Westpac Group has emerged from the GFC in much stronger shape, with an enhanced market position. In addition to the benefits of the merger with St.George, other gains have included:

- In mortgages, Australian market share has increased from 25% to 27%, growing at around 1.6 times banking system;
- In household deposits, the Group has increased Australian market share from 23% to 24%, growing at around 1.3 times banking system;
- In the Institutional Bank, Westpac is the clear leader in relationship strength;
- In Westpac New Zealand, the business is showing the early signs of a turnaround, with improvements in both business and consumer market share; and
- In Wealth, the BT administration platforms continue to gather around 1 in every 4 dollars invested on platforms in Australia.

Financial Performance Summary

In First Half 2010 The Westpac Group delivered \$2,983 million in Cash Earnings, up 30% compared to First Half 2009. This equated to a 17% cash return on equity, up from 14%.

Cash Earnings per share was also up a strong 22%, with no major equity raisings since early 2009, and only a small increase in shares on issue, mostly from Dividend Reinvestment Plan issuance.

A material \$732 million decline in impairment charges was the key driver of the much stronger performance. With an improved operating environment and stabilising in asset quality the growth of new customer stress has materially declined and this has been reflected in lower impairment charges.

Core earnings for the Group were up a further 5% over the year building on the strong performance of a year earlier. Core earnings growth was supported by a 4% revenue growth and 2% expense growth.

The strengthening of the Westpac franchise through the GFC has materially lifted core earnings over the last 2 years, which is now some 30% higher.

¹ Source: APRA 'ADI Points of Presence Report'.

Revenue growth has eased from prior periods due to the impact of higher funding costs, and from the decision to materially reduce customer fees paid by both consumer and business customers.

Margins improved over the year by 4 basis points notwithstanding consumer and business margins declining 8 basis points. Higher funding costs have been the driver of the decline as the cost of both wholesale funding and Customer Deposits continued to rise. Margin gains from higher Institutional Bank and Treasury revenue more than compensated for the consumer and business margin decline.

On expenses, investment in customer facing capacity and capability increased while managing to hold growth to 2%. This has been made possible by the continued realisation of merger synergies and holding fixed executive salaries constant in 2010.

For much of 2008, and in 2009 investment focused on increasing the size and capability of customer facing resources. In 2010, investment has been directed more to projects focused on improving the customer experience, including enhancing branch technologies and development of a new sales and service platform.

The \$732 million decline in impairment charges was led by the Institutional bank as no new large impairments emerged over the half and a reduction in lending has led to an associated fall in new collectively assessed provisions. The business also benefited from being well positioned through identifying potential areas of stress and provisioning quickly.

Across other banking divisions (Westpac RBB, St.George Bank and Westpac New Zealand), impairment charges were a little higher than First Half 2009, due to the lagged impact of slowing economic growth in 2009 and rising interest rates. While higher over the prior year, impairment charges were down from the peak in Second Half 2009.

Performance across Westpac's businesses was varied, reflecting the way the GFC impacted the economy. Businesses most impacted by the GFC, Westpac Institutional Bank and the Group's Wealth business, BTFG, have rebounded strongly as the conditions that led to lower earnings in 2009 have largely reverted. For the Institutional Bank, the absence of any new large impairments has been the key feature, while for BTFG the turnaround in asset markets was the main driver of improved performance.

Westpac RBB was less impacted by the GFC and strongly lifted core earnings over 2009. In First Half 2010, the business consolidated its position absorbing the impact of cuts to customer fees, margin compression caused by rising average funding costs, and higher impairment charges.

St.George Bank delivered improved business momentum although this was offset by higher funding costs and cuts to customer fees. The tougher conditions in the commercial property sector have also seen impairment charges remain elevated.

In New Zealand, the prolonged recession and more difficult property markets had a significant impact on the business. As economic activity is restored, the performance of the business is improving, although starting from a lower base.

In aggregate, Westpac's portfolio of businesses is performing well with all divisions emerging from the GFC in a stronger strategic and financial position.

One of the consequences of the GFC has been a focus on more conservatively managing the Group's balance sheet. This has seen the Group increase its capital ratios, strengthen its funding base, materially boost liquid assets, and lift provisioning cover. Key metrics across these dimensions were further strengthened over the half, with:

- A rise in the Tier 1 capital ratio to 8.6%, up from 8.1%;
- Improved stable funding ratio at 79%, up from 78%;
- Higher liquidity levels at \$80 billion, up \$6 billion; and
- Higher provision cover with collective provisions to Credit RWA at 150 basis points, up from 142 basis points.

While the stresses of the GFC have largely passed, moves by governments and regulators globally to strengthen the prudential frameworks of banking systems is likely to see this stronger balance sheet position maintained.

Although the final outcomes of regulatory change remain somewhat uncertain, Westpac is confident that measures already taken by the Group have positioned the company well to respond to any further change.

Given the improved returns, an interim dividend of 65 cents per share has been declared by the Board. The dividend is fully franked. This represents an increase of 16% over First Half 2009 and a cash pay-out ratio of 64.8%. In considering the interim dividend, the Board took into account that there still remains a degree of uncertainty over future bank regulatory requirements.

In assessing shareholder value generated, Westpac focuses on Economic Profit. In First Half 2010 Economic Profit increased 80%, largely in line with the growth in Cash Earnings but also reflecting the high level of Australian tax paid and the associated generation of franking credits.

First Half 2010 – First Half 2009

Key contributors to the 30% growth in Cash Earnings to \$2,983 million over First Half 2009 are summarised below.

Net interest income \$6,043 million (up 6%):

- Lending up 6% (with average interest earnings assets 4% higher), with the majority of growth recorded in mortgages, and business lending lower;
- Customer Deposits up 6%, with Term Deposit growth accounting for all of the \$15 billion increase; and
- Margins improved 4 basis points driven by higher Treasury earnings and an improvement in Institutional Bank margins. Consumer and business margins were lower.

Non-interest income \$2,578 million (down 2%):

- The decision to reduce customer fees reduced Fee and Commission income by \$158 million over the half;
- The 15% reduction in Fees and Commissions was also due to lower income from the redemption of credit card loyalty points, partly offset by higher fees on committed but undrawn line fees;
- Lower trading income, principally as First Half 2009 saw a very strong performance. Debt Markets earnings were strong while Foreign Exchange revenues were lower;
- A significant improvement in Wealth as stronger asset markets boosted average FUM and average FUA balances and increased associated fees. Insurance earnings were also up benefiting from good cross sell; and
- Stronger Other Income, as asset write-downs and mark to market losses on finance assets recorded in First Half 2009 were not repeated.

Operating expenses \$3,438 million (up 2%):

- Salaries and other staff increases were up 4%, with the continued investment in the customer facing employees offset by holding fixed executive salaries constant in 2010;
- The increase in the number of branches and further branch refurbishments contributed to equipment and occupancy expenses rising 11%; and
- Other expenses were down 3% mainly from lower costs from the redemption of credit card loyalty points.

Impairment charges \$879 million (down 45%):

- A stabilisation of asset quality has seen a significant reduction in the growth in new stressed assets and an associated reduction in new impairment provisions; and
- New collectively assessed provisions were lower as new stress slowed and a reduction in lending saw an associated fall in collective provisioning charges.

Tax and non-controlling interests \$1,321 million (up 26%):

- Significant rise consistent with improvement in earnings, the effective tax rate was little changed at 30%.

First Half 2010 – Second Half 2009

Key contributors to the 28% rise in Cash Earnings over Second Half 2009 are summarised below.

Net interest income \$6,043 million was unchanged:

- Lending up 2% (with average interest earnings assets 5% higher), with a 7% rise in mortgages partly offset by a 3% fall in business lending;
- Customer Deposits up 2%, with very strong Term Deposit growth; and
- Higher funding costs led to an 8 basis point fall in consumer and business margins. Reported margins declined 11 basis points.

Non-interest income \$2,578 million (up 7%):

- Lower bank customer fees reduced Fee and Commission income by \$63 million over the half;
- Higher markets income with the narrowing of credit spreads assisting Debt markets revenues;
- Wealth earnings were flat, with improved average FUM and average FUA balances increasing Funds Management earnings offset by lower Lenders Mortgage Insurance earnings and a rise in insurance claims; and
- Other income was up \$44 million, from profit on asset sales (\$25 million) and the absence of any significant asset write downs or mark to market losses.

Operating expenses \$3,438 million (up 2%):

- Salaries and other staff increases were up 3%, reflecting general salary rises and higher bonus accruals consistent with the improved performance. Growth was moderated by holding fixed executive salaries constant in 2010;
- Further investment in the network and higher software amortisation increased equipment and occupancy expenses by 3%; and
- Other expenses were down 2%, mainly from lower non-lending losses and a reduction in amortisation of deferred expenditure. These were partly offset by higher investment in front line projects.

Impairment charges \$879 million (down 48%):

- A reduction in new impaired assets saw a fall in individually assessed impairment provisions of \$447 million; and
- New collectively assessed provisions were \$399 million with asset quality stabilising

Tax and non-controlling interests \$1,321 million (up 26%):

- Rise consistent with higher earnings.

Divisional Cash Earnings Summary

Compared to First Half 2009

Westpac Retail and Business Banking (Westpac RBB)

Market share gains more than offset by lower customer fees, higher funding costs and a rise in impairments.

St. George Bank (SGB)

Lower Cash Earnings from lower customer fees, higher funding costs and increased impairments.

Westpac Institutional Bank (WIB)

Strong operational performance and a substantial reduction in impairments increased earnings.

BT Financial Group (BTFG)

Improving markets, solid platform flows and strong insurance boost earnings.

New Zealand

Earnings impacted by softer income from higher funding costs and lower customer fees combined with impairment charges remaining elevated.

Pacific Banking

Cash Earnings down from lower foreign exchange earnings and a stronger \$A against the Pacific currencies.

Group Businesses

Improved Treasury contribution and no need to top-up economic overlay provisions boosted earnings.

Divisional Cash Earnings Summary

Compared to Second Half 2009

Westpac Retail and Business Banking (Westpac RBB)

Lower customer fees and higher funding costs reduce revenues with impairments improving.

St.George Bank (SGB)

Flat earnings with lower customer fees and higher funding costs offset by impairments declining from their peak.

Westpac Institutional Bank (WIB)

Strong revenue growth and impairment decline significantly boost earnings.

BT Financial Group (BTFG)

Lift in funds management income partially offset by higher insurance claims.

New Zealand

Cash Earnings rebounded as impairment charges declined from their peak.

Pacific Banking

Cash Earnings up 21% in local currency with good growth and lower impairments, offset by the negative impact of exchange rate movements.

Group Businesses

Cash Earnings little changed with a lower Treasury contribution and higher returns on capital.

4.2 Review of Earnings

4.2.1 Net Interest Income

First Half 2010 – First Half 2009

Net interest income increased \$365 million (6%) compared to First Half 2009. The increase was due to a 4% increase in average interest earning assets, combined with a 4 basis point expansion in net interest margins.

First Half 2010 – Second Half 2009

Net interest income was flat compared to Second Half 2009. The key drivers of the result were a 5% increase in average interest earning assets, offset by an 11 basis point contraction in net interest margins. Growth in average loans contributed 3.5% of the growth in average interest earning assets, with the remainder of the growth primarily from increases in Treasury liquid assets.

Loans¹

Total loans	474,644	463,459	448,872	2	6

First Half 2010 – First Half 2009

Loan growth of 6% for the 12 months to March 2010 was well ahead of financial system credit growth, particularly in Australia where financial system growth was 2.0% in the 12 months to March 2010³. In New Zealand credit growth was also ahead of system.

In Australia, Westpac's credit growth was 4.2 times financial system.

Loan growth had the following specific components:

- Australian housing, up 18% or \$43 billion. The Westpac Group housing credit growth was 2.2 times financial system and 1.6 times banking system⁴. Australian housing growth was 21% in Westpac RBB and 15% in St.George;
- Australian personal lending increased 4% or \$0.6 billion. The majority of this growth occurred in the St.George cards portfolio;
- Business and corporate lending in Australia fell 9% or \$12.9 billion. The WIB portfolio drove the majority of this reduction (\$9.3 billion). This was primarily due to weak demand and corporates paying down debt to reduce gearing;
- Housing lending in New Zealand grew 5% or NZ\$1.6 billion, significantly ahead of system growth. Contributing to this growth was an improved distribution capability coupled with improving economic conditions; and

¹ Spot loan balances.

² New Zealand comprises WIB New Zealand, Treasury and our New Zealand retail banking operations and wealth management business.

³ Source: Reserve Bank of Australia (RBA) 31 March 2010.

⁴ Source: APRA system growth, 12 months to 31 March 2010.

- New Zealand business lending (including Institutional lending) fell 4% or NZ\$1.0 billion. This movement was principally due to Institutional clients paying down debt to reduce gearing.

First Half 2010 – Second Half 2009

Loan growth over First Half 2010 was 2% notwithstanding strong growth in Australian housing lending. In contrast, the business portfolio contracted in both Australia and New Zealand. Key elements included:

- Australian housing growth of 8% remained above system, at 1.6 times banking system;
- The business book in Australia contracted, particularly in WIB;
- Flat New Zealand loan growth as declines in business (mostly Institutional) lending offset growth in housing and personal lending; and
- Margin lending recorded a small rise in volumes as equity markets recovered, following a period of significant contraction.

First Half 2010 – First Half 2009

Total deposits increased 4% (\$13.1 billion) for the 12 months to March 2010. Growth was driven by an increase in Customer Deposits of 6% (\$14.8 billion) while Treasury deposits declined 3% (\$1.7 billion) as Treasury replaced certificates of deposits with longer term funding.

Customer Deposit growth reflected the increased focus on deposit gathering across the Group. Australian Term Deposits were the primary driver of growth, (up 15%, or \$12.2 billion), as customers responded to higher relative interest rates on these products.

Australian household deposits grew 1.3 times banking system.

¹ Spot deposit balances.

² New Zealand comprises WIB New Zealand, Treasury and our New Zealand retail banking operations and wealth management business

Deposit growth had the following specific components:

- Australian Customer Deposits increased 7%, or \$15.5 billion. Term Deposits drove this growth with At Call accounts slightly higher over the period. Non-interest bearing deposit growth was primarily in mortgage off-set accounts;
- Australian Certificates of Deposit declined 11%, or \$5.4 billion, reflecting a desire to reduce Certificate of Deposit funding, which is short term, with longer term funds;
- New Zealand Term Deposits increased 22%, or NZ\$3.4 billion, with At Call deposits falling 13% as customers switched into higher interest Term Deposits; and
- Other overseas deposits increased as Treasury increased the issuance of Certificates of Deposits in the United States.

First Half 2010 – Second Half 2009

Total Deposit growth in First Half 2010 at 2%, was consistent with Second Half 2009. Customer Deposits grew 2% and Treasury deposits also increased by 2%.

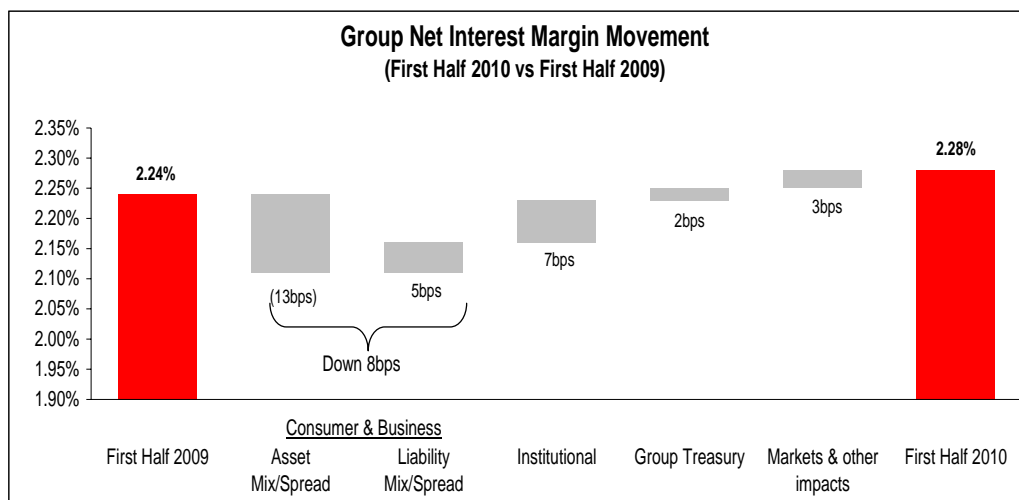

Customer Deposit growth reflected the following specific components:

- 17% increase in Australian Term Deposits as competitively priced offers attracted new funds and existing customers switched from At Call accounts;
- Growth was achieved in At Call and Term Deposits in New Zealand, as the business continued to focus on growing deposits; and
- Other offshore growth was primarily driven by Certificate of Deposit issuance in the United States.

Margins

\$m	Half Year	Half Year	Pro forma	% Mov't	% Mov't
	March 10	Sept 09	Half Year	Sept 09-	Mar 09-
			March 09	Mar 10	Mar 10

Tax equivalent gross-up ¹	-	22	23	(100)	(100)
Adjusted net interest income	6,043	6,065	5,701	-	6
Average interest earning assets	531,541	505,164	511,122	5	4
Interest margin	2.28%	2.39%	2.24%	(11bps)	4bps

First Half 2010 – First Half 2009

Group net interest margins increased 4 basis points from the First Half 2009 with a higher Institutional, Treasury, and mix and other impacts offset by lower margins from the Australian and New Zealand Consumer and Business Segments. The 8 basis point contraction in margins from Consumer and Business in Australia and New Zealand was principally driven by portfolio repricing not keeping up with increases in funding costs.

To explain individual product spread movements, it is helpful to understand Westpac's transfer pricing methodology. The methodology seeks to enable those writing business (both deposits and lending) to do so based on a clear understanding of the cost of funds and the quality of those funds raised. This methodology essentially has three elements:

- Firstly, assets and liabilities are transfer priced at an appropriate wholesale rate, normally the interbank swap rate. This is a marginal rate that aligns the term of the business written with an equivalent wholesale interest rate for the specific term;
- Secondly, the cost of raising term wholesale funding, which includes Westpac's credit spread, currency conversion costs and deal costs, is fully allocated to the loans and deposits as incurred; and
- Finally, an incentive is paid by asset originators to deposit originators to gather certain high quality customer deposits. This incentive seeks to enable the originators of higher quality customer deposits to remain competitive when deposit rates exceed equivalent wholesale rates. Consequently, the impact of higher deposit rates in the current half have been reported as asset spread compression.

Higher wholesale funding costs had a significant impact on margins with the impact spread across the categories. The increase in wholesale funding costs has been driven by:

- The replacement of lower cost funding with higher cost post-GFC funding;
- Lengthening the average tenor of term wholesale funding which has had an adverse impact of 3 basis points on the group margins; and
- The higher level and change in the mix of liquid assets.

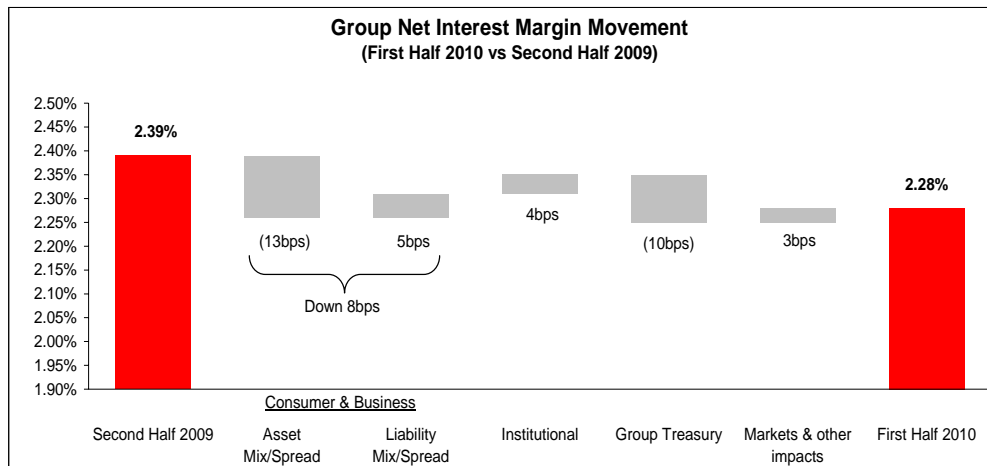

¹ The tax equivalent gross-up, relating to Structured Finance transactions was discontinued in First Half 2010 reflecting the immaterial nature of the balance as the Group continues to run-down the related assets.

The impact of this methodology is that product spreads are sensitive to movements in wholesale rates, cost of term wholesale funding and competition in retail deposits.

The specific components of the margin changes included:

- A decrease in asset mix/spread of 13 basis points, driven by:
 - 11 basis points decline in asset spreads predominantly from mortgages with some business lending spread compression due to higher average funding costs not fully reflected in product pricing. Increases in line fees, which are booked in non-interest income, partially offset this reduction; and
 - 2 basis points decline in asset mix due to the high growth in relatively lower spread mortgages while the business book contracted. Mortgages now account for 63% of the loan portfolio, up from 58% 12 months ago.
- An increase in liability mix/spread of 5 basis points, driven by:
 - 7 basis points increase in liability spreads due to an increase in the wholesale funding benefit and the impact of the incentive referred to previously; and
 - 2 basis points decline from mix impacts, which have seen much of the growth in deposits over the last year recorded in higher rate On-line savings and Term deposits.
- 7 basis points positive impact from Institutional, driven by higher margins on Institutional assets due to progressive re-pricing over the period and higher establishment fees;
- Group Treasury provided a 2 basis points increase from higher revenue recorded as net interest income. Increased revenue was driven by effective management of basis positions, including bills/libor positions related to the conversion of international borrowing into Australia dollars, and from short term rate interest positions. Treasury also generated gains from the narrowing of credit spreads on its larger liquid asset portfolio.
- Markets and other income contributed 3 basis points to the group margin, with:
 - 1 basis point increase as the positive benefit from merger related fair value adjustments was partly offset by lower Markets income recorded as interest income; and
 - 2 basis points increase from positive mix as relatively higher margin divisions, primarily Westpac RBB and St.George Bank, became a higher proportion of the portfolio and other impacts including lower earnings on capital.

First Half 2010 – Second Half 2009

The Group net interest margin of 2.28% declined by 11 basis points from the Second Half 2009. The fall was impacted by lower Treasury margins from a combination of lower revenue and increased liquid assets. Our consumer and business divisions recorded an 8 basis point decline in margins while Institutional activities added 4 basis points.

The specific components of the margin changes included:

- A decrease in asset mix/spread of 13 basis points, driven by:
 - 11 basis points decline in asset spreads predominantly from mortgages and some business lending margin compression due to increased average funding costs not fully reflected in product pricing. Increases in line fees, which are booked in non-interest income, partially offset this reduction; and
 - 2 basis points decline in asset mix from solid growth in lower margin mortgages with higher margin business lending contracting.
- An increase in liability mix/spread of 5 basis points, driven by:
 - 7 basis points increase in liability spreads due to the funding benefit generated by deposits partly offset by compression in spreads from increased competition in Term deposits and On-line savings accounts; and
 - 2 basis points decline from mix impacts, due primarily to the strong growth in higher rate On-line savings and Term deposits.
- 4 basis points positive impact from Institutional lending, from the continued portfolio re-pricing over the period and higher establishment fees;
- 10 basis points negative impact from Group Treasury was the result of lower revenue from balance sheet risk management activities and increased liquid asset holdings; and
- 3 basis points positive impact from Markets and Other was due to:
 - 3 basis points from mix benefits as relatively higher margin divisions, primarily Westpac RBB and St. George Bank, became a higher proportion of the portfolio;
 - 1 basis points decline due to lower Markets income recorded as interest income; and
 - the positive benefit from merger related fair value adjustments was partly offset by lower earnings on capital resulting in a 1 basis point positive impact.

The impact of lengthening the average tenor of term wholesale funding had an adverse impact of 2 basis points on the group margins.

4.2.2 Non-Interest Income¹

\$m	Half Year	Half Year	Pro forma	% Mov't	% Mov't
	March 10	Sept 09	Half Year March 09	Sept 09- Mar 10	Mar 09- Mar 10
Fees and commissions	1,219	1,281	1,434	(5)	(15)
Wealth management and insurance income	786	766	661	3	19
Trading income	460	289	725	59	(37)
Other income	113	69	(191)	64	159
Non-interest income	2,578	2,405	2,629	7	(2)

First Half 2010 – First Half 2009

Non-interest income was \$51 million (2%) lower than First Half 2009. Growth in wealth income and other income was more than offset by lower trading income and a reduction in fees and commissions. Lower fees and commission included the impact of reduction in customer fees of \$158 million.

Fees and commissions

The reduction in fees and commissions of \$215 million resulted from:

- The reduction in customer fees of \$158 million impacted transaction fees and commissions (\$89 million) and banking and credit fees (\$69 million);
- Lower transaction fees and commissions of \$270 million (29%) from:
 - reduced income from credit card loyalty point redemptions (\$126 million) following the spike in reward point redemptions in First Half 2009 driven by the Qantas Frequent Flyer withdrawal from the Altitude credit card loyalty program. The fee reduction was accompanied by a reduction in operating expenses of \$98 million;
 - the impact of reductions in customer fees (noted above), from 1 October 2009; and
 - the move to ATM direct charging in First Half 2010 (\$33 million).
- Higher banking and credit fees of \$54 million (13%). The majority of growth (\$105 million) was driven by credit line fees on corporate and business facilities. Increases were also seen in other lending fees, including mortgage fees in St. George Bank. These increases were offset by lower account overdrawn fees and reduced customer fees (noted above).

¹ Refer to Section 6 Note 5 for statutory accounts breakdown and pro-forma Section 7 Note 5 for Cash Earnings breakdown. Refer Section 10 for reconciliation between statutory accounts and Cash Earnings. As discussed in Section 3.1, commentary is reflected on a Cash Earnings basis and does not directly align with reported non-interest income as disclosed in Section 6, Note 5.

Wealth management and insurance income

Wealth management and insurance income increased \$125 million (19%). Group FUM increased by \$5.6 billion (14%) to \$44.4 billion, while Group FUA increased \$19.1 billion (31%) to \$81.7 billion.

\$bn	As at 31 March 2010	As at 30 Sept 2009	As at 31 March 2009	% Mov't Sept 09- Mar 10	% Mov't Mar 09- Mar 10
FUM					
BT	32.3	31.7	27.2	2	19

Westpac Institutional Bank	9.0	8.9	7.9	1	14
New Zealand	1.7	1.7	1.7	-	-
Group FUM	44.4	44.5	38.8	-	14
Average FUM for the Group	44.5	42.2	39.8	5	12
FUA					
BT	48.4	45.3	35.7	7	36
Asgard	32.6	31.4	26.3	4	24
New Zealand	0.7	0.7	0.6	-	17
Group FUA	81.7	77.4	62.6	6	31
Average FUA for the Group	77.9	69.9	63.3	11	23

Major factors impacting income were:

- Average Group FUM grew 12% from First Half 2009. The primary driver of this growth was the improvement in equity markets over this period. Other factors that also influenced the growth were net inflows in the BTFG Institutional and WIB portfolios of \$0.4 billion and \$1 billion respectively, while the BTFG retail and wholesale books experienced net outflows of \$1.0 billion and \$0.4 billion respectively;
- Average Group FUA increased 23% since First Half 2009. Growth was driven by strong net inflows of \$4.5 billion in BTFG products and improvements in equity markets. The Wrap platform and Corporate Super saw net inflows of \$3.8 billion and \$0.7 billion respectively;
- Improving investment markets and stronger commissions in the advice business resulted in higher wealth management revenue compared to First Half 2009; and
- Insurance income increased \$18 million (10%), with premium income up \$45 million and commission income increasing \$5 million. This benefit was partially offset by higher commission expenses (\$6 million) and higher claims in Life Insurance (\$8 million). In addition, adverse weather conditions also resulted in higher general insurance claims (\$13 million) and increased LMI reinsurance costs (\$9 million) due to increased reinsurance costs.

Trading

Trading income decreased \$265 million (37%) primarily due to the exceptionally strong trading result in First Half 2009. In the current period, the contribution from WIB Markets fell \$262 million, primarily due to a lower contribution from FX as competition increased pushing down margins and volumes. Pacific Banking contribution to trading income also fell due to lower FX returns. Treasury's contribution to trading income was higher.

Other income

Other income was \$113 million, an increase of \$304 million on First Half 2009. The First Half 2009 result was impacted by the Specialised Capital Group (SCG) asset write downs of \$115 million and mark to market losses on financial assets held at fair value of \$53 million. The First Half 2010 result included a gain of \$17 million on sale of an investment in Queensland Airports, an \$8 million gain on disposal of SCG property investments and a \$29 million mark to market gain on assets held at fair value related to credit portfolio management activity.

First Half 2010 – Second Half 2009

Non-interest income increased \$173 million (7%). This increase was a result of higher wealth trading and other income partially offset by reduced fees and commissions.

Fees and commissions

The reduction in fees and commissions of \$62 million (5%) was due to the reduction in customer fees of \$136 million. Movement in fees and commissions included:

- Lower transaction fees and commissions of \$98 million (13%) due to the impact of customer fee repricing in First Half 2010 (\$73 million), customers continuing to migrate to fee free accounts (\$7 million), and lower merchant and EFTPOS fee revenue (\$13 million); and
- Higher banking and credit fees of \$29 million (7%). The growth was driven by the same trends as evident in First Half 2010 with increased credit lines fees on corporate and business facilities partially offset by reductions in account overdrawn fees.

Wealth management and insurance income

Wealth management and insurance income increased \$20 million (3%). Group FUM decreased \$0.1 billion to \$44.4 billion while Group FUA increased \$4.3 billion (6%) to \$81.7 billion.

- Average group FUM grew by 5% since Second Half 2009. The primary driver of this growth was the improvement in equity markets. Other factors that also influenced the growth were positive inflows in the BTFG wholesale portfolios of \$0.2 billion, the full period impact of growth in the WIB FUM in Second Half 2009 and net outflows in the BTFG retail book of \$0.4 billion;
- Average group FUA increased by 11% since Second Half 2009. Growth was driven by strong net inflows of \$2.1 billion in BTFG products. The Wrap platform and corporate super both saw positive net inflows of \$1.8 billion and \$0.3 billion respectively; and
- Insurance income decreased \$24 million (11%) with premium income up \$26 million, lower deferred acquisition costs amortisation and increased expense deferral (\$6 million). This benefit was more than offset by higher reinsurance costs (\$18 million), higher commission expense (\$2 million) and lower commission income (\$6 million). In addition investment income reduced by \$8 million and adverse weather conditions in First Half 2010 resulted in higher general insurance claims (\$19 million).

Trading

Trading income was \$171 million higher (59%) compared to Second Half 2009. WIB Markets contribution increased \$145 million, primarily due to a higher contribution from Foreign Exchange. The remainder of the increase in trading income related to income booked in St. George from sale of financial market products.

Other income

Other income increased \$44 million on Second Half 2009. The Second Half 2009 result was affected by SCG asset write downs of \$40 million.

WIB Markets

\$m	Half Year	Half Year	Pro forma	% Mov't	% Mov't
	March 10	Sept 09	Half Year March 09	Sept 09- Mar 10	Mar 09- Mar 10
Net interest income	60	84	102	(29)	(41)
Non-interest income	399	283	611	41	(35)
<i>Trading income</i>	346	201	608	72	(43)
<i>Other non-interest income</i>	53	82	3	(35)	large
Total WIB Markets income¹	459	367	713	25	(36)

First Half 2010 – First Half 2009

WIB Markets income fell \$254 million or 36% from First Half 2009. The decline reflected a reduction in the Foreign Exchange contribution from an exceptional \$511 million in First Half 2009 to \$203 million in First Half 2010. This was due to the increased competitiveness in the market driving market spreads lower. The Debt Markets contribution increased from \$203 million in First Half 2009 to \$245 million in First Half 2010. The Equities contribution also increased by \$13 million.

First Half 2010 – Second Half 2009

WIB Markets income increased \$92 million (25%). The contribution from all businesses increased with Foreign Exchange, Debt Markets and Equities contributions higher by \$43 million, \$17 million and \$32 million respectively.

WIB Markets Value at Risk (VaR)²

The higher WIB Markets trading income was derived from similar levels of VaR when compared to prior periods.

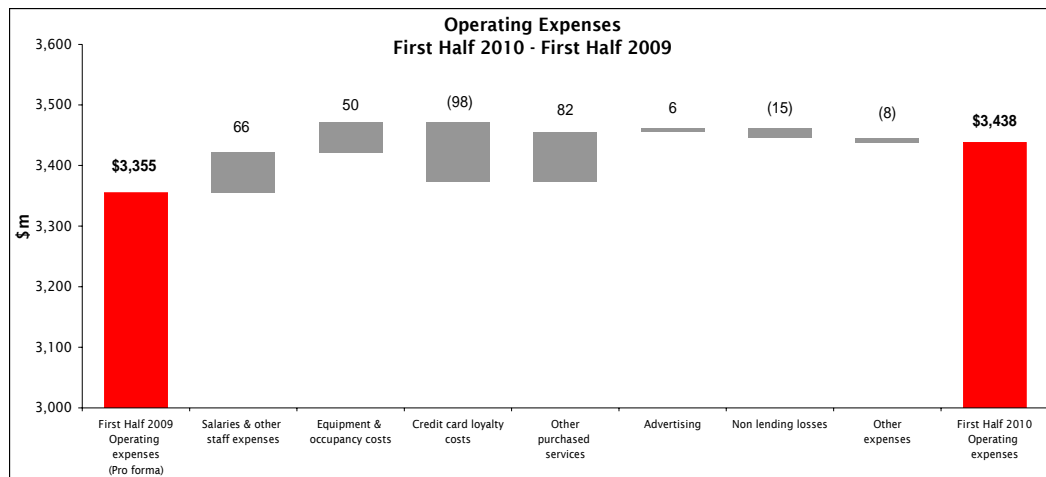

Average VaR for First Half 2010 was \$8.8 million compared to \$10.6 million for Second Half 2009 and \$9.3 million for First Half 2009.

¹ Total WIB Markets income includes income from sales and trading operations in Debt Markets, Foreign Exchange and Commodities, Carbon and Energy (FX and CCE), and Equity Derivatives within the Institutional Bank.

² VaR measures the potential size of loss given confidence level. Volatility is a key component.

4.2.3 Operating Expenses

	March 10	Sept 09	Half Year March 09	Sept 09- Mar 10	Mar 09- Mar 10
Salaries and other staff expenses	(1,931)	(1,879)	(1,865)	(3)	(4)
Equipment and occupancy expenses	(513)	(496)	(463)	(3)	(11)
Other expenses	(994)	(1,010)	(1,027)	2	3
Total expenses	(3,438)	(3,385)	(3,355)	(2)	(2)

First Half 2010 – First Half 2009

Operating expenses increased 2%, or \$83 million, compared to First Half 2009.

Salaries and Other Staff Expenses

Salaries and other staff expenses increased 4% or \$66 million due to:

- Increased salary costs associated with additional customer facing employees in Westpac RBB and additional employees to support technology projects, with limited general fixed salary increases for branch and operations employees and no salary increases for executives in First Half 2010;
- Increased bonus and incentive accruals as a result of improving financial performance (\$11 million);
- The Group's increased superannuation costs (\$13 million); and
- Additional costs associated with business restructures (\$8 million).

The above increases were partially offset by a decrease in FTE from the realisation of merger synergies, predominantly in support and head office functions.

Equipment and Occupancy Expenses

Equipment and occupancy expenses increased 11% or \$50 million compared to First Half 2009. This was driven by increased occupancy costs following rental increases and refurbishment and expansion of Westpac RBB and St. George Bank branches (\$14 million), and additional software amortisation expenses (\$41 million), which included \$16 million of write-offs in First Half 2010.

Other Expenses

Other expenses were down 3% or \$33 million compared to First Half 2009 due to a reduction in credit card reward point costs of \$98 million following the spike in reward point redemptions in First Half 2009 driven by the Qantas Frequent Flyer withdrawal from the Altitude credit card loyalty program. This decline was offset by increased purchased services (\$82 million) and higher advertising costs (\$6 million). The purchased services increase predominantly relates to additional project spend of \$48 million (relating to internet banking, distribution systems, data centres and testing capabilities), and \$19 million of benefit from litigation settlement and scheme refunds in First Half 2009 that were not repeated.

First Half 2010 – Second Half 2009

Operating expenses increased 2%, or \$53 million, compared to Second Half 2009.

Salaries and Other Staff Expenses

Salaries and other staff expenses increased 3% or \$52 million due to general fixed salary increases for branch and operations employees, the impact of higher employee bonus accruals and the Group's increased superannuation costs. These increases were partly offset by: a decrease in average FTE across the group as merger synergies were delivered, holding fixed executive salaries constant in First Half 2010; and, the impact of costs associated with business restructures incurred in the Second Half 2009, which were not repeated in First Half 2010.

Equipment and Occupancy Expenses

Equipment and occupancy expenses increased 3% or \$17 million compared to Second Half 2009. This was driven by increased occupancy costs following CPI rental increases and refurbishment, and expansion of Westpac RBB and St.George Bank branches (\$11 million) and additional software amortisation expense (\$14 million).

Other Expenses

Other expenses were down 2% or \$16 million compared to Second Half 2009, with higher credit card loyalty costs (\$8 million) more than offset by lower non-lending losses (\$12 million) and lower amortisation of deferred expenditure (\$9 million).

Capitalised Software

First Half 2010 – First Half 2009

The capitalised software balance for The Westpac Group increased \$48 million to \$634 million as at 31 March 2010. Key increases in the balance (net of amortisation) included:

- Projects to improve our front end distribution systems (\$13 million);
- Upgrading and refreshing various banking and infrastructure systems (\$48 million);
- Investment to consolidate the enterprise payments system and operations and enhanced efficiency through automation in payments processing (\$20 million); and
- Further compliance investment including Anti-Money Laundering (AML) (\$7 million).

These increases were offset by amortisation of previous year investments and the write down of 3 small systems (\$16 million).

First Half 2010 – Second Half 2009

Capitalised software balances increased by \$5 million to \$634 million as at 31 March 2010. Growth in the balance slowed as more project expenditure was directly expensed, amortisation from prior period expenditure increased and a \$16 million write down from 3 small systems was incurred.

Full Time Equivalent Employees (FTE)

Analysis of movement in FTE	As at 31 March 2010	As at 30 Sept 2009	As at 31 March 2009	% Mov't Sept 09- Mar 10	% Mov't Mar 09- Mar 10
Permanent employees	34,303	34,189	34,846	-	(2)
Temporary employees	3,143	2,843	2,411	11	30
Total employees	37,446	37,032	37,257	1	1
Integration employees ¹	601	833	524	(28)	15
Reported FTE	36,845	36,199	36,733	2	-
Average Reported FTE	36,188	36,533	36,727	(1)	(1)

First Half 2010 – First Half 2009

Reported FTE increased by 112 to 36,845 with the major changes being:

- An increase of 185 FTE in BTFG primarily to support business growth in Advice and Insurance;
- An additional 304 FTE in Technology to support Group projects;
- An increase of 93 FTE in Pacific Banking related to in-sourcing of technology support and additional FTE in PNG;
- A reduction of 24 FTE in Westpac RBB driven by productivity initiatives in Customer Service Centres partially offset by continued investment in distribution including the increase of over 500 in specialist relationship bankers and other customer serving employees; and
- Reductions in WIB (74 FTE), New Zealand (42 FTE), and Product and Operations (331 FTE) due to efficiency projects and merger savings.

First Half 2010 – Second Half 2009

Reported FTE increased 646 compared with Second Half 2009, changes included:

- An increase of 129 FTE in BTFG primarily to support business growth in Advice and Insurance;
- An increase of 75 FTE in Pacific Banking related to in-sourcing of technology support and additional FTE in PNG;
- An increase of 295 FTE across Technology and Product and Operations, to support group projects; and
- Increase in Westpac RBB (81 FTE) and St.George Bank (50 FTE), driven by projects and an increase in customer facing employees.

Integration FTE

Integration FTE increased by 77 compared to First Half 2009 and reduced by 232 compared to Second Half 2009. The reduction on Second Half 2009 was the result of several large integration projects being successfully completed. The cost of these FTE is included in the merger transaction and integration expense Cash Earnings adjustments. These projects are outlined in Section 4.8.

¹ Across the Group a total of 601 employees are engaged with the merger as at 31 March 2010.

4.2.4 Impairment Charges

\$m	Half Year March 10	Half Year Sept 09	Pro forma	% Mov't	% Mov't
			Half Year March 09	Sept 09- Mar 10	Mar 09- Mar 10
New IAPs	(637)	(1,084)	(1,030)	41	38
Write-backs	136	70	36	94	large
Recoveries	21	31	18	(32)	17
Total IAP, w write-backs and recoveries	(480)	(983)	(976)	51	51
Write-offs	(315)	(371)	(281)	15	(12)
Other changes in CAPs	(84)	(327)	(354)	74	76
Total new CAPs	(399)	(698)	(635)	43	37
Total impairment charges	(879)	(1,681)	(1,611)	48	45

Impairment charges declined significantly in First Half 2010, as the increase in stress associated with the GFC and the economic slowdown abated. Most of the reduction has been due to fewer individually assessed provisions from larger institutional and corporate companies. These companies were first to feel the effects of the financial crisis and have been the first to benefit from the improved operating environment.

New collectively assessed provisions were also lower as the incidence of new stress has declined and the de-gearing by some corporates has improved their risk grading and reduced exposures. This has enabled some collective provisions to be released. There was no change in the economic overlay over the half.

While impairment charges have reduced significantly, they still remain elevated given more companies are being downgraded than upgraded. Importantly, of the companies being downgraded most were already identified as stressed. Consumer impairment charges including write-offs remain at a higher level than experienced prior to the GFC. This is principally due to the lagged impacts of the economic slowdown and from higher interest rates.

In First Half 2010 The Westpac Group made no change in its economic overlay with the balance unchanged at \$502 million. More than half the balance of the economic overlay relates to provisions established through the GFC. While the operating environment has improved, some sectors remain fragile and Westpac has decided to maintain a conservative stance and not change the overlay at this time. Westpac conducts detailed reviews of its economic overlays every six months and a further review will be undertaken in the Second Half 2010.

First Half 2010 – First Half 2009

Total impairment charges of \$879 million for First Half 2010 were down 45% from First Half 2009, and represented 37 basis points of average gross loans.

Key movements were:

New individually assessed provisions for First Half 2010 of \$637 million were \$393 million lower principally due to:

- For WIB the new individually assessed charge of \$255 million was \$492 million lower from the absence of any new large corporate impairment charges and no repeat of the margin lending losses recorded in First Half 2009;
- In Westpac RBB, new individually assessed provisions of \$114 million were \$45 million higher principally from the lagged effect of the softer economic environment on small and medium businesses. In First Half 2009, the GFC had little impact on this sector;
- In St.George, new individually assessed provisions of \$166 million were \$37 million higher given increased stress in the commercial property segment. The change in the provision charge was small given the strong security supporting the exposures; and
- New individually assessed provisions in New Zealand of \$99 million were \$26 million higher than First Half 2009 as some companies previously identified as stressed were downgraded to impaired.

The Group also benefited from higher write-backs and recoveries, principally from a positive reassessment of some security values from the improving operating environment.

New collectively assessed provisions of \$399 million were \$236 million lower (down 37%) over First Half 2009. The Group regularly updates certain factors in its provisioning models to reflect model enhancements and increased or improved data. In First Half 2010, the Group processed a number of these factor changes. In aggregate, the changes had a small impact on new collectively assessed provisions but had a more significant impact on some divisions. The most significant movements were in WIB which had a \$79 million benefit and New Zealand a negative impact of \$48 million.

New collectively assessed provisions of \$399 million were \$236 million lower and included:

- WIB had a write-back of collective provision in First Half 2010 of \$103 million which was \$277 million lower than the First Half 2009 charge. The positive contribution was due to the reduction in lending and a few companies moving from watchlist back to fully performing following equity raisings over the half. These movements allowed some collective provisions to be released;
- In Westpac RBB, consumer asset quality deteriorated over the half from the delayed impact of the financial crisis, slightly higher unemployment and rising interest rates. This has led to an increase in consumer write-offs direct and, combined with factor changes, led to a \$54 million rise in new collectively assessed provisions to \$224 million compared to First Half 2009;
- New collectively assessed provisions of \$186 million in St.George were \$109 million higher over First Half 2009. The rise was due to higher write-offs direct in personal lending and credit cards and a further deterioration in the commercial property portfolio over the half;
- In New Zealand, new collectively assessed provisions of \$83 million were little changed over First Half 2009 at just \$4 million lower. The higher factor changes were offset by companies moving to impaired, and an associated movement of provisions from collective to individually assessed; and
- There was no further addition to the economic overlay in First Half 2010 following the \$120 million raised in First Half 2009.

First Half 2010 – Second Half 2009

Similar to the performance over the year, total impairment charges for the half were down 48% on Second Half 2009 although the composition of the movement across businesses was different.

Key movements were:

New individually assessed provision charges were \$447 million lower over Second Half 2009 principally due to:

- WIB \$109 million lower, due to the absence of any large individually significant impairment charges;
- In Westpac RBB, individually assessed provision charges were \$31 million lower, principally in the business portfolio;
- St.George individually assessed provisions were \$113 million lower over the prior period. Second Half 2009 was characterised by a significant deterioration in commercial property with security values falling. With the commercial property sector stabilising in First Half 2010, new individual provisions were lower; and
- In Second Half 2009, New Zealand encountered two large problem facilities which required IAPs of \$174m. The absence of these provisions led to a \$186 million improvement in individually assessed provision charges.

Write-backs and recoveries were \$56 million better than Second Half 2009 resulting from the improved operating environment.

New collectively assessed provisions were \$299 million lower with the factor changes detailed above having a similar impact. Key changes included:

- The decline in new collectively assessed provisions for the Group was primarily due to a \$385 million reduction in WIB. The Second Half 2009 saw a large increase in collective provisions for both commercial property and margin lending and these were not repeated in First Half 2010. Benefits from recapitalisations and factor changes also contributed to the significant reduction;
- In Westpac RBB a more modest deterioration in the portfolio than experienced in Second Half 2009 offset the impact of factor changes which led to a \$1 million reduction in new collectively assessed provisions;
- New collectively assessed provisions in St.George were \$56 million higher than Second Half 2009 from a small rise in consumer stress and additional provisions required for commercial property lending as some facilities were further downgraded; and
- The factor changes of \$48 million largely accounted for \$40 million rise in New Zealand new collectively assessed provisions over Second Half 2009.

4.2.5 Tax Expense

First Half 2010 – First Half 2009

The effective tax rate of 29.9% is 20 basis points lower than First Half 2009.

First Half 2010 – Second Half 2009

The effective tax rate of 29.9% is 30 basis points lower than Second Half 2009.

4.2.6 Non-Controlling Interests

The non-controlling interests primarily represents distributions on hybrid equity instruments 2003 TPS¹ and 2006 TPS¹, as well as other non-controlling interests, including the 40% portion of BTIM that Westpac does not own.

Non-controlling interests of \$32 million for First Half 2010 was \$2 million higher than the \$30 million for Second Half 2009 and decreased \$9 million on First Half 2009.

The \$2 million increase for First Half 2010 compared to Second Half 2009 is primarily due to increased earnings in BTIM and a higher interest rate in Australia impacting distributions on 2006 TPS. This increase was partially offset by the weakening of the United States dollar (US\$) against the A\$ on the distributions paid on our 2003 TPS hybrid equity instruments.

The \$9 million decrease for First Half 2010 compared to First Half 2009 is primarily due to the deterioration of the US\$ against the A\$.

¹ Non-controlling interests include distributions on 2003 TPS and 2006 TPS.

- There were 750,000 TPS 2003 issued in the United States of America at US\$1,000 each on 13 August 2003, with non-cumulative semi-annual distributions (31 March and 30 September) in arrears at the annual rate of 5.819% up to but excluding 30 September 2013. From, and including, 30 September 2013 the 2003 TPS will pay non-cumulative quarterly distributions (31 December, 31 March, 30 June and 30 September) payable in arrears at a floating rate of LIBOR plus 2.05% per year.
- Westpac TPS Trust issued 7,627,375 2006 TPS in Australia at \$100 each on 21 June 2006. The 2006 TPS are preferred units in the Westpac TPS Trust, with non-cumulative floating rate distributions which are expected to be fully franked. Westpac TPS Trust also issued one ordinary unit with an issue price of \$100 to Westpac. Westpac, as holder of the ordinary unit, is entitled to any residual income or assets of the Westpac TPS Trust not distributed to holders of 2006 TPS. The 2006 TPS are scheduled to pay quarterly distributions (30 September, 31 December, 31 March and 30 June) in arrears, subject to certain conditions being satisfied. The distribution rate on 2006 TPS, until 30 June 2016 (the step-up date) is calculated as the Australian 90 day bank bill rate plus 1% per annum (the initial margin), together multiplied by one minus the Australian corporate tax rate (30% during the half year ended 31 March 2010.) After the step-up date, the initial margin will increase by a one time step-up of 1% per annum.

4.3 Credit Quality

First Half 2010 marked a material change in the asset quality environment. While Full Year 2009 was characterised by uncertainty and deteriorating portfolio quality, First Half 2010 has been a period of portfolio stabilisation. In particular, an improved operating environment has assisted the financial health of both companies and consumers. New stress has declined particularly in the business portfolio.

With the stabilisation of the asset quality cycle the Group is now more focused on actively managing its existing stressed facilities rather than a further significant deterioration in the portfolio.

While operating conditions have improved, stressed assets have continued to rise and are now over 3 times larger than before the GFC. In addition, on average, more facilities had their credit rating downgraded than upgraded over the half. Importantly, where downgrades occurred, they were predominantly from companies that were already identified as stressed.

This slowing in the growth of new stress partly reflects the significant efforts over 2009 to identify problem facilities and to fully assess the sectors and regions most at risk. The rigor applied to this assessment, along with the Group's relatively high provision cover, contributed to the reduction in impairment charges in First Half 2010.

Looking across key portfolio segments

The Institutional sector which was the most impacted by the GFC has also been the first sector to recover. No new large individual impairments were booked in First Half 2010, which was in contrast to First Half 2009 which saw a number of large single names become impaired. The sector also significantly benefited from highly active equity markets, which allowed some companies to raise capital to pay down debt and reduce gearing.

In corporate and commercial sectors, the improved environment has led to a significant reduction in new stress.

While new stress has eased, further downgrades in the corporate and commercial sectors continued to emerge over the half where customers' income to support borrowings has been weak and/or security values have fallen. Commercial property continues to be the dominant source of new and downgraded stressed facilities.

Over the last 18 months the Group has sought to reduce its commercial property exposure and that continued over the half. The proportion of commercial property lending to gross loans has fallen, from a peak of 13% at 31 December 2008, to 9.6% at 31 March 2010.

The portion of the commercial property portfolio under stress has risen to 15% at 31 March 2010, from 12% at 30 September 2009. The increase in this ratio has in part been due to the decline in total commercial property lending.

The small business sector has performed solidly. Typically the last sector to feel the impact of an economic downturn, SME's have benefited from relatively low unemployment and solid personal incomes, and this has assisted in minimising the impacts of slower growth.

Consumers have also continued to perform well through this cycle, with low interest rates and the fiscal stimulus assisting the sector. Actual losses and delinquencies have increased over the year, which is consistent with slightly higher unemployment and rising interest rates.

In New Zealand, the economy is improving however, because the downturn was more pronounced, the impact on business and consumer stress has been more severe. Stabilising the result has been that more companies have migrated from the Watchlist and Substandard category into Impaired. The more severe correction in asset prices has similarly led to a greater impact on the consumer sector, particularly in mortgages.

Key portfolio statistics

Stressed assets, as a proportion of total TCE, recorded a small increase (9 basis points) over the half to 3.18%. The key components of stressed assets include:

- Impaired assets, as a proportion of TCE, increased to 63 basis points at 31 March 2010, from 57 basis points at 30 September 2009, due to a 14% rise in impaired assets. The majority of new impaired assets were in the commercial property sector from companies previously identified as Watchlist or Substandard. Over First Half 2010, there were modest, \$125 million write-offs of impaired assets against impairment provisions. The impaired portfolio remains well provisioned with a coverage ratio of 43%, up from 39%.

- 90 Days past due but well secured, as a proportion of TCE, increased 7 basis points over First Half 2010 to 36 basis points. This category includes a large portion of commercial property exposures that have very strong security but remain under stress.
- Watchlist and Substandard facilities, as a proportion of TCE, declined 4 basis points over First Half 2010 to 219 basis points as the incidence of new stress abated and companies previously identified as Watchlist and Substandard were downgraded into the impaired or 90 Days past due categories.

In mortgages, 90 day delinquencies increased 3 basis points over the half to 40 basis points but remain modest and well below industry averages.

Other consumer delinquencies also increased over First Half 2010 to 1.34%, up from 1.04% as at 30 September 2009. The rise in stress reflects higher interest rates and the lagged impact of slowing growth in 2009, including a reduction in hours worked and higher unemployment. The increase in delinquencies also reflects a rise in customers that have been unable to bring their accounts into order after benefitting from a period of hardship assistance. The normal seasonal delinquency pattern also contributed to the rise in 90 day delinquencies.

New Zealand mortgage 90 day delinquencies changed little over the last 6 months but remain at a high level given the more protracted slow-down in that economy. A similar pattern is also evident in other consumer 90 day delinquencies, where the 90 day delinquency rate has declined a modest 2 basis points over the half but the level of stress remains higher than in Australia.

Westpac maintained its high provisioning coverage, with the ratio of collectively assessed provisions to credit risk weighted assets increasing 8 basis points over the last 6 months to 150 basis points at 31 March 2010. Collectively Assessed Provisions of \$3,697 million include an economic overlay of \$502 million. No change was made to the economic overlay in First Half 2010.

First Half 2010 – First Half 2009

Growth in assets was driven by loan growth and higher levels of Treasury liquid assets, offset by a reduction in derivative valuations. Growth in total liabilities was driven by Customer Deposit growth and term wholesale funding issues, partially offset by falls in derivative liabilities and trading liabilities. The key balance sheet movements can be attributed to:

- 6% growth in loans, with Australian housing contributing the majority of the increase;
- An increase in Treasury liquid assets reflected in higher trading securities;
- A lengthening of the wholesale funding profile through increased debt issues; and
- Contraction in derivative assets and liabilities resulting from stabilisation of foreign exchange rates.

Assets

Receivables due from other financial institutions (down \$3 billion)

Lower collateral placed was the primary driver of the decrease.

Trading assets, financial assets and available-for-sale securities (up \$7 billion)

An increase in Treasury liquid assets has been the primary driver of increases in this category. This has consisted primarily of additional semi-government securities.

Derivative financial instruments (assets) (down \$24 billion)

The contraction in derivative financial instruments is primarily due to the stabilisation of foreign exchange rates in First Half of 2010.

Loans (up \$26 billion)

The growth in loans has been primarily driven by a 18% increase in Australian housing. Decreases in business lending of 9% in Australia and 4% in New Zealand have offset this loan growth.

Liabilities

Deposits (up \$13 billion)

The trend of increased retail deposits and reduced short-term funding has continued during First Half 2010. Australian Term Deposits have grown by 15%, while At Call accounts have remained relatively flat and Certificates of Deposits have fallen 11%.

Trading Liabilities and other financial liabilities (down \$8 billion)

This decrease is primarily the result of a lower level of securities sold under repurchase agreements.

Derivative financial instruments (liabilities) (down \$20 billion)

The reduction in derivative financial instruments is primarily due to the stabilisation of foreign exchange rates.

Debt Issues (up \$27 billion)

The increase in debt issues is the result of a focus on lengthening the term wholesale funding portfolio.

Loan Capital (down \$3 billion)

The decrease is primarily due to the redemption of subordinated notes and the impact of exchange rates.

Other Liabilities (down \$2 billion)

Primary drivers of this decrease are a decline in current tax liabilities, lower accrued expenses and a reduction in the Group's superannuation obligations.

First Half 2010 – Second Half 2009

The key movements in the balance sheet generally reflected similar themes that impacted the movements from First Half 2010 to First Half 2009. These include:

Assets

Trading assets, financial assets and available-for-sale securities (up \$6 billion)

First Half 2010 saw a large increase in the Treasury liquid assets.

Derivative financial instruments (assets) (down \$7 billion)

The decline is primarily attributable to the impact of interest rates and foreign exchange movements.

Loans (up \$11 billion)

Australian housing grew 8% during First Half 2010. Business lending continued to contract, predominantly in the WIB business.

Liabilities

Deposits (up \$6 billion)

Term Deposit grew substantially, up 17%, however this was offset by a reduction in At Call deposits of 7%. Certificates of Deposit also fell 8%.

Trading liabilities and other financial liabilities (down \$4 billion)

Securities sold under agreements to repurchase continued to decrease in this period.

Derivative financial instruments (liabilities) (down \$7 billion)

The decline is primarily attributable to the impact of interest rates and foreign exchange movements.

Debt Issues (up \$19 billion)

The Group continued to lengthen its longer-term wholesale funding profile in First Half 2010.

4.4.2 Funding

Funding View of the Balance Sheet¹

\$m	As at 31 March 2010					Total
	Liquid Assets	Customer Deposits	Wholesale Funding	Customer Franchise	Market Inventory	
Total assets	79,732	-	-	458,900	62,143	600,775
Total liabilities	-	(271,602)	(229,653)	-	(61,110)	(562,365)
Total equity	-	-	(1,933)	(37,071)	594	(38,410)
Total	79,732	(271,602)	(231,586)	421,829	1,627	-
Net customer loans	34,324 ²	-	-	440,320	-	474,644

	As at 30 Sept 2009					Total
	Liquid Assets	Customer Deposits	Wholesale Funding	Customer Franchise	Market Inventory	
Total assets	78,607	-	-	441,024	69,956	589,587
Total liabilities	(4,951)	(267,293)	(211,284)	-	(69,488)	(553,016)
Total equity	-	-	(1,934)	(35,074)	437	(36,571)
Total	73,656	(267,293)	(213,218)	405,950	905	-
Net customer loans	40,138 ²	-	-	423,321	-	463,459

	As at 31 March 2009					Total
	Liquid Assets	Customer Deposits	Wholesale Funding	Customer Franchise	Market Inventory	
Total assets	73,917	-	-	433,807	86,506	594,230
Total liabilities	(11,689)	(256,808)	(208,643)	-	(80,602)	(557,742)
Total equity	-	-	(1,932)	(34,646)	90	(36,488)
Total	62,228	(256,808)	(210,575)	399,161	5,994	-
Net customer loans	33,328 ²	-	-	415,544	-	448,872

Deposits to Net Loans Ratio

	As at 31 March 2010		As at 30 Sept 2009		As at 31 March 2009	
	\$m	%	\$m	%	\$m	%
Customer deposits	271,602		267,293		256,808	
Net customer loans	474,644	57%	463,459	58%	448,872	57%

Over the 12 months to 31 March 2010 growth in liquid assets (\$18 billion) and customer franchise (\$23 billion) have been funded by higher Customer Deposits (\$15 billion) and increased wholesale borrowings, predominantly term wholesale borrowings (\$21 billion).

This has resulted in the deposits to loan ratio remaining above 57% over the 12 month period.

¹ Refer to Section 6 Note 23 for a detailed analysis of the funding view of the balance sheet. Liquid assets are defined as assets that are eligible for re-purchase agreements with the Reserve Bank.

² Liquid assets in net consumer loans include internally securitised assets that are eligible for re-purchase agreements with the Reserve Bank at ninety percent of the value.

Funding by Residual Maturity

	As at 31 March 2010		As at 30 Sept 2009		As at 31 March 2009	
	Funding \$m	Ratio %	Funding \$m	Ratio %	Funding \$m	Ratio %
Customer deposits	271,602	50	267,293	52	256,808	51
Wholesale funding - residual maturity

6 to 12 months	24,146	4	18,291	3	15,897	3
Less than 6 months ²	89,614	17	98,967	19	100,738	20
Short term wholesale funding	113,760	21	117,258	22	116,635	23
Total funding³	540,259	100	515,585	100	502,029	100

The Westpac Group's funding supports the provision of loans and working capital to customers as well as its holdings of liquid assets. As at 31 March 2010 total funding was \$540 billion, an increase of 8% from 31 March 2009. During First Half 2010 the methodology used to calculate total funding requirements and component contributions was modified to include Equity and exclude Excess Liquid Assets. This moves The Westpac Group disclosures toward proposed disclosures issued by the Basel Committee in December 2009. Comparatives have been restated for this change.

The Westpac Group monitors and sets targets on the composition and stability of its funding base. This includes a target of greater than 75% for the stable funding ratio. Stable funding includes Customer Deposits, wholesale term funding with residual contractual maturity greater than 12 months, equity and securitisation. Recognising the dynamic nature of wholesale markets, the Group seeks to maintain access to a broad range of wholesale markets.

Over the last twelve months The Westpac Group has strengthened its funding base by lengthening the average tenor of long term wholesale funding. This increased long term wholesale funding together with a slight contraction in the proportion of total funding provided by Customer Deposits has seen the stable funding ratio improve to 79% from 77%, with the contribution from wholesale funding with a residual maturity greater than 12 months increasing by 4 percentage points. As a result the Group's overall short term wholesale funding contracted by 2 percentage points.

The growth in the stable funding ratio was driven by Term Deposits and \$29 billion of long term wholesale issuance over the 6 months to 31 March 2010. The use of the Australian and New Zealand government guarantees reduced over the period, with government guaranteed issuance in the last 6 months predominantly the result of reverse enquiries, where investor-requested deals were guaranteed. As outlined further in Other Regulatory Developments the government guarantee has been withdrawn in Australia from 31 March 2010 and was withdrawn in New Zealand from 30 April 2010.

Over the last 12 months our access to wholesale funding markets has been strong, with issuance occurring in Australia, Japan, United States, United Kingdom, Hong Kong, New Zealand, Singapore, Canada and Europe. The Westpac Group was the first major Australian bank to access the mortgage backed security market since the onset of the GFC, with its \$2.0 billion transaction in December 2009. The average duration of wholesale term funding raised in the First Half 2010 was 5.0 years versus Second Half 2009 for 4.7 years and 3.6 years for First Half 2009. At 31 March 2010 offshore wholesale funding represented 25% of total funding and 55% of this has a term greater than one year.

Highly liquid assets that qualify as eligible collateral for repurchase agreements with the Reserve Bank have increased by \$18 billion to \$80 billion over the last 12 months, as we focussed on strengthening our liquidity position.

The impact of draft prudential liquidity changes is discussed in Other Regulatory Developments (Section 4.6).

¹ Equity less FX translation, Available for Sale Securities and Cash Flow Hedging Reserves.

² Excludes netting of excess liquid assets deducted under previous methodology.

³ Including Equity as described in Note 1. Hybrids in the amount of \$1.9 billion have been included in wholesale funding.

4.5 Capital and Dividends

Basel II	31 March 2010	30 September 2009	31 March 2009	Target Range ¹
Tier 1/RWA ²	8.6%	8.1%	8.4%	6.75%-7.75%
TRC ³ /RWA	10.8%	10.8%	11.4%	9.75%-10.75%
RWA (\$m)	290,097	288,739	280,029	n/a

Tier 1 movement for the half year ended 31 March 2010

The Westpac Group's Tier 1 capital ratio of 8.64% at 31 March 2010 was 53 basis points higher than the 30 September 2009 Tier 1 ratio. The higher ratio was principally due to higher Cash Earnings and low growth in risk weighted assets (RWA). The key drivers of the increase in the Tier 1 ratio over the period included:

- First Half 2010 Cash Earnings of \$3.0 billion added 103 basis points;
- Dividends payable, net of the estimated DRP for the interim dividend, reduced Tier 1 by 49 basis points;
- Risk weighted assets reduced Tier 1 by 4 basis points with an increase in RWA for Interest Rate Risk in the Banking Book (IRRBB) and operational risk offset by a reduction in credit risk weighted assets, and lower RWA for equity risk (1 basis point);
- Other reductions to Tier 1 capital included a higher deduction for retained earnings in non-consolidated subsidiaries⁴ (11 basis points), merger related costs (4 basis points) and foreign currency translation reserve (2 basis points). These were partially offset by a lower deduction for deferred tax assets, mainly relating to financial market instruments (10 basis points) and benefit from release of New Zealand structured finance tax provision (4 basis points);
- Capital deductions related to regulatory expected loss and general reserve for credit losses reduced the Tier 1 ratio by 1 basis point;
- New capital issued includes the higher than estimated dividend reinvestment participation for 2009 (4 basis points), shares issued under various incentive plans, including employee share plans (3 basis points); and
- Within Tier 1 capital core capital also increased, rising 54 basis points to 7.11%. Total regulatory capital increased by 4 basis points to 10.82%. Growth in total regulatory capital was impacted by the redemption of subordinated debt instruments.

¹ Our target ranges indicate the likely capital ratio that will be maintained in normal business circumstances. Current market conditions and the uncertainty around pending regulatory changes see us operating above our target range.

² Risk weighted assets.

³ Total regulatory capital.

⁴ These subsidiaries are consolidated for statutory accounting purposes but are not consolidated into the banking group for regulatory capital purpose.

Risk Weighted Assets

	Loans (per Section 6)			Basel II (Advanced / Standardised) RWA

(% of total RWA)				15%	15%	-
	474,644	463,459	2	290,097	288,739	-

The Westpac Group's RWA was little changed over the First Half 2010. Movements in RWA were driven by the following factors:

- Credit risk RWA was little changed over the half with virtually all increases in lending recorded in lower risk mortgages while higher risk business lending declined. Components of credit RWA included;
 - Business RWA fell by 4%, largely due to reductions in loan volumes of 7% offset by a modest deterioration in credit quality among stressed assets;
 - Consumer RWA increased 7% with loans increasing at the same rate. The strong growth in loans was mostly driven by home lending;
- The decrease in equity risk was primarily due to a reduction in investment holdings;
- The increase in Interest Rate Risk in the Banking Book (IRRBB) risk weighted assets was mainly due to a reduction in the value of embedded gains as interest rates increased; and
- The increase in Operational risk weighted assets was due to an increase in capital required by St.George, which is measured according to the Standardised approach, and a one-off modelling impact for Westpac New Zealand.

¹ Pacific Banking's RWA are classified as consumer. RWA in Pacific Banking are calculated using the Standardised approach.

Dividends

Ordinary dividend (cents per share)	As at 31 March 2010	As at 30 Sept 2009	As at 31 March 2009
Interim (fully franked) - determined dividend	65	-	56
Final (fully franked)	-	60	-
	65	60	56

The Directors have declared a fully franked dividend of 65 cents per share, an increase of 9 cents per share or 16% over the First Half 2009.

The interim dividend represents a payout ratio of 64.8% on a Cash Earnings basis.

Our ability to continue to frank dividends remains very strong, with our adjusted franking account balance which allows for the reduction in franking credits for the interim dividend, at \$1,973 million as at 31 March 2010.

Dividend Reinvestment Plan (DRP)

The Board has determined to satisfy the DRP for the 2010 interim dividend via the issuance of shares.

The Board has also determined that in relation to the 2010 interim dividend, the Market Price at which shares will be issued under the DRP will not include a discount. The pricing period for setting the Market Price will be the 10 trading days commencing 25 May 2010.

Core Capital Activity during First Half 2010

There was no core capital activity during the First Half 2010.

Hybrid Tier 1 Capital

As at 31 March 2010, Westpac had \$4.4 billion of Residual Tier 1 capital instruments on issue. There was no movement in Residual Tier 1 capital during First Half 2010.

Total Residual Tier 1 capital represents 18% of total Tier 1 capital at 31 March 2010.

Exchange Rate Risk on Future NZ\$ Earnings

Westpac's policy in relation to the hedging of the future earnings of our New Zealand retail business is to manage the economic risk where Westpac believes there is a strong likelihood of significant adverse movements to the A\$/NZ\$ exchange rate. Westpac manages these flows over a time horizon under which up to 100% of the expected earnings for the following twelve months and 50% of the expected earnings for the subsequent twelve months can be hedged. Hedges are executed on a pre-tax basis.

At 31 March 2010, 4 months of forecast New Zealand earnings have been hedged. Outstanding hedges have an average rate of 1.2040 (including forward points).

Capital Deduction for Regulatory Expected Credit Loss

For capital adequacy purposes APRA requires the amount of Basel expected credit losses in excess of eligible provisions to be deducted from capital. The following table shows how the deduction is calculated. In applying the capital deduction, 50% is deducted from Tier 1 capital and 50% is deducted from Tier 2 capital.

\$m	As at 31 March 2010	As at 30 Sept 2009	As at 31 March 2009
Provisions associated with eligible portfolios			
Total provisions for impairment charges (Section 6 Note 12)	5,273	4,734	4,483
plus general reserve for credit losses adjustment	-	-	-
less ineligible provisions ¹	(1,845)	(1,643)	(1,368)
less certain deferred tax assets	(653)	(619)	(560)
Total eligible provisions	2,775	2,472	2,555
Regulatory expected loss²	3,579	3,231	3,331
Capital deduction for shortfall in provisions for regulatory expected losses	(804)	(759)	(776)
Deducted from Capital as follows:			
Tier 1 reduction	(402)	(379)	(388)
Tier 2 reduction	(402)	(379)	(388)

¹ Provisions associated with portfolios subject to the Basel standardised approach to credit risk are not eligible. The comparison between regulatory expected loss and eligible provisions is performed separately for defaulted and non-defaulted exposures.

² Regulatory expected loss is calculated for portfolios subject to the Basel advanced IRB approach to credit risk.

4.6 Other Regulatory Developments

Australian government guarantee scheme

On 7 February 2010, the Australian Government announced that the Guarantee Scheme for Large Deposits and Wholesale Funding (the Guarantee Scheme) would close to new liabilities from 31 March 2010. The Guarantee Scheme, originally announced in October 2008, provided a guarantee facility for deposits of amounts over \$1 million and wholesale funding of an eligible ADI, in return for a fee payable by the eligible ADI.

Deposit balances above \$1 million covered by the Guarantee Scheme as at 31 March 2010 will be covered until maturity (for Term Deposits) or until October 2015 (for at call deposits). For at call deposits, the amount covered will be capped at the closing guaranteed amount on 31 March 2010. Deposits and interest payments after this date will only be covered (up to the capped amount) if the guaranteed balance has fallen below the capped amount. For Term Deposits, interest due after 31 March 2010 will be guaranteed to maturity. Statutory trust accounts will be treated in the same way as other large deposits. Guaranteed wholesale liabilities as at 31 March 2010 will also be guaranteed to the earlier of maturity or five years.

Guarantee Scheme fees based on eligible ADIs' long term credit rating will continue to apply throughout the period for which the guarantee applies to the respective deposits. ADIs administer this fee on behalf of the Australian Government. At Westpac this fee is calculated daily and paid monthly in arrears. The monthly payment is calculated on the basis of the funds to be guaranteed, multiplied by the Guarantee Scheme fee. The Guarantee Scheme fee applicable to Westpac, based on its current long term rating by Standard and Poor's of AA, is 70 basis points or (0.70%) per annum. The fee waiver for guaranteed amounts held in statutory trust accounts will continue to apply.

The closure of the Guarantee Scheme does not affect the Financial Claims Scheme (FCS), administered by the Australian Prudential Regulation Authority (APRA), which will continue to provide depositors a free guarantee of deposits up to and including \$1 million in eligible ADIs. The FCS applies to an eligible ADI if APRA has applied for the winding up of the ADI and the responsible Australian Government minister has declared that the FCS applies to that ADI. The Financial Claims Scheme (ADIs) Levy Act 2008 provides for the imposition of a levy to fund the excess of certain of APRA's financial claims scheme costs connected with the ADI. The levy is imposed on liabilities of eligible ADIs to their depositors and cannot be more than 0.5% of the amount of those liabilities. The \$1 million FCS cap will be reviewed by the Australian Government in October 2011.

New Zealand government guarantee scheme

Westpac New Zealand Limited (WNZL) opted into the NZ deposit guarantee scheme that the NZ Government originally announced on 12 October 2008. The scheme was for a two year period from that date. WNZL entered into a Crown Deed of Guarantee on 11 November 2008, which was amended by a Supplemental Deed dated 24 November 2008. The Crown withdrew the original deed in respect of indebtedness incurred on or after 1 January 2010 and entered into a revised deed of guarantee with WNZL dated 16 December 2009. The expiry date of the scheme remains 12 October 2010.

The NZ deposit guarantee extends to debt securities issued by WNZL in any currency (which includes deposits and other amounts lent to WNZL), other than debt securities issued to excluded creditors such as financial institutions and related parties of a participating entity. It does not extend to subordinated debt obligations. The debt securities covered by the NZ deposit guarantees are limited to an amount of NZ\$1 million per creditor per approved institution. Under the original NZ deposit guarantee, WNZL was required to pay a fee of 10 basis points (or 0.1%) on the amounts owing to creditors covered by that guarantee to the extent that amount exceeded NZ\$5 billion as at 12 October 2008. A similar additional fee was payable in respect of the position as at 12 October 2009.

On 25 August 2009 the Crown announced an extension of the deposit guarantee scheme. The extension scheme is effectively a new scheme that will commence on 12 October 2010 and end on 31 December 2011. Institutions must re-apply to have a guarantee under the extension scheme. As at the date of this report, WNZL and Westpac Banking Corporation's NZ Branch have not applied for the extension scheme.

On 1 November 2008, the New Zealand Government announced details of a wholesale funding guarantee facility (Facility) to investment-grade financial institutions that have substantial New Zealand borrowing and lending operations. The Crown entered into a Crown Wholesale Funding Guarantee Facility Deed with WNZL on 23 February 2009 and has provided a Crown Wholesale Funding Guarantee in respect of WNZL dated the same date. The Facility operated on an opt-in basis, by institution and by instrument. Wholesale funding liabilities of WNZL (which could include amounts guaranteed by WNZL) only have the benefit of the Facility where a Guarantee Eligibility Certificate has been issued in respect of those liabilities. Copies of the Guarantee Eligibility Certificates issued in respect of WNZL obligations are available on the NZ Treasury internet site. A guarantee fee is charged for each Guarantee Eligibility Certificate issued under the Facility, differentiated by the credit rating of the issuer of the relevant securities, the term of the security being guaranteed and, in the case of issues with terms of more than one year, between New Zealand dollar and non-New Zealand dollar issues. The maximum term of securities guaranteed is five years.

The Facility closed on 30 April 2010. From that time no new Guarantee Eligibility Certificates will be issued but existing guaranteed liabilities will not be affected. Westpac Banking Corporation's New Zealand Branch did not participate in the scheme.

Further information about the NZ deposit guarantee and the Facility may be obtained from WNZL's General Short Form Disclosure Statement for the three months ended 31 December 2009 and the New Zealand Treasury internet site 'www.treasury.govt.nz'.

Liquidity

On 17 December 2009 the Basel Committee on Banking Supervision (BCBS) released a consultative document titled "*International framework for liquidity risk measurement, standards and monitoring*". The BCBS intends to release final standards by December 2010, with implementation by national jurisdictions before December 2012.

APRA has indicated that it will release revised liquidity standards for consultation following the finalisation of the BCBS standards. It is expected that APRA will release final standards by December 2011.

A consultation process and Quantitative Impact Study is currently being undertaken by the BCBS and details of the proposed enhanced liquidity requirements may change through that process. Until there is greater clarity regarding the new prudential requirements, any impact on Westpac cannot be determined.

Capital

It is currently anticipated that APRA amendments to the methodology for calculating risk-weighted assets for market risk in the bank trading books will be implemented from 1 January 2011. The final version of these changes is expected during 2010. It is likely that the new methodology will increase the risk-weighted assets reported for market risk.

On 17 December 2009 the BCBS also released a consultative document titled "*Strengthening the resilience of the banking sector*". New prudential requirements for regulatory capital and the measurement of risk-weighted assets are expected to be released by December 2010, with implementation targeted for the end of 2012. At this stage, it is uncertain how many of the proposed changes in the consultative document will be translated into prudential requirements for banks and for supervisors. Until there is greater clarity, any impact on Westpac cannot be determined.

Further standards are anticipated from the BCBS during 2010, with attention expected to be paid to the prudential requirements for systemically important banks, including Westpac.

Tax Developments

The Australian Federal Government commissioned Australia's Future Tax System Review (the Review) which is a comprehensive review of the Australian taxation system (except GST), chaired by the Secretary to the Treasurer, Dr Ken Henry AC.

On 2 May 2010 the Federal Government released the Review and its initial response. A large proportion of the Review's 138 recommendations are not dealt with in the Government's initial response. Of the recommendations addressed in its initial response, the Government recommends reducing the company tax rate to 29% for the 2013-2014 income year and to 28% from the 2014-15 income year (28% for small business by 2012), and the gradual increase of the employers' compulsory superannuation guarantee from 9% to 12% by 2020. Detail of these proposed reforms, and the Government's response to the other recommendations, are expected to be released progressively. Until further detail is released, and any changes to the law finalised, any impact on Westpac cannot be determined.

Changes to Accounting Standards

In further response to the GFC, governments, regulators and accounting standard setters are working to revise certain accounting standards. The objective is to achieve convergence towards a single set of high-quality, global and independent accounting standards. The specific areas that have been targeted include accounting for financial instruments, loan-loss provisioning, off-balance sheet exposures and the impairment and valuation of financial assets. The Group expects that there will be a number of new standards issued in calendar years 2010 and 2011 and that these may require changes to our current accounting approaches.

Further Regulatory Developments

The Australian Federal Government has embarked on a program of regulatory reform, which will affect Westpac. This includes:

- credit law reform;
- the introduction of an unfair contracts regime in relation to contracts with consumers;
- margin lending reform;
- superannuation changes;
- changes to the regulation of the financial planning sector and the provision of financial advice, including obligations to promote advisors acting in the best interests of their clients and a prospective ban on remuneration structures perceived to give rise to undue conflicts of interest; and
- the introduction of a new regulatory framework for personal property securities.

Westpac continues to monitor and review the above developments and is, or will amend its systems, processes and operations to implement regulatory changes as they occur.

Operating Model Review in New Zealand

Until 1 November 2006, Westpac Banking Corporation (WBC) conducted its banking operations within New Zealand in a branch structure. On that date, and after extensive consultation with the Reserve Bank of New Zealand (RBNZ), Westpac adopted a dual registration operating model including a locally incorporated subsidiary, Westpac New Zealand Limited (WNZL), to conduct its retail and business banking activities in New Zealand, and a branch, Westpac Banking Corporation New Zealand Branch (NZ Branch) to conduct its Institutional and financial markets activities. The conditions of registration of each of WNZL and NZ Branch are consistent with these operating model arrangements. In 2008, it became apparent that both WNZL and NZ Branch had been non-compliant with certain of their conditions of registration. Consequently, the RBNZ asked Westpac to review the structure of its operating model in New Zealand to ensure that it is able to sustain durable compliance with the RBNZ's prudential policies. Accordingly, it was agreed that an independent review would take place, with the terms of reference for the review established through consultation between the RBNZ, WNZL and NZ Branch. The RBNZ, WNZL and WBC have now reached agreement on changes to the operating model and an implementation programme is currently being developed. As a result, there will be a transfer of assets and liabilities from NZ Branch to WNZL, with WNZL then assuming most of the lending and deposit-taking activities, and certain other activities, currently conducted by the NZ Branch. The NZ Branch will continue to provide full financial markets functionality to its customers. The new operating model is currently expected to be in place by the end of 2011.

4.7 Sustainability Performance

At The Westpac Group, our sustainability strategy covers six key areas of performance to drive value for the business and its stakeholders. These focus areas address emerging material issues for the business and the associated risks and opportunities.

This section reviews our progress against these six areas of focus and some of the objectives for each.

2010 Highlights:

- The only Australian Bank in the Global 100 Most Sustainable Corporations at the 2010 World Economic Forum.
- Named as one of the World's Most Ethical Companies in 2010 by the Ethisphere Institute.
- Winner of the 2010 Money Magazine Climate Change Leadership Award.
- Maximum rating of 10.0 by Governance Metrics International achieved in September 2009, for the nineteenth consecutive assessment since February 2004.
- Recognised by the Dow Jones Sustainability Index as a leader in the global banking sector for eight consecutive years and again awarded SAM Gold Class in 2010.
- The Westpac Group and its employees contributed \$1.5 million to approximately 600 charities during the year through the Matching Gifts Program. The Group also announced a matched lending program for microfinance loans made by employees to World Education Australia.

Environment

2010 Objective	Progress
1. Climate change – transitioning to a low carbon future	
Launch carbon hedging and risk management solutions for customers	On track for product delivery for the commencement of market trading in Australia and New Zealand. Trading documentation completed and being rolled out to customers.
Engage with impacted clients	Continued engagement with customers in Australia and New Zealand who are likely to be impacted by the introduction of emissions trading and other policy measures.
Incorporate carbon considerations into credit and risk processes and sector strategies	Carbon risk has been incorporated into sector strategy and credit submission templates. Carbon risk management incorporated into specific high risk transactions.
2. Treading lightly – environmental footprint¹	
Reduce Scope 1 and 2 emissions ² by 12.5% from 2008 levels for Australia and New Zealand	Emissions decreased by 9,915 tonnes in 2009.
Reduce paper consumption by 7% from 2008 levels for Australia and New Zealand (8,791 tonnes)	Paper consumption has decreased by more than 10%.
Increased measurement of indirect emissions	Reporting of Scope 3 emissions ² expanded to include new categories, including taxis as well as indirect emissions from St.George and BankSA.

Indicator ¹	Target ¹	Latest Available ⁴	2009	Pro-Forma 2008
Total Electricity Consumption (Aust & NZ) (GJ)	693,885	375,732	793,118	793,011
Greenhouse gas emissions (Aust & NZ) (Equivalent tonnes of CO ₂) ³	165,305	92,958	187,239	188,920

¹ Objectives are for the reporting period ending 30 June 2010 in line with the requirements of the National Greenhouse and Energy Reporting Act.

² Scope 1 emissions are all direct green house gas (GHG) emissions generated by the organisation. Scope 2 emissions are GHG emissions from energy (typically electricity) purchased by the organisation. Scope 3 emissions are GHG emissions from other indirect sources (typically from purchased materials, products or services).

³ The 2009 figure includes 8,082 tonnes of CO₂ emissions associated with facilities and categories that were not included in the pro-forma 2008 reported figures that are now required following the implementation of the National Greenhouse and Energy Reporting Act.

⁴ Latest available figures are for the period 1 July 2009 to 31 December 2009 and are unaudited at the time of publication.

Social

2010 Objective	Progress
3. Going mainstream – sustainable products	
Launch an innovative savings product	In October 2009, St.George Bank and BankSA launched SENSE, a savings product with in-built tools to save and improve their customers' money management. Winner of a 2010 Canstar Cannex Innovation Excellence Award.
Launch energy efficiency products	First major bank to participate in the Federal Government's Green Loan program and a participant in the New Zealand Government's 'Warm Up New Zealand' campaign to encourage the installation of heat pumps and insulation.
4. Speaking out – in support of sustainable business practice	
Advocate for continued action on climate change	Founding partner of the Advance Green Network linking Australians around the world involved in sustainability. Events have already been held in New York and London. Released Westpac Charles Sturt University Index on the views of farmers on climate change and the impact it will have on their business.
Assist SMEs to adopt more sustainable business practices	Involved in the National SME Project and the launch of the Good Business Register for SMEs.
Promote use of Environmental, Social and Governance (ESG) factors in investment decision making	Sustainability performance integrated into the 2009 Annual Review. Hosted an analyst briefing on sustainability in the finance sector presented by the SAM Group sector analyst.
5. People and Places – social sustainability	
Roll out of local social engagement and investment model	"Westpac Local" model focuses on local community involvement through greater local accountability and deeper local engagement.
Maintain employee engagement	Employee engagement increased to 81%, up from 78% in 2008, and now equal to the Towers Perrin-ISR Global High Performing Companies norm.

Indicator	Latest Available	2009	2008
Community contributions – Australia (A\$m)	80 ⁵	80 ¹	56 ²
Employee turnover % (total)	16 ⁶	14 ³	19
Employee engagement (% employees reporting a favourable score) ⁴ ,	81	81	78
Lost Time Injury Frequency Rate (Injuries per one million hours worked)	3.3 ⁶	2.8	3.4

Governance

2010 Objective	Progress
6. Solid Foundations – governance and risk	
Develop a consistent framework for Environmental, Social and Governance (ESG) credit risk analysis across all business units	A draft framework has been developed and is currently being reviewed by key stakeholders.
Implement Sustainable Supply Chain Management across all countries and brands	The Sustainable Supply Chain Management policy applies across all countries and brands. Implemented in all Australian brands and to high spend suppliers in Pacific Banking. Detailed sustainability assessments are currently being carried out with high risk and high spend suppliers in New Zealand.

¹ Includes SGB Community contributions – unaudited figure. Includes \$48.9 million from foregone revenue for the fee free accounts for non-profit organisations and low income earners in 2009 (2008:\$36 million).

² Figures for 2008 based on Westpac stand-alone.

³ Based on a 12 month rolling average. This result includes St.George.

⁴ Annual Staff Perspectives Survey (SPS) is conducted in May each year. 2008 figure does not include St.George Bank. Source: Towers Perrin-ISR.

⁵ Data available as at 30 September 2009.

⁶ Based on a 12 month rolling average as at 31 March 2010.

4.8 St.George Merger and Integration

The merger has significantly enhanced The Westpac Group by increasing its scale, growing the customer base, and improving the Group's capacity to meet customer needs and preferences via a multi-brand strategy. In particular, the merger has led to:

- A 40% increase in customer numbers to around 10 million, along with a 40% increase in Australian distribution capacity, including more branches, more business banking centres and a significant increase in ATMs;
- An improvement in the Group's efficiency profile with the merger, leading to a sub-40% cost to income ratio from both increased scale and increased purchasing power; and
- Enhanced revenue opportunities, including the sharing of best practice and the roll out of additional banking and wealth products across the St.George network.

The development of a multi-brand strategy has been a key element of the merger, allowing The Westpac Group to meet the specific needs of a broader range of customers. As a result, the merger has seen:

- Retention of all the brands including Westpac, RAMS, BTFG, St.George, BankSA and Asgard;
- Retention of the branch and ATM networks of both major brands. Indeed, over the year, both Westpac and St.George have expanded their respective branch networks by 11 and 2 branches respectively; and
- Retained a corporate presence in Kogarah, a key corporate office of St.George.

The merger integration project remains on track. In First Half 2010, the following key integration milestones were delivered:

- Moved to a single Authorised Deposit-taking Institution (ADI) on 1 March 2010;
- Expanded products available to St.George Bank and BankSA customers, including BT Super for Life and multi-branded general insurance products;
- The successful consolidation of the Wealth contact centre operations;
- Integrated Single Group capabilities across Finance (single general ledger), Human Resources (single payroll, recruitment and people management systems) and Risk systems to enable effective governance and consolidated reporting; and
- Sharing of best practices, including enhanced customer capabilities for Call Centre and Customer Resolution and Support between brands.

In addition to the delivery of the above milestones, we continue to progress well on other key milestones, including working with APRA towards achieving Basel II Advanced Accreditation for St.George Bank for credit, market and operational risk.

Customer retention

In the merger business case, customer attrition of 4% of St.George customers was assumed. This estimate took into account the maintenance of separate brands and past merger and acquisition experience in the financial services sector. Since the merger date, there has been no net loss of St.George customers as a result of the merger.

On the contrary, since the merger, the focus on customer retention and the increased investment in the St.George brand has seen an improvement in business momentum and an increase in customer numbers.

This has significantly improved the merger benefit profile.

Customer segment	As at 31 March 2010	As at 30 Sept 2009	As at 31 March 2009
Number of customers ('000)			
St.George retail and small business	2,175	2,156	2,133
BankSA retail	450	448	447
Total	2,625	2,604	2,580
Westpac RBB	4,955	4,903	4,809
St.George wealth and insurance	180	157	128

Merger benefits

Expense synergies for the six months to 31 March 2010 reached \$142 million.

At 31 March 2010, the merger delivered a reduction of 1,488 permanent roles and contractors delivering annualised run-rate saves of \$231 million in personnel expense synergies. These savings constitute the majority of the planned cost synergies achieved since the inception of the merger.

In addition, non-personnel expense run-rate synergies of \$77 million have also been achieved from a review of our key sourcing contracts and the rationalisation of areas of duplicate expenditure.

Net expense synergies (Benefits delivered to date)				Total
\$m	Half Year March 10	Half Year Sept 09	Half Year March 09	benefits to date

			March 2010	Sept 2009
Personnel			231	182
Non-personnel			77	52
Total annualised run rate			308	234

Merger integration costs

In announcing the merger, The Westpac Group indicated that it expected to spend \$700 million in integration costs. To 31 March 2010, \$543 million or 78% of the total has been spent. \$151 million was spent in the six months to 31 March 2010. The majority of the spend has been on integration of IT platforms and product systems (\$46 million), and consolidation of Treasury, risk, finance and HR teams and systems (\$40 million). Costs to further consolidate teams (\$23 million) and other initiatives including moving to one ADI (\$23 million) and roll out of BTFG wealth capabilities to St. George (\$9 million). Integration costs are treated as a Cash Earnings adjustment. Details of the costs include:

\$m	Half Year March 10	Half Year Sept 09	Half Year March 09	Half Year Sept 08	Total to date

5.0 Divisional Results

Divisional results are presented on a management reporting basis. Internal charges and transfer pricing adjustments are included in the performance of each business reflecting the management rather than the legal structure (these results cannot be compared to results for individual legal entities). Where management reporting structures or accounting classifications have changed, comparatives have been restated and may differ from results previously reported. Results below are presented on a Cash Earnings basis and results for divisions that now include parts of the St.George business are presented on a pro-forma basis for First Half 2009.

Our internal transfer-pricing framework attributes value between divisions. Its primary attributes are:

- Treasury funding product balances are fully transfer-priced at inter-bank rates according to the tenor of the underlying transactions; and
- All overhead costs are allocated to revenue generating businesses, and capital is allocated to business groups using designated risk factors.

5.1 Westpac Retail and Business Banking

Westpac Retail and Business Banking (Westpac RBB) is responsible for sales and service for our consumer, small to medium enterprise customers and commercial customers (typically with turnover up to \$50 million) in Australia under the 'Westpac' and 'RAMS' brands. Activities are conducted through our nationwide network of branches and business banking centres, home finance managers (HFMs), specialised consumer and business relationship managers with the support of Cash Flow, Financial Markets and Wealth specialists, customer service centres, automatic teller machines (ATMs) and internet channels.

Financial Performance

First Half 2010 – First Half 2009

Features:

- Cash Earnings 12% lower from the decision to reduce all customer fees (overdrawn, missed payment fees etc) and the lagged impact of slowing economic activity leading to a rise in impairment charges
- Core earnings down 5% with strong mortgage and Term Deposit growth offset by higher funding costs, and the significant decline in customer fees

Westpac RBB delivered Cash Earnings of \$873 million, down \$117 million, or 12% compared to First Half 2009.

Solid net interest income growth of 7% over the year was driven by a 14% increase in lending which helped offset a 13 basis point fall in margins. Virtually all of the growth in lending over First Half 2010 was due to mortgages, with cards and other personal lending up marginally, and business lending 5% lower. In business lending, demand has remained low and customers have remained cautious about the operating environment and as a result have sought to reduce gearing. Through the period the relationship with a small number of larger customers were transferred to WIB contributing \$1.1 billion to the business lending decline.

Westpac RBB has largely completed the recruitment of Bank Managers, HFMs and Local Business Bankers as part of the Westpac Local strategy. The Westpac Local business model provides local Bank Managers with the authority and resources to meet the needs of their local markets. The associated increase in the size and capability of our customer facing sales force has contributed to expanding our customer reach and deepening our relationships with customers.

The success of this approach can be seen in:

- 21% growth in mortgages, equating to 1.8 times banking system growth. Mortgages originated via third parties was little changed at 41%, but trended lower through the half from peak levels of 45% in Second Half 2009;
- 11% rise in deposits, equating to 1.5 times financial system growth;
- Average products per customer increasing to 2.54, which is the highest of the major Australian banks; and
- Strong cross sell of insurance and superannuation.

Within Westpac RBB, RAMS delivered a sound performance, after taking into account the withdrawal from the broker channel in January 2010 and the tempered growth in housing following withdrawal of government stimulus packages. RAMS represented 5% of Westpac RBB mortgage growth.

Margins over the period were down 13 basis points, with much of the decline due to the mortgage portfolio where spreads eased by 12 basis points. Business spreads were 30 basis points lower. Higher funding costs were the main reason for the decline and these were only partly offset by repricing of the mortgage portfolio in December 2009. Mix impacts also had an impact on margins as portfolio growth was concentrated in lower spread products, particularly mortgages and Term Deposits.

Non-interest income was significantly lower (down 29%) over First Half 2009 due to:

- Comprehensive reductions to customer fees from an average of around \$40 to a flat fee of \$9, for both consumer and business customers, including overdrawn account fees, missed payments, and dishonoured cheques (approximately \$100 million). These changes have led to a 80% reduction in associated complaints;
- One-off income received in First Half 2009 (approximately \$130 million) from our cards rewards program related to the redemption of points into the Qantas frequent flyer program (with similar one-off in expenses);
- Lower fees from the foreign ATM charges (\$22 million); and
- Partially offsetting the reduction in fees was higher revenue from business fees for undrawn credit lines and improved credit card interchange fees.

Operating expenses were up 3% compared to First Half 2009. This modest rate of growth was due to the absence of expenses associated with the one-off redemption of credit card loyalty points (approximately \$100 million). The rise in expenses reflects:

- Salary increases for most roles from 1 January 2009 of 4% and from 1 January 2010 of 2%;
- Further investment associated with Westpac Local, including a net increase of 377 customer facing employees and specialist relationship bankers; and
- Higher project investment to increase front-line capability, including the roll-out of new telephony infrastructure across the network and the development of the sales and service desktop.

Impairment charges were \$78 million higher compared to First Half 2009 with both business and consumer impairments rising.

New individually assessed provisions increased \$45 million over the half, with most of the increase due to the economic environment. The increase in impaired assets was primarily business related, mainly in property.

Business impaired assets to total committed exposures increased from 0.42% at 31 March 2009 to 0.89% as at 31 March 2010.

New collectively assessed provisions increased \$54 million over the period. The rise was due to:

- The delayed reaction to rising unemployment over 2009 and to higher interest rates;
- Some customers that came under stress in 2009, and were provided hardship assistance, have been unable to bring their accounts into order; and
- Factor changes which increased the charge by \$10 million.

The credit quality of the consumer portfolio continues to remain sound. 90 day delinquencies in the mortgage portfolio declined 11 basis points to 0.34% at 31 March 2010. 90 day delinquencies in credit cards were up 25 basis points to 1.15% over the period. This was due to the factors indicated above. Actual losses on the mortgage portfolio were \$4 million and on the credit card portfolio were \$53 million.

First Half 2010 – Second Half 2009

Features:

- Cash Earnings down 5% with revenue impacted by a one-off decline in customer fees and higher funding costs
- Impairment charges were lower

Westpac RBB delivered Cash Earnings of \$873 million, down \$45 million, or 5% compared to Second Half 2009.

Net interest income increased 2% over the half, driven by a 6% increase in lending which helped offset an 11 basis point fall in margins.

Mortgages continued to be the driver of lending growth, with Westpac continuing to grow above banking system (1.8 times). The proportion of mortgages written via brokers also moderated over the half, from 45% to 41%.

Business lending was down 3% over the period, most of the decline was due to the transfer of the relationship with some customers (and their loan balances) to WIB.

Other personal lending, including credit cards, increased by 2% over First Half 2010.

Deposits grew by 5%, 0.6 times financial system, with Term Deposit growth a primary driver of the increase (up 25%).

Margins were down 11 basis points over the prior half as the higher funding costs from both Customer Deposits and wholesale funding were only partially recouped from increases in lending rates. Mix impacts continued to have an impact as growth in lower spread mortgages offset a decline in higher spread business lending.

Non-interest income was down 12%, with the reduction in customer fees the main contributor.

Operating expenses were up 4%, compared to Second Half 2009, with the major drivers being:

- The full period impact from the roll-out of Westpac Local initiatives; and
- Increased investment in a number of frontline projects which include telephony infrastructure and sales and services desktops.

Impairment charges fell \$25 million from Second Half 2009 to \$302 million, with the majority of the fall associated with business impairments, due to a slow down in the growth of new stressed assets.

New individually assessed provisions decreased \$31 million over the half primarily due to the change in mix as the effects of the GFC moved from the medium corporates to smaller corporates. Write-backs and recoveries were \$3 million lower than Second Half 2009.

Business impaired assets to total committed exposures increased modestly from 0.79% at 30 September 2009 to 0.89% as at 31 March 2010.

New collectively assessed provisions decreased by \$1 million over the period with a more modest deterioration in the portfolio, requiring lower new collectively assessed provisions, which was partially offset by the increase from factor changes.

5.2 St.George Bank

St.George Bank, in this section ("St.George") is responsible for sales and service for consumer, business and corporate customers in Australia under the St.George and BankSA brands.

Consumer activities are conducted through a network of branches, third party distributors, call centres, ATMs, EFTPOS terminals and internet banking services. Business and corporate customers (businesses with facilities typically up to \$150 million) are provided with a wide range of banking and financial products and services including specialist advice for Cash Flow Finance, Trade Finance, Automotive and Equipment Finance, Property Finance, Transaction Banking and Treasury Services. Sales and service activities for business and corporate customers are conducted by relationship managers via business banking centres, internet and customer service centre channels.

Financial Performance

First Half 2010 – First Half 2009

Features:

- Cash Earnings down 18%, with core earnings down 1% and higher impairment charges
- Revenue unchanged over First Half 2009 with sound mortgage and deposit growth offset by higher funding costs and the reduction in customer fees

St.George delivered Cash Earnings of \$472 million, down \$101 million, or 18% compared to First Half 2009.

Net interest income increased 5% over the year, predominantly driven by a 9% increase in lending and a 12% rise in deposits. Mortgages and other personal lending were the key drivers of the improvement up 15% and 8% respectively while business lending was lower, down 4%. This growth in the balance sheet was partly offset by a 9 basis point fall in divisional margins.

In business lending, demand remained modest, and with many businesses continuing to reduce gearing, balances were lower. The commercial property sector experienced much of the decline (down \$1.3 billion), in part due to the Group's preference to reduce its exposure to this segment. Some growth, however, was experienced in key targeted segments including wholesale trade, auto and hospitality.

Behind this growth has been St.George's unique market position, as being 'big enough small enough', which contributed to:

- 1.7 times financial system mortgage growth. Mortgages originated via third parties declined to 44%;
- 12% rise in deposits, equating to 1.6 times financial system growth; primarily driven by Term Deposits;
- Growth in customer numbers of 1.7%;
- Deeper customer relationships with the proportion of customers holding 4 products or more rising from 20% to 23%, benefiting from increased insurance cross sell, credit cards and the launch of Super for Life; and
- Net Promoter Score (NPS) which is the highest of majors and increasing its lead above the nearest major bank.

BankSA continued to deliver a strong performance with a 9% increase in Cash Earnings. BankSA has also achieved strong results across a number of key performance metrics.

St.George Bank margins over the period were down 9 basis points as higher funding costs from both higher wholesale costs and a highly competitive deposit market, were only partially offset by repricing of business lending and mortgages. The high relative growth in mortgages and Term Deposits (products with lower spreads) also led to a negative mix impact on margins.

Non-interest income was significantly lower (down 18%) over First Half 2009 due to comprehensive reductions in customer fees effective from 1 October 2009 (\$31 million) along with lower foreign ATM fees and lower card merchant income. Income associated with interest rate and foreign exchange hedging was also lower consistent with the decline in business activity and more stable markets over the half. Partly offsetting these declines was an improvement in loan fees, including fees for undrawn credit lines.

Operating expenses were up 1% compared to First Half 2009 reflecting the 4% annual salary increase for most employees and the further investment in St.George. In particular, 3 new branches were opened and the business increased its investment in projects delivering improved front line capability. Offsetting these increases was the realisation of further merger synergies of around \$7 million.

Impairment charges were \$133 million higher, compared to First Half 2009 at \$331 million, but were down from Second Half 2009 peak.

New individually assessed provisions increased \$37 million over the half, with the lagged impact of slower growth in 2009 impacting both businesses and consumers. Much of the rise was in the commercial property sector with further downgrades of some facilities from watchlist and substandard into impaired. Movements in commercial property stress have largely been due to facilities in Western Australia and South East Queensland. Write backs and recoveries were \$14 million higher than First Half 2009.

Business impaired assets to total committed exposures increased from 1.46% at 31 March 2009 to 3.05% as at 31 March 2010.

New collectively assessed provisions increased by \$109 million over the period, contributing to the rise has been an increase in hire purchase provisions along with downgrades to companies in the commercial property sector mostly from valuation adjustments.

Consumer credit quality continues to remain sound. 90 day delinquencies have declined for mortgages by 16 basis points to 0.36% at 31 March 2010, and credit card 90 day delinquencies declined by 4 basis points to 1.35% over the period. Actual losses on the mortgage portfolio were \$4 million, with a decline in the numbers of property in possession by 27 to 65. Losses on the credit card portfolio were \$22 million.

First Half 2010 – Second Half 2009

Features:

- Cash Earnings were little changed over the prior half up \$2 million, with lower revenues offset by a fall in impairment charges
 - Revenues were down 3% mostly from higher funding costs and the impact of reductions in customer fees
-

St.George delivered Cash Earnings of \$472 million, up \$2 million compared to Second Half 2009, with a fall in core earnings offset by a 16% reduction in impairment charges.

Net interest income declined \$13 million, or 1%, with higher funding costs more than offsetting the 6% growth in mortgages and 4% growth in deposits. Business lending was also lower over the period, principally from a reduction in short term bill finance as some companies continued to reduce gearing.

Non-interest income fell \$44 million, or 13%, mainly attributable to reductions in customer fees introduced in October 2009. Lower business activity also contributed to the fall in non-interest income, principally from lower financial market product sales and reduced merchant fee income.

Operating expenses were down \$3 million over the prior half, principally from the realisation of merger synergies in support areas. Merger savings allowed the division to increase its distribution presence and increase project investment.

Impairment charges fell \$65 million from Second Half 2009 to \$331 million, with most of the decrease associated with a slowing in the incidence of new stress in commercial property. Most of the increase in impaired assets (impaired assets to total committed exposures increased to 3.05% from 2.35%) has been due to the further downgrade of companies already identified as being under stress.

Consumer impairment charges were higher, reflecting delayed impact from rising unemployment in 2009, higher interest rates over the period, and a reduction in the benefits from fiscal stimulus measures.

Financial Performance

First Half 2010 – First Half 2009

Features:

- Strong operational performance with broad based improvement in customer revenue from higher margins and stronger fee income supported by modest growth in expenses
- Significant decline in impairments

Westpac Institutional Bank had a very strong start to the year, with a Cash Earnings increase of \$649 million on First Half 2009 to \$807 million. This result was well above earnings generated prior to the GFC. Lower impairment charges were the key driver of the higher result, although operating income was also up a solid 5% compared to First Half 2009.

Through the GFC, WIB was focused on fully supporting customers through the more difficult conditions. This included increased customer contact and working constructively with companies to develop and implement solutions that best suited their needs. This approach has contributed to improved customer relationships and has seen WIB extend the lead in key customer metrics including Relationship Strength¹ and Lead Bank¹. These improvements have been a major contributor to the improved results in the half.

Net interest income was up \$11 million or 1% over First Half 2009, with improved margins offsetting the reduction in lending over the year.

Through much of calendar 2009, Institutional customers were focused on reducing gearing, predominantly via equity raisings, and this led to a significant reduction in loans. From 31 March 2009 to 30 September 2009 net loans declined by just over \$7 billion and declined a further \$5 billion by 31 March 2010. The reduction in lending was particularly evident in the first quarter of the year in the commercial property, financial institutions and the industrials and materials sectors. While lending was lower, the repricing of facilities to reflect higher risk premiums led to higher lending spreads. Net interest income (and margins) also benefited from higher line fees and the early repayment of debt, which saw capitalised establishment fees (normally amortised over the life of a loan) being brought to account early.

¹ Source: Peter Lee Associates Large Corporate and Institutional Relationship Banking Survey – Australia.

Reflecting the strong relationship focus, transactional and client services had a solid performance with improved spreads contributing to a 14% rise in revenue, mostly in net interest income.

Non-interest income was a very strong \$811 million in First Half 2010, up 9% over First Half 2009. This was a particularly good performance given that First Half 2009 was also a strong performance. The Debt Markets business drove much of the performance with narrowing credit spreads, good customer flows and solid trading income.

Foreign exchange earnings were lower compared to First Half 2009 as that period significantly benefited from the extreme currency market conditions associated with the GFC, including higher volatility and wider market spreads. In First Half 2010 currency volatility reduced and competition has intensified leading to a reduction in Foreign Exchange market spreads and lower volumes. These factors contributed to the lower revenues over the half.

The Hastings business recorded much improved income in First Half 2010 assisted by a \$17 million gain on asset sales.

The Equities business also had a strong First Half 2010, with increased sales of structured products and improved margins. In First Half 2009, the Equities business incurred \$156 million in impairment charges from a small number of concentrated accounts, while in First Half 2010 there was a small write-back in provisions, with a \$10 million impairment charge benefit. As a result, Cash Earnings in the Equities business in First Half 2010 was \$43 million compared to an \$89 million loss in First Half 2009.

Expenses were up 2% over First Half 2009, principally due to increased accruals for performance related pay consistent with the improved operating results. Expense growth also benefited from the realisation of merger benefits and the effect of translating international expenses into AUD. The combination of solid revenues and low costs has led to the cost to income ratio falling to 30.1%.

The improved operating environment has contributed to a material \$834 million reduction in impairment charges over First Half 2009, to \$73 million. This reduction can be principally traced back to the following factors:

- First Half 2010 was not impacted by any large individual impairment charges, whereas First Half 2009 saw three large corporates contributing \$372 million to impairment charges;
- The improved environment has seen a reduction in corporate downgrades leading to lower individually assessed and collectively assessed charges;
- The reduction in lending has reduced associated collective provisions;
- Margin lending impairment charges were a write-back of collective provision; and
- An update of factor changes has led to an \$79 million reduction in new collectively assessed provisions.

First Half 2010 – Second Half 2009

Features:

- Cash Earnings up \$604 million, with lower impairment charges and stronger revenues
- A 21% rise in operating revenue from higher margins, strong Debt Markets income, increased line fees and the absence of any asset write-downs in the half

Cash Earnings increased significantly over the half, with core earnings up 34% (driven by very strong revenues and flat expenses) and a \$548 million reduction in impairment charges.

The 4% increase in net interest income was driven by higher margins offsetting the reduction in lending. Contributing to higher margins has been:

- Improved lending spreads as the repricing of lending for higher risk premiums continued. Most of the portfolio has now been repriced;
- Deposit spreads were higher, particularly in the transactional portfolio; and
- Higher establishment fees.

Non-interest income was particularly strong over Second Half 2009, up 49%. The key drivers of the improvement included:

- Higher fee income, principally committed but undrawn limit fees; and
- A strong Debt Markets income performance, principally related to the improvement in credit spreads, which led to a positive counterparty fair value adjustment. Foreign Exchange income was also higher after a weak performance in Second Half 2009.

Expenses were flat over Second Half 2009 from stable employee levels and holding fixed executive salaries constant. Higher accruals for performance related pay, consistent with the stronger result, was offset by favourable exchange rate translation impacts on offshore expenses.

Impairment charges were very low for the half, at \$73 million. New individually assessed provisions of \$255 million were incurred as some companies were downgraded to impaired in the half.

New collectively assessed provisions were a benefit of \$103 million, principally from a reduction in balances following equity capital raisings over the half. The lower balances had two impacts on credit provisions:

- Lower balances allowed the release of associated provisions; and
- Reduced gearing following capital raisings enabled a small number of companies to be upgraded allowing the provisioning cover to be reduced.

The update to factor changes also led to lower collective provisions.

Financial Performance

BTFG Cash Earnings increased 40% in First Half March 2010 compared to First Half 2009, with stronger investment markets and an improved Insurance result.

The improvement in investment markets, particularly equities and credit markets, added approximately \$60 million to the \$86 million lift in Cash Earnings, from higher average Funds under Management (FUM) and Funds under Administration (FUA), and increased earnings on invested capital.

The Funds Management business was the main contributor, up 37% (representing 57% of earnings), with higher fee income from increased average FUM and FUA levels, and stronger sales generated through the Advice business.

The Insurance business generated good growth, with Cash Earnings up 19% (representing 31% of the business) from solid growth in premiums and higher earnings in Lenders Mortgage Insurance.

Improved earnings on invested capital, principally from higher cash rates, increased the contribution from 'Capital and other' to \$36 million. BTFG continues to invest its capital conservatively, mainly in cash.

Funds Management Business
First Half 2010 – First Half 2009

Features:

- Cash Earnings growth of \$46 million, or 37%, driven by increased fees from higher average FUA and FUM
- Maintained Number 1 position in wealth administration platforms for both FUA balances and net flows
- Improved productivity from initiatives implemented in prior periods and from the merger with St.George

The Funds Management business delivered Cash Earnings of \$172 million, up 37% compared to First Half 2009. Stronger investment markets contributed to a solid increase in average FUM and average FUA balances compared to First Half 2009. Stronger markets added \$43 million in Cash Earnings over the year.

Net interest income was relatively flat (up 1%), principally due to an increase in private banking lending and deposits (up 6% and 7% respectively), offset by higher funding costs.

Non-interest income increased 12% over the year driven by increased management fees due to increased average FUM and FUA balances. Non-interest income also benefited from additional products included on the Wrap platform, including equities and life insurance.

Average FUM was up 12% over First Half 2009, driven by improved markets. FUM margins were relatively flat over the year as slightly higher retail margins were offset by lower margins on wholesale products.

Super for Life continued to generate very strong growth, with around 1,200 new accounts opened each week. The successful launch of Super for Life through St.George branches in January 2010 also contributed to growth.

Average FUA was up 23% over First Half 2009, due to both positive net inflows (principally on the BT Wrap platform) and a rise in markets. Partially offsetting the rise in FUA was a 6 basis points reduction in margins from changes in asset mix.

Commission expenses increased 6% over the period, a function of higher up-front commissions and an increase in sales activity as markets improved.

BTFG has been strongly focused on improving productivity over the last two years. Compared to First Half 2009 expenses in the Funds Management Business were down 2%, despite higher volumes, increased advertising and further investment in advisors during the period.

Expenses benefited from:

- More streamlined processing across our FUA platforms; and
- \$25 million in synergies associated with the St.George merger in First Half 2010.

Impairment charges were unchanged over the First Half 2009 at \$5 million, with no large new impaired assets.

First Half 2010 – Second Half 2009

Features:

- Cash Earnings up \$38 million, or 28%, driven by higher average FUM and FUA and a decline in expenses

Cash Earnings from the Funds Management business increased \$38 million, or 28% with the rebound in global investment markets increasing Cash Earnings by \$27 million.

Net interest income was down \$1 million with higher loan balances more than offset by lower margins due to higher funding costs.

Non-interest income was up \$53 million, or 9% driven by increased management fees due to increased average FUM and FUA balances. Higher fees from stronger Advice sales and life sales on Wrap also contributed.

FUA balances of \$81 billion benefited from net positive flows of \$2 billion in First Half 2010, driven by higher wrap sales as investors became more comfortable that the economic recovery could be sustained.

Movements in investment markets late in the 2009 financial year led to average FUA balances rising 12%. FUA margins were down 2 basis points on the prior half, principally from mix impacts.

Average FUM balances increased 5% and combined with slightly higher margins, up 2 basis, contributed to the improved Non-interest income. Commission expenses increased 18% over the prior half, from higher sales activity and a rise in up-front commissions.

Expenses were down \$23 million or 6% on Second Half of 2009, predominantly due to seasonal volume based expenses associated with the end of the year and lower project spending. The full period impact of St.George merger synergies also contributed to the decline.

Insurance business

First Half 2010 – First Half 2009

Features:

- Cash Earnings, up \$15 million or 19%, with 15% premium growth offsetting General Insurance claims

The insurance business delivered a solid performance over the half year with Cash Earnings up 19%. The \$15 million rise in Cash Earnings was due to improved Life insurance earnings (up \$8 million) from higher sales and the one-off settlement cost to AIA in First Half 2009, and a stronger Lenders Mortgage Insurance (LMI) result (up \$10 million), which benefited from solid mortgage growth and higher premiums.

Non-interest income increased 11% due to increased sales into the Westpac network and improved in-force premiums. Key income trends across products included:

- In-force premiums increased 10% due to solid sales (up 4%) and improved lapse rates. Growth was supported by life insurance products on the Wrap platform;
- General Insurance recorded a good improvement in gross written premiums, up 21%, driven by home and contents insurance, leveraging off the solid mortgage growth in both Westpac RBB and St.George. Claims were higher over the half, with increased core or general claims. Catastrophe claims were little changed as the cost of the Melbourne and Perth storms in March 2010 were similar to the Queensland Storms and Victorian Bushfires of early 2009; and
- LMI increased revenues over the period from the good growth in mortgage lending over 2009. This growth was partially offset by higher reinsurance costs, and the decision to fully outsource all mortgage insured loans with an LVR > 90% to a third party insurer. Loss rates were a little higher, returning closer to long run averages as interest rates have increased.

Expenses decreased \$6 million (10%) compared to First Half 2009, impacted by a one-off payment of \$10 million to AIA Australia for ending their contract in First Half of 2009.

First Half 2010 – Second Half 2009

Features:

- Cash Earnings decreased \$20 million, or 18%, primarily due to lower General Insurance and Lenders Mortgage Insurance earnings
-

Cash Earnings from the Insurance business decreased \$20 million, or 18%, due primarily to lower Cash Earnings from General Insurance (down \$11 million) and Lenders Mortgage Insurance (down \$8 million).

The major drivers of the 11% decline in net operating income included:

- Increased reinsurance costs and higher claims associated with the Melbourne and Perth storms within the General Insurance business more than offset higher earned premiums; and
- Increased reinsurance costs from the finalisation of stop loss insurance contracts in the LMI business. The decision to outsource a higher portion of LMI business also contributed to lower revenues.

Life Insurance revenues were slightly higher with higher premiums partially offset by lower commission income and increased claims.

Operating expenses were flat, with a small rise in salary costs offset by improved processing of claims in General Insurance.

5.5 New Zealand

Westpac New Zealand is responsible for sales and service of banking, wealth and insurance products for consumers and small to medium business customers in New Zealand. The division operates via an extensive network of branches and ATMs across both the North and South Islands. Banking products are provided under the Westpac brand while wealth and insurance products are provided by Westpac Life New Zealand and BT New Zealand. Institutional customers are supported by the New Zealand Institutional Bank, the results of which appear within Westpac Institutional Bank. All figures are in New Zealand dollars (NZ\$).

Financial Performance (NZ\$)

First Half 2010 – First Half 2009

Features:

- Cash Earnings down 38%, with sound loan growth offset by higher funding costs, lower fee income and increased impairment charges
- Expenses increased by only 2% despite significant investment in the front line
- Impairment charges remain elevated from weaker economic growth and improved provisioning cover

New Zealand division Cash Earnings were lower in First Half 2010, down \$77 million or 38%, compared to First Half 2009.

Net interest income declined 6% over First Half 2009 with solid growth in loans and deposits more than offset by lower margins from higher funding costs.

The New Zealand business has invested heavily in the front line by hiring more bankers and increasing training, which has been a key contributor to the growth in loans and deposits. The business is further investing in the franchise, particularly in the Auckland area, opened 5 new branches, appointing 100 additional local business managers, 20 small medium enterprise (SME) business managers, 20 agri-business managers and 10 transactional bankers. At the same time, much of the network has undertaken further training in credit risk and sales management.

There have been signs of improvement in the customer experience through process simplification and fee reductions.

The success of this investment is evidenced by:

- Reduced complaints which have been achieved through customer fee reductions and changes to the automatic payments process;
- Mortgage growth of 6%, against a system growth of 1.5% with a trend towards more floating rate in the owner-occupier segment, particularly in Auckland;
- Business lending growth of 1%, compared to the system that has been contracting; and
- Deposits grew 7% over First Half 2009. Good growth was achieved in Term Deposits although savings account balances were lower.

While these measures have been positive they are yet to be reflected in the Net Promoter Score. While the division has been able to partly reprice lending, this has been more than offset by higher funding costs leading to an 18 basis point contraction in margins compared with First Half 2009. Higher wholesale funding costs were the main contributor to the decline and is reflected in both lower consumer and business lending spreads, which were down 4 basis points and 21 basis points respectively.

Intense competition for Term Deposits has led to deposit spreads contracting 29 basis points compared to First Half 2009.

Non-interest income fell 21% compared to First Half 2009, mainly due to a \$49 million reduction in fee income from lower customer fee income (down \$30 million) following the changes to fee structures introduced in October 2009 and lower income from mortgage funds. These falls were partly offset by improved insurance income.

Despite significant investment in the front line, expenses grew by only 2%, with the increase primarily due to the investment in training and in the franchise, along with costs associated with building the new headquarters in Auckland. These expenses were partly offset by efficiencies achieved in head office expenses and redesigning core processes.

Impairment charges were 13% higher than experienced in First Half 2009 but down from the Second Half 2009 peak. The rise was driven by higher individually assessed provisions and by an update to factor changes in our provisioning models which led to a \$60 million increase in new collectively assessed provisions. Impaired assets as a percent of Total Committed Exposures (TCE) increased over the period as some facilities identified as watchlist and substandard were downgraded to impaired.

Housing and other consumer delinquencies were improved over the period.

First Half 2010 – Second Half 2009

Features:

- Cash Earnings up \$91 million with significantly lower impairment charges more than offsetting lower core earnings
- Lower revenues from lower margins, and from lower customer fees following changes in fee structures in October 2009

New Zealand division delivered Cash Earnings of \$125 million, up \$91 million from Second Half 2009, driven primarily by significantly lower impairment charges.

Net interest income was 5% lower over the prior period as higher funding costs more than offset an improvement in lending and deposit balances. Total lending was up 3% with both mortgages and business lending recording positive growth. A 15 basis point reduction in margins led to the \$28 million decline in net interest income.

Non-interest income was also lower from the first full period impact of the customer fee changes introduced in October 2009. The reduction in customer fees (account overdrawn, missed payments, dishonours etc.) of \$23 million has had an impact on revenues but has also led to a significant reduction in associated complaints, which are down by 32%. Overall non-interest income was down \$24 million or 12%.

Operating expenses were well contained (down \$5 million) over Second Half 2009, with employee expenses little changed. Lower software amortisation and improved management of equipment spending offset higher leasehold improvement expenses.

The large drop in impairment charges principally reflects the absence of two large impaired facilities totalling \$199 million incurred in Second Half 2009. Partially offsetting this were higher collectively assessed provisions associated with the factor change update.

Impaired assets to TCE were higher for the same reasons as mentioned earlier while consumer delinquencies were largely unchanged.

5.6 Pacific Banking

Pacific Banking provides banking services for retail and business customers throughout the South Pacific Island Nations. Branches, ATMs, telephone banking and internet banking channels are used to deliver our core business activities in Fiji, Papua New Guinea (PNG), Vanuatu, Cook Islands, Tonga, Solomon Islands and Samoa. Pacific Banking's financial products include personal savings, business transactional accounts, personal and business lending products, business services and a range of international products.

Total assets	2.2	2.1	2.6	5	(15)

Financial Performance

First Half 2010 – First Half 2009

Features:

- Cash Earnings fell by 51% to \$34 million, principally due to reduced foreign exchange income and adverse exchange rate translation impacts
- The Pacific Banking results have been significantly impacted when translating the local currency results into AUD. As a result, comments on performance in local currency have been included for selected items

Cash Earnings for First Half 2010 were \$34 million, down 51%, compared to First Half 2009. The lower performance continued the trend from Second Half 2009, with significantly lower foreign exchange income, and the negative impact of exchange rates on the translation of earnings (\$12 million).

Total assets decreased 15%, although lending in local currency grew 3%. Total deposits decreased 14%, although deposits grew 10% in local currency. These factors combined contributed to the 23% decline in net interest income.

The main driver of the 49% decline in non-interest income was lower foreign exchange income. In First Half 2009 the business recorded very strong revenues from strong volumes, high volatility and typically wider market spreads. In First Half 2010, these trends largely retraced with lower volumes, reduced volatility and tighter foreign exchange spreads all contributing to lower income.

Expenses decreased 13%, although expenses in local currency grew 13%. This was a result of an upgrade to the international banking platform, implementation of enhanced anti-money laundering system capability and credit assessment capability introduced in Second Half 2009.

Impairment charges were unchanged over First Half 2009 at \$4 million, with no large new impaired assets emerging over the half.

First Half 2010 – Second Half 2009

Features:

- Cash Earnings were little changed over Second Half 2009 although were up 24% in local currency
 - Lower impairment charges were the main driver of the improved performance
-

Cash Earnings increased \$1 million compared to Second Half 2009, notwithstanding that in local currency the result was up 24%.

Net interest income was down moderately (2%), but up 16% in local currency, reflecting good growth in loans (3%) and deposits (8%) being offset by currency translation impacts. Non-interest income was impacted by lower trading volumes, and the significantly lower market spreads referred to previously.

Operating expenses were higher in local currency due to continued business investment and higher personnel costs associated with annual fixed salary movement for local Pacific employees, and investment in increased capability and capacity across the Region. With a currency translation benefit, expenses improved 3% in AUD.

Impairment charges were down 79%. The prior period was particularly impacted by the downgrade in Fiji's country rating.

5.7 Group Businesses

This segment comprises:

- Group items, including earnings on surplus capital, accounting entries for certain intra-group transactions that facilitate the presentation of the performance of our operating segments (such as hedge results associated with hedging our New Zealand earnings), impact of fair valuation adjustments relating to the St.George merger, earnings from property sales and certain other head office items such as centrally raised provisions;
- Group Treasury, which is primarily focused on the management of the Group's interest rate risk and funding requirements by managing the mismatch between Group assets and liabilities. Group Treasury's earnings are primarily impacted by the hedging decisions taken on behalf of the Group to manage net interest income outcomes and assist net interest income growth; and
- Structured Finance continues to be wound down. Structured Finance transactions were typically high yielding asset transactions or liability transactions which raised low cost funds on Westpac's behalf.

Financial Performance

First Half 2010 – First Half 2009

Features:

- Increased net operating income from Group Treasury
 - No change to economic overlay impairment provision
-

Cash Earnings increased \$274 million compared to First Half 2009.

Growth in Cash Earnings was driven by increases in net operating income and reduced impairment charges. Net operating income increased following an additional \$40 million contribution from Group Treasury, increased St. George merger related fair value adjustments and the benefit of lower costs of hedging capital in offshore locations. Impairment charges were lower as there was no addition to the economic overlay impairment provision in First Half 2010 when compared to an increase of \$120 million in First Half 2009. Partially offsetting these items were higher expenses following increased project spend in relation to data centre improvements and additional spend on Group system security. Cash Earnings from the Structured Finance business declined by \$8 million as the business continues to be wound down.

First Half 2010 – Second Half 2009

Features:

- Reduced contribution from Group Treasury
 - No change to the economic overlay impairment provision
-

Cash Earnings decreased \$8 million compared to Second Half 2009.

Net operating income reduced as a result of lower contribution from Group Treasury following an exceptional performance in Second Half 2009 (\$152 million). Partially offsetting this was higher net operating income from St. George merger related fair value adjustments, which increased to \$48 million, higher returns on capital and lower costs of funds charges.

Increases in expenses were driven by the projects mentioned previously.

Group Treasury Value at Risk (VaR)

A decrease in average daily VaR from \$38.6 million for Full Year 2009 to \$29.5 million for First Half 2010 reflected broadly unchanged risk positions offset by reductions in market volatility as the impacts of extreme volatility during the GFC are being replaced by more normal periods of volatility in the VaR calculation.

6.6 Notes to First Half 2010 Reported Financial Information

Note 1. Basis of preparation of financial information

The accounting policies and methods of computation adopted in the preparation of the First Half 2010 Financial Information are the same as those in the previous financial year and corresponding interim reporting period. Where necessary, comparative figures have been adjusted to conform to changes in presentation in the current period.

The accounting policies and methods of computation adopted in the previous financial year were in accordance with the Australian equivalents to International Financial Reporting Standards, other authoritative pronouncements of the Australian Accounting Standards Board, Urgent Issues Group Interpretations and the Corporations Act. Westpac's consolidated financial statements for the previous financial year also comply with International Financial Reporting Standards and interpretations issued by the International Accounting Standards Board.

All amounts have been rounded to the nearest million dollars unless otherwise stated.

Note 2. Interest spread and margin analysis

	Half Year March 10	Half Year Sept 09	Half Year March 09
Group			
Average external interest earning assets (\$m)	531,541	505,164	476,095
Net interest income (\$m) (reported basis)	6,013	6,088	5,558
Tax equivalent gross-up ¹ (\$m)	-	22	23
Adjusted net interest income (\$m)	6,013	6,110	5,581
Interest spread	2.03%	2.20%	2.17%
Benefit of net non-interest bearing liabilities and equity	0.24%	0.21%	0.18%
Interest margin	2.27%	2.41%	2.35%

¹ The tax equivalent gross-up, relating to Structured Finance transactions was discontinued in First Half 2010 reflecting the immaterial nature of the balance as the Group continues to run-down the related assets.

Effective tax rate (including gross up and excluding life company accounting)	27.6%	56.7%	29.2%	(large)	(160bps)

¹ In accordance with the requirements of Australian Accounting Standard AASB 1038 Life Insurance Contracts, our tax expense for First Half 2010 includes a \$7 million tax credit on policyholders' investment earnings (\$11 million tax debit for Second Half 2009 and \$4 million tax credit for First Half 2009) of which \$2 million is a prima facie tax benefit, (\$3 million prima facie tax expense for Second Half 2009 and \$1 million prima facie tax benefit for First Half 2009) and the balance of \$5 million (\$8 million for Second Half 2009 and \$3 million for First Half 2009) is shown here.

² This includes the provision raised in relation to structured finance transactions.

³ The tax equivalent gross up represents the benefit in respect of certain financing transactions entered into by the Structured Finance business. The gross-up has been discontinued in First Half 2010 reflecting the immaterial nature of the balance as the Group continues to run-down the related assets.

Note 9. Dividends

	Half Year March 10	Half Year Sept 09	Half Year March 09
Ordinary dividend (cents per share)			
Interim (fully franked)	65	-	56
Final (fully franked) - determined dividend	-	60	-

	1,762	1,626	1,362
Ordinary dividend payout ratio	66.7%	137.9%	66.4%

The Group operates a DRP that is available to holders of fully paid ordinary shares who are resident in, or whose address on the register of shareholders is in Australia or New Zealand. As noted in Section 4.5, the Directors have made certain determinations in relation to the calculation of the Market Price which will apply to the DRP for the 2010 interim dividend only. Shareholders who wish to commence participation in the DRP, or to vary their current participation election, must complete and return a DRP election form to Westpac's share registry by 5.00pm (Sydney time) on 21 May 2010.

Note 10. Earnings per ordinary share

Earnings per ordinary share (cents)	97.5	95.0	43.5	43.1	84.3	81.1

¹ While the equity granted to employees remains unvested, Restricted Share Plan (RSP) treasury shares are deducted from ordinary shares on issue in arriving at the weighted average number of ordinary shares outstanding. Despite the shares being unvested, employees are entitled to dividends and voting rights on the shares. Consequently, a position for the profit is allocated to RSP treasury shares to arrive at earnings attributed to ordinary shareholders.

¹ Corporate – Typically includes exposure where the borrower has annual turnover greater than \$50 million, and other business exposures not captured under the definitions of either Business Lending or Small Business.

² Business Lending – Includes exposures where the borrower has annual turnover less than or equal to \$50 million and exposure greater than \$1 million.

³ Sovereign – Includes exposures to governments themselves and other non-commercial enterprises that are owned or controlled by them.

⁴ Bank – Includes exposures to licensed banks and their owned or controlled subsidiaries, and overseas central banks.

⁵ Small Business – Includes exposures less than or equal to \$1 million.

⁶ Specialised Lending: Property & Project Finance – Includes exposures to entities created to finance and/or operate specific assets where, apart from the income received from the assets being financed, the borrower has little or no independent capacity to repay from other activities or assets.

⁷ Securitisation – Exposures reflect Westpac's involvement in activities ranging from originator to investor and include the provision of securitisation services for clients wishing to access capital markets.

Treasury's Traded Risk and Non-Traded Interest Rate Risk

\$m	High	Low	Average
Six months ended 31 March 2010	52.3	17.4	29.5
Six months ended 30 September 2009	53.1	25.3	36.0
Six months ended 31 March 2009	59.5	29.4	41.4

¹ The daily VaR presented in Note 20 above reflects a divisional view of VaR being the VaR for WIB Markets and the VaR for Treasury's traded risk and non-traded interest rate risk. This presentation aligns with the presentation of WIB Markets and Treasury, as referred to in Sections 4.2.2 and 5.7 respectively. It varies from the presentations of VaR in Westpac's 2009 Annual Report and Australian Prudential Standard (APS) 330 Prudential Disclosure under Basel II where market risk disclosures are segregated as trading and banking book. The different treatment reflects the aggregation of Treasury's trading activities with those of WIB Markets in the trading VaR disclosure under the Basel II presentation whereas these activities are included in Treasury's traded risks and non-traded interest rate risk in the table above. VaR numbers include St.George trading and treasury positions from 18 November 2008.

² Includes Electricity Risk.

³ Includes prepayment risk and credit spread risk (exposures to movements in generic credit rating bands).

Westpac Essential Service Trust I and II and their controlled and non-controlled entities	Australia	36.8	Asset management
Westpac Staff Superannuation Plan Pty Limited	Australia	50.0	Corporate trustee

The total carrying amount of the Group's significant non-controlling shareholding was \$109 million (30 September 2009 \$179 million 31 March 2009 \$194 million).

During the six months ended 31 March 2010 the Group acquired a non-controlling interest in the following entities:

▪ Alleron Investment Management Limited	Acquired	October 2009
▪ Arkx Investment Management Pty Limited	Acquired	October 2009
▪ ATI Asset Management Limited	Acquired	October 2009
▪ Continuum Capital Management Limited	Acquired	October 2009
▪ Direct Portfolio Group Limited	Acquired	October 2009
▪ First Samuel Limited	Acquired	October 2009
▪ H3 Global Advisors Pty limited	Acquired	October 2009
▪ Helix Partners Limited	Acquired	October 2009
▪ Sapphire VIII 2005-2 Trust	Acquired	December 2009

Note 22. Other group investments (continued)

During the six months ended 31 March 2010 the Group's interest in the following investment changed:

- Rhodes Contacting Pty Limited (from 17.2% to 25.5%) February 2010

During the six months ended 31 March 2010 the Group's interest in the following investments were disposed of ("disposed") or ceased to be significant ("ceased"):

- | | | |
|--|----------|---------------|
| ▪ North Queensland Airports No. 1 (Mackay) Trust and its controlled entities | Disposed | January 2010 |
| ▪ North Queensland Airports No. 2 (Mackay) Trust and its controlled entities | Disposed | January 2010 |
| ▪ Isomer Structure Investment Vehicle I | Disposed | December 2009 |
| ▪ Resco Services Pty Limited | Ceased | February 2010 |
| ▪ St Hilliers Enhanced Property Fund No. 1 | Ceased | February 2010 |

During the six months ended 31 March 2010 the following investment changed its name:

- Electronic Transaction Services Limited to Paymark Limited.

In terms of the contribution to the results of the Group, the above investments are not material either individually or in aggregate.

During the six months ended 31 March 2010 the following controlled entities were incorporated, formed or acquired:

- | | | |
|---------------------------|--------------|------------------|
| ▪ Number 120 Limited | Incorporated | 11 February 2010 |
| ▪ Series 2009-1 WST Trust | Created | 16 December 2009 |

During the six months ended 31 March 2010 the following entities previously non-controlling became controlled entities:

- | | |
|--------------------------------------|-----------------|
| ▪ Ascalon Capital Managers Limited | 29 October 2009 |
| ▪ TPC Services Australia Pty Limited | 29 October 2009 |

During the six months ended 31 March 2010 the following controlled entities ceased to be controlled or were disposed of:

- | | | |
|---|--------------|------------------|
| ▪ 1925 House Limited | Deregistered | 16 December 2009 |
| ▪ 1925 (Insurance Premium Funding) Pty Limited | Deregistered | 15 March 2010 |

Note 24. Contingent liabilities
Litigation

Contingent liabilities exist in respect of actual and potential claims and proceedings. An assessment of the Group's likely loss has been made on a case-by-case basis for the purpose of the financial statements and specific provisions have been made where appropriate.

On 23 December 2009, Westpac reached a settlement with the New Zealand Commissioner of Inland Revenue (CIR) of the previously reported proceedings relating to nine structured finance transactions undertaken between 1998 and 2002. Under the settlement, Westpac agreed to pay the CIR 80% of the full amount of primary tax and interest with no imposition of penalties. All proceedings have been discontinued and the other terms of the settlement are subject to confidentiality.

Westpac provided in full for the primary tax and interest claimed by the CIR as part of its 2009 result, and consequently there has been a write-back through income tax expense in the half year ended 31 March 2010.

Westpac is one of 20 defendant banks named in proceedings concerning the Bell Group of companies. The proceedings were brought by the liquidators of several Bell Group companies who challenged the defendant banks' entitlement to receive the proceeds of realisation of Bell Group assets in the early 1990s. Judgment was delivered on 28 October 2008 and final orders were handed down on 30 April 2009. Westpac, along with the other defendant banks, was found liable to repay its share of the monies received from the Bell Group plus interest. Westpac is entitled to prove in the liquidation of the Bell Group but the amount of its recovery, although anticipated to be considerable, is uncertain at this stage. Before allowance is made for recoveries of money in the liquidation, Westpac's liability is approximately \$188 million after taking into account its arrangements with the other banks. The banks have appealed the decision. No further information is disclosed due to the sensitive nature of this matter.

Note 25. Events subsequent to balance date

No matter or circumstance has arisen since the half year ended 31 March 2010 which is not otherwise dealt with in this report, that has significantly affected or may significantly affect the operations of the Group, the results of its operations or the state of affairs of the Group in subsequent periods.

Note 26. Merger with St.George Bank Limited

Details of the purchase consideration are set out below:¹

\$m	
Fair value of 743 million Westpac ordinary shares issued in exchange for St.George ordinary shares ¹	12,116
Fair value of Westpac restricted and unrestricted shares issued to St.George employees in exchange for existing share based instruments held by them	4
Direct costs relating to the merger	45
Total purchase consideration	12,165

¹ Excluding the fair value of \$3 million of shares issued to an employee share trust controlled by St.George.

Note 26. Merger with St.George Bank Limited (continued)

¹ Amounts presented in the table above differ to the 31 March 2009 Interim Results as the disclosure at that time was provisional.

² In addition to the fair value of St.George loan capital, the recognised value on acquisition also includes the reclassification of St.George SAINTS (\$350 million) and SPS (\$150 million) hybrid instruments that were previously included as part of St.George's shareholders' equity.

6.7 Statement in Relation to the Review of the Financial Statements

PricewaterhouseCoopers has reviewed the financial statements contained within the Westpac 2010 Interim Financial Report and has issued an unqualified review report. A copy of their report is available with the Interim Financial Report. This Interim Results Announcement has not been subject to review by PricewaterhouseCoopers. The preceding financial information contained in Section 6 "First Half 2010 Reported Financial Information" includes financial information extracted from the reviewed financial statements together with financial information that has not been reviewed.

Dated at Sydney this 5th day of May 2010 for and on behalf of the Board.

Rebecca Farrell
Company Secretary

7.1 First Half 2009 Pro-Forma Financial Information

Note 1	Basis of preparation of financial information	119
Note 2	Pro-forma interest spread and margin analysis	121
Note 3	Pro-forma average balance sheet and interest rates	122
Note 4	Pro-forma net interest income (Cash Earnings basis)	125
Note 5	Pro-forma non-interest income (Cash Earnings basis)	126
Note 6	Pro-forma expense analysis (Cash Earnings basis)	127
Note 7	Pro-forma earnings per share	128
Note 8	Pro-forma provisions for impairment charges	129
Note 9	Pro-forma movement in gross impaired assets	130

Note 1. Basis of preparation of financial information

(i) General

On 1 December 2008, Westpac Banking Corporation (“Westpac”) completed its merger with St.George Bank Limited (“St.George”) by way of a scheme of arrangement (“the merger”). This merger was approved by holders of St.George ordinary shares on 13 November 2008 and subsequently approved by the Federal Court of Australia on 17 November 2008. For consolidation purposes, the transaction was effective from close of business on 17 November 2008.

To provide greater clarity of The Westpac Group’s performance compared with prior periods “Pro-forma” results have been prepared in addition to our statutory disclosures. The following terms are used to describe the respective information throughout this document:

- “Reported results” refers to information prepared on the same basis as the Interim Financial Report of The Westpac Group for the half years ended 31 March 2010 and 31 March 2009, as well as the Full Year Financial Report for the full year ended 30 September 2009, which incorporate the results of St.George Bank Limited and its subsidiaries from, and including, 18 November 2008; and
- “Pro-forma results”¹ were prepared assuming that the merger was completed on 1 October 2008 and are based on aggregating Westpac and St.George’s financial results from this date. Pro-forma results are presented to facilitate a more meaningful comparison of The Westpac Group’s performance for the six months ended 31 March 2010 (“First Half 2010”) compared with the six months ended 31 March 2009 (“First Half 2009”). The pro-forma income statement is presented on a Cash Earnings basis. The commentary on the performance of the Group in Section 4, and the performance of the divisions in Section 5, is based on the pro-forma results.

Pro-forma results for First Half 2010 and Second Half 2009 are not required because the two entities were merged for the entire period. Similarly, balance sheets as at 31 March 2010, as at 30 September 2009 and as at 31 March 2009 are not required on a pro-forma basis.

(ii) Basis of preparation of pro-forma financial results

The pro-forma results for the half year ended 31 March 2009, have been prepared on the basis described below.

Income statements and associated notes to the income statement

First Half 2009 Group Cash Earnings and divisional Cash Earnings

The pro-forma Group income statement and divisional income statements for First Half 2009 are presented on the basis that the merger between Westpac and St. George was completed on 1 October 2008.

In calculating Cash Earnings for First Half 2009, the difference in approach to prior periods is a consequence of the merger with St.George. Significant items associated with the merger have been excluded from Cash Earnings, namely the gain on deposits and short term wholesale funding and the amortisation of intangible items. Fair value items that are not material in this result have been included from 18 November 2008.

Pro-forma combined notes associated with the income statements, including net interest income, non-interest income and operating expenses, have been prepared on the basis set out above. These notes are included in Section 7.

A reconciliation between the reported income statement and pro-forma Cash Earnings for First Half 2009 is shown in Section 10.4.

¹ Important information on the basis of preparation of pro-forma results – All references made to pro-forma results in this document relate to the six months ended 31 March 2009 (First Half 2009). Pro-forma results were prepared in 2009 and have remained unchanged since that time. These were prepared on the assumption that the merger was completed on 1 October 2008 with the exception of the impact of the allocation of purchase consideration, associated fair value adjustments and accounting policy alignments, which were only incorporated from 17 November 2008 being the accounting consolidation date. The pro-forma results are unaudited. They are provided for illustrative information purposes to facilitate comparisons of the six months ended 31 March 2010 (First Half 2010) with First Half 2009 and are not meant to be indicative of the results of operations that would have been achieved had the merger actually taken place at the date indicated. For additional information please refer to the 2009 Full Year Profit Announcement and Section 7.1.

The pro-forma results should be read in conjunction with:

- The reported results in this announcement; and
- The historical consolidated interim financial statements of Westpac as at and for the half year ended 31 March 2009.

Future operating results may differ materially from the unaudited pro-forma results presented in this announcement due to various factors including those described under “Disclosure Regarding Forward-Looking Statements” in Section 8.2 and under the sections captioned “Principal Risks and uncertainties” in Westpac’s Half Year 2010 Interim Financial Report and “Risk Factors” in Westpac’s 2009 Annual Report released in November 2009.

Note 1. Basis of preparation of financial information (continued)**Average balance sheet**

- First Half 2009 average balance sheet

The pro-forma average balance sheet has been prepared using the same principles as the pro-forma income statement with the exception that the average balance sheet methodology for St.George has been changed, where applicable, from a monthly average approach to a daily average approach. The Pro-forma average balance sheet is shown in Section 7.1 Note 3.

Earnings per share

Pro-forma Cash Earnings per share for First Half 2009, is calculated based on the pro-forma Cash Earnings result and a pro-forma weighted average number of shares. The pro-forma weighted average number of shares assumes the 742.6 million new Westpac ordinary shares issued in relation to the merger were issued on 1 October 2008.

Key metrics

Where it is considered appropriate and meaningful, key metrics for First Half 2009 have been prepared on a pro-forma basis to provide an indication of what these key metrics may have been if the merger of Westpac and St.George had occurred on 1 October 2008.

Pro-forma key metrics included in this document (refer Section 3) include:

- Market share and system multiples;
- Product spreads;
- Movements in impaired assets;
- Loan and deposit growth; and
- Funds under management ("FUM") and Funds under administration ("FUA").

¹ Capital benefit represents the notional revenue earned on capital allocated to divisions under Westpac's economic capital framework.

² Westpac has entered into various tax effective financing transactions that derive income that is subject to a reduced rate of income tax. The impact of this is reflected in lower income tax expense and interest income. In order to provide improved comparability, this income is presented on a tax equivalent basis.

8.2 Disclosure Regarding Forward-Looking Statements

This Interim Results Announcement contains statements that constitute 'forward-looking statements' within the meaning of Section 21E of the US Securities Exchange Act of 1934.

Forward-looking statements are statements about matters that are not historical facts. Forward-looking statements appear in a number of places in this Interim Results Announcement and include statements regarding our intent, belief or current expectations with respect to our business and operations, market conditions, results of operations and financial condition, including, without limitation, future loan loss provisions and financial support to certain borrowers. This Interim Results Announcement uses words such as 'will', 'may', 'expect', 'intend', 'seek', 'would', 'should', 'could', 'continue', 'plan', 'estimate', 'anticipate', 'believe', 'probability', 'risk', or other similar words to identify forward-looking statements. These forward-looking statements reflect our current views with respect to future events and are subject to change, certain risks, uncertainties and assumptions which are, in many instances, beyond our control and have been made based upon management's expectations and beliefs concerning future developments and their potential effect upon us. There can be no assurance that future developments will be in accordance with our expectations or that the effect of future developments on us will be those anticipated. Actual results may vary materially from those we expect, depending on the outcome of various factors, including, but are not limited to:

- continuing impacts of the global financial crisis, including adverse and volatile conditions in funding, equity and asset markets;
- our ability to successfully integrate St.George into our operations, including our ability to realise anticipated synergies and the costs of achieving those synergies;
- changes to our credit ratings;
- inflation, interest rate, exchange rate, market and monetary fluctuations;
- market liquidity and investor confidence;
- the effect of, and changes in, laws, regulations, taxation or accounting standards or practices and government policy, particularly changes to liquidity and capital requirements arising in response to the global financial crisis;
- changes in consumer spending, saving and borrowing habits in Australia, New Zealand and in other countries in which Westpac conducts its operations;
- the effects of competition in the geographic and business areas in which Westpac conducts its operations;
- the ability to maintain or to increase market share and control expenses;
- the timely development of and acceptance of new products and services and the perceived overall value of these products and services by users;
- technological changes and risks associated with changes to our technology systems;
- demographic changes and changes in political, social or economic conditions in any of the major markets in which Westpac operates;
- stability of Australian and international financial systems and disruptions to financial markets and any losses Westpac may experience as a result;
- our ability to complete, integrate or process acquisitions and dispositions; and
- various other factors beyond Westpac's control.

The above list is not exhaustive. For certain other factors that may impact on forward-looking statements made by us, refer to the section on 'Principal risks and uncertainties' in Westpac's 2010 Interim Financial Report. When relying on forward-looking statements to make decisions with respect to us, investors and others should carefully consider the foregoing factors and other uncertainties and events.

Westpac is under no obligation, and does not intend, to update any forward-looking statements contained in this Interim Results Announcement, whether as a result of new information, future events or otherwise, after the date of this Interim Results Announcement.

8.3 Financial Calendar

Westpac shares are listed on the securities exchanges in Australia (ASX) and New Zealand and as American Depositary Receipts in New York. Westpac Stapled Preferred Securities (Westpac SPS and Westpac SPS II) are listed on the ASX.

Important dates for shareholders to note over the following months are:

Ex-dividend date for interim dividend	17 May 2010
Record date for interim dividend (Sydney) ¹	21 May 2010
Record date for interim dividend (New York) ²	20 May 2010
Interim dividend payable	2 July 2010
Financial year end	30 September 2010
Final results and ordinary share dividend announcement ³	3 November 2010
Ex-dividend date for final dividend ³	8 November 2010
Record date for final dividend (Sydney) ^{1,3}	12 November 2010
Record date for final dividend (New York) ^{2,3}	11 November 2010
Annual General Meeting ⁴	15 December 2010
Final dividend payable ³	20 December 2010

Important dates for Westpac SPS and Westpac SPS II investors to note over the following months are:

Record date for June quarter distribution	23 June 2010
Payment date for June quarter distribution	30 June 2010
Record date for September quarter distribution	23 September 2010
Payment date for September quarter distribution	30 September 2010
Record date for December quarter distribution	24 December 2010
Payment date for December quarter distribution	31 December 2010

¹ New Zealand earnings are presented in Australian dollars (A\$), converted at the actual average A\$/NZ\$ exchange rate for First Half 2009 (1.2050).

² "Group Businesses" includes the following amounts associated with the requirements of AASB Life Insurance business (AASB 1038):

- i) Non-interest income \$4 million credit
- ii) Tax expense \$4 million debit

³ Amortisation of intangible assets reflects the amortisation of St. George intangible assets including the core deposit intangible and credit card and financial planner relationships.

⁴ Short-term wholesale funding and deposits is the unwind of the merger accounting adjustments associated with the fair valuing of St. George short-term wholesale funding and deposits at 17 November 2008, the date of the merger for consolidation purposes.

⁵ Significant items concerning a provision with respect to long standing legal proceedings where a judgment was received during Full Year 2009.

9.2 New Zealand Division Performance (A\$ Equivalent to Section 5.5)

New Zealand operations provide banking and wealth management products and services to New Zealand consumer and business customers. The New Zealand wealth business includes New Zealand Life Company and BT New Zealand. The results do not include the earnings of our New Zealand Institutional Bank. Results for First Half 2010, Second Half 2009 and First Half 2009 have been converted into Australian dollars (A\$) at the actual average exchange rates 1.2619, 1.2482 and 1.2050 for the respective periods.

Cash Earnings Adjustments

(1) *Policyholder tax recoveries*

The Life Insurance standard AASB 1038 requires the grossing up of tax expense and income for the tax on earnings applicable to holders of our life policies (policy holders tax recoveries). We reverse the impact of this gross up to provide comparability across reporting periods.

(2) *Hybrid revaluations*

(a) *TPS revaluations*

Adjustment for economic hedges, including associated tax effects impacting the Foreign Currency Translation Reserve, relating to hybrid instruments classified as non-controlling interests. The hybrid instrument is not fair valued, however, the hedge is fair valued and therefore there is a mismatch in the timing of income recognition in the statutory results. The mismatch is added back in deriving Cash Earnings as it does not affect the Group's profits over time.

(3) *Treasury shares*

Under A-IFRS, Westpac shares held by the Group in the managed funds and life business are deemed to be Treasury shares and the results of holding these shares are not permitted to be recognised as income. In deriving Cash Earnings, these results are included to ensure there is no asymmetrical impact on the Group's profits because the Treasury shares support policyholder liabilities and equity derivative transactions which are re-valued in deriving income.

(4) *Fair value gain/(loss) on other economic hedges (which do not qualify for hedge accounting under AIFRS) comprises:*

- The unrealised fair value gain/(loss) on foreign exchange hedges of future New Zealand earnings impacting non-interest income is reversed in deriving Cash Earnings in the current period as they may potentially create a material timing difference on reported earnings but do not affect the Group's profits over the life of the hedge;
- The unrealised fair value gain/(loss) on foreign exchange hedges of fees payable for the use of the government guarantee on foreign denominated wholesale funding is reversed in deriving Cash Earnings in the current period as they may potentially create a material timing difference on reported earnings but do not affect the Group's profits over the life of the hedge; and
- The unrealised fair value gains/(losses) on cross currency swaps hedging accrual accounted term funding transactions are reversed in deriving Cash Earnings in the current period as they may potentially create a material timing difference on reported earnings but do not affect the Group's profits over the life of the hedge.

(5) *Ineffective hedges*

The gain/loss on ineffective hedges is reversed in deriving Cash Earnings for the period because the gain or loss arising from the fair value movement in these hedges reverses over time and does not affect the Group's profits over time;

(6) *Amortisation of intangible assets*

The merger with St.George resulted in the recognition of core deposits intangibles and relationships intangible assets that will be amortised over their useful lives ranging between 5 and 9 years. The amortisation of intangible assets (excluding software) is a Cash Earnings adjustment because it is a non-cash flow item and does not affect cash distributions available to shareholders.

(7) *Significant Items:*

As part of the merger proposal with St.George, we announced to the market the level of transaction and integration expenses expected to be incurred over a three year period. As these expenses are incurred they are being treated as Cash Earnings adjustments as they do not impact the earnings we expect St.George to generate following the integration period;

In Second Half 2009, the Group increased tax provisioning by \$703 million with respect to New Zealand structured finance transactions entered into between 1998 and 2002. The increase in the provision followed the High Court in New Zealand finding in favour of the New Zealand Commissioner of Inland Revenue (CIR) in proceedings where Westpac challenged amended tax assessments in relation to these transactions. Due to the significant size and historical nature of the issue, it has been treated as a Cash Earnings adjustment. In First Half 2010, the Group reached a settlement with the CIR by agreeing to pay 80% of the full amount of primary tax and interest. The reversal of tax provision of \$106 million in First Half 2010 has also been treated as a Cash Earnings adjustment.

The deposit and short-term wholesale funding fair value adjustment associated with the accounting for the merger with St. George was fully amortised during Full Year 2009 reflecting the contractual maturity of the deposits and borrowings and increased net interest income by \$55 million (\$38 million after tax) in Second Half 2009 and \$168 million (\$118 million after tax) in First Half 2009. Due to the significant size and short-term nature of this adjustment, it has been treated as a Cash Earnings adjustment; and

The Group recognised a provision of \$121 million (\$85 million after tax) with respect to long-standing legal proceedings, where a judgment was received during First Half 2009 with subsequent clarification of the judgement received during Second Half 2009. This was treated as a Cash Earnings adjustment due to its size and historical nature of the proceedings.

10.4 Reconciliation of First Half 2009 Pro-Forma Group Cash Earnings

The following tables reconciles First Half 2009 Cash Earnings between Westpac Group pro-forma Cash Earnings (including St.George results from 1 October 2008) and the Westpac Group adjusted Cash Earnings that only includes St.George earnings from 18 November 2008, following the merger.

	Cash Earnings reconciliation		
	Including St.George from 18 November 2008	St.George Cash Earnings from 1 October 2008 to 17 November 2008	Pro forma Cash Earnings Half Year March 2009
\$m			
Net interest income	5,390	288	5,678
Non-interest income	2,427	202	2,629

Net profit	2,173	163	2,336
Net profit attributable to non-controlling interests	(41)	-	(41)
Cash Earnings	2,132	163	2,295

11.0 Economic Profit

Group economic profit for First Half 2010 and Second Half 2009 is defined as Cash Earnings less a capital charge calculated at 11% of average ordinary equity plus a value on franking credits².

Divisional economic profit for First Half 2010 and Second Half 2009 is defined as Cash Earnings less a capital charge calculated at 11% on allocated capital plus 70% of the value of Australian tax paid. Divisional economic profit for First Half 2009 is defined as pro forma Cash Earnings less a capital charge calculated at 11% on allocated capital plus 70% of the value of Australian tax paid. The measure of capital², differs between the Group and that used by divisions.

Economic profit is used as a key measure of our financial performance because it focuses on shareholder value by requiring a return in excess of a risk-adjusted cost of capital.

First Half 2010 \$m	Group	Westpac	St.George Bank	Westpac	BT	New Zealand ¹	Pacific Banking

¹ In A\$ equivalents

² The Group economic profit methodology was revised during Second Half 2009. This change aligned internal measure of economic profit such that the franking benefit is calculated as 70% of the Group's Australian tax expense. Prior to this change the franking benefit was calculated as 70% of the estimated value of franking credits distributed to shareholders via ordinary dividends. The Group's economic profit for First Half 2009 was not revised.

12. Glossary

Earnings	Cash Earnings	Net profit attributable to equity holders adjusted for the impact of the economic hedges related to TPS, other significant items, earnings from Treasury shares, gains/losses on ineffective hedges, the impact of unrealised New Zealand earnings hedges gains/losses, and the impact of integration costs and the amortisation of certain intangibles in relation to the merger with St.George.
	Core earnings	Core earnings is operating profit, before income tax and impairment charges.
Shareholder Value	Earnings per ordinary share	Net profit attributable to the owners of WBC divided by the weighted average ordinary shares (statutory basis).
	Cash Earnings per ordinary share	Cash Earnings divided by the weighted average ordinary shares (Cash Earnings basis).
	Weighted average ordinary shares (Cash Earnings)	Weighted average number of fully paid ordinary shares listed on the ASX for the relevant period.
	Weighted average ordinary shares (statutory)	Weighted average number of fully paid ordinary shares listed on the ASX for the relevant period less Westpac shares held by the Group ('Treasury shares').
	Fully franked dividends per ordinary shares (cents)	Dividends paid out of retained profits which carry a credit for Australian company income tax paid by Westpac.
	Dividend payout ratio – net profit	Ordinary dividend per share divided by net profit per share attributable to the owners of WBC.
	Dividend payout ratio – Cash Earnings	Ordinary dividend divided by Cash Earnings.
	Return on equity (ROE)	Net profit attributable to the owners of WBC divided by average ordinary equity.
	Cash ROE	Cash Earnings divided by average ordinary equity.
	Cash Earnings to average tangible equity	Cash Earnings divided by average tangible ordinary equity.
	Economic profit – Group (First Half 2010 and Second Half 2009)	Cash Earnings less a capital charge calculated at 11% of average ordinary equity plus a value on franking credits calculated as 70% of the Group's Australian tax expense.
	Economic profit – Group (First Half 2009)	Cash Earnings less a capital charge calculated at 11% of average ordinary equity plus 70% of the estimated value of franking credits paid to shareholders.
	Economic Profit – Divisions	Cash Earnings less a capital charge calculated at 11% of allocated capital plus 70% of the value of Australian tax paid.
Productivity and efficiency	Average ordinary equity	Average total equity less average non-controlling interests.
	Average tangible ordinary equity	Average ordinary equity less average goodwill and other intangible assets (excluding capitalised software).
	Operating expenses	Operating expenses do not include impairment losses on loans.
	Expense to income ratio	Operating expenses divided by net operating income.
	Total banking group expense to income ratio	Total banking operating expenses divided by total banking operating revenue. Total banking business includes Westpac RBB, St.George Bank, WIB including Premium Business Group (excluding margin lending, Broking and PPM), Private Bank (part of BTFG), New Zealand banking operations, Pacific Bank and the Group Businesses.
Full-time equivalent employees (FTE)	A calculation based on the number of hours worked by full and part-time employees as part of their normal duties. For example, the full-time equivalent of one FTE is 76 hours paid work per fortnight.	

Business Performance	Net Interest Spread	The difference between the average yield on all interest bearing assets and the average rate paid on interest bearing liabilities.
	Net interest margin	The net interest spread plus the benefit of net non-interest bearing liabilities and equity.
	Average interest earning assets	The average balance of assets held by the Group that generate interest income. Where possible, daily balances are used to calculate the average balance for the period.
	Average interest bearing liabilities	The average balance of liabilities owed by the Group that incur an interest expense. Where possible, daily balances are used to calculate the average balance for the period.
	Divisional Margin	Net interest income (excluding capital benefit) for a division as a percentage of the average interest earning assets for that division.
Capital Adequacy	Total capital ratio	Total regulatory capital as defined by APRA divided by risk weighted assets.
	Tier 1 capital ratio	Total Tier 1 capital as defined by APRA divided by risk weighted assets.
	Risk Weighted Assets (RWA)	Assets (both on and off-balance sheet) of Westpac are assigned within a certain category, amounts included in these categories are multiplied by a risk weighting, and with the resulting weighted values added together to arrive at total risk weighted assets.
	Credit Risk Weighted Assets	Credit risk weighted assets represent risk weighted assets (on-balance sheet and off-balance sheet) that relate to credit exposures and therefore exclude equity risk, market risk, operational risk, interest rate risk in the banking book and other assets. Note 19 in Section 6 provides a breakdown of risk weighted assets between credit risk weighted assets and other risk weighted assets.
Asset quality	Individually Assessed Provisions (IAPs)	Provisions raised for losses that have already been incurred on loans that are known to be impaired and are individually significant. The estimated losses on these impaired loans will be based on expected future cash flows discounted to their present value and as this discount unwinds, interest will be recognised in the statement of financial performance.
	Collectively Assessed Provisions (CAPs)	Loans not found to be individually impaired or significant will be collectively assessed in pools of similar assets with similar risk characteristics. The size of the provision is an estimate of the losses already incurred and will be estimated on the basis of historical loss experience for assets with credit characteristics similar to those in the collective pool. The historical loss experience will be adjusted based on current observable data.
	Impaired assets	<p>Includes exposures that have deteriorated to the point where full collection of interest and principal is in doubt, based on a conservative assessment of the customer's outlook, cashflow, and the net realisation of value of assets to which recourse is held:</p> <ul style="list-style-type: none"> ▪ facilities 90 days or more past due, and not well secured – exposures where contractual payments are 90 or more days in arrears and the net realisable value of assets to which recourse is held may not be sufficient to allow full collection of interest and principal, including overdrafts or other revolving facilities that remain continuously outside approved limits by material amounts for 90 or more calendar days; ▪ non-accrual assets – exposures with individually assessed impairment provisions held against them, excluding restructured loans; ▪ restructured assets – exposures where the original contractual terms have been formally modified to provide for concessions of interest or principal for reasons related to the financial difficulties of the customer; ▪ other assets acquired through security enforcement (includes other real estate owned) – includes the value of any other assets acquired as full or partial settlement of outstanding obligations through the enforcement of security arrangements; and ▪ any other assets where the full collection of interest and principal is in doubt.

Asset quality (cont'd)	90 days past due – well secured	<p>Includes facilities where:</p> <ul style="list-style-type: none"> ▪ contractual payments of interest and/or principal are 90 or more calendar days overdue, including overdrafts or other revolving facilities that remain continuously outside approved limits by material amounts for 90 or more calendar days; or ▪ an order has been sought for the customer's bankruptcy or similar legal action has been instituted which may avoid or delay repayment of its credit obligations; and ▪ the estimated net realisable value of assets/security to which Westpac has recourse is sufficient to cover repayment of all principal and interest, and interest is being taken to profit on an accrual basis. <p>These facilities, while in default, are not treated as impaired for accounting purposes.</p>
	Watchlist and Substandard	Loan facilities where customers are experiencing operating weakness and financial difficulty but are not expected to incur loss of interest or principal.
	Stressed loans	Stressed loans are Watchlist and Substandard, 90 days past due well secured and impaired assets.
	Total Committed Exposure (TCE)	Total Committed Exposure (TCE) represents the sum of the committed portion of direct lending (including funds placement overall and deposits placed), contingent and pre-settlement risk plus the committed portion of secondary market trading and under-writing risk.
Other	Accounting reclassifications	Adjustments made for accounting treatments that have the effect of grossing up the income statement (primarily between income and tax expense/profits attributable to non-controlling interests). Key reclassifications include gross ups for policyholder tax recoveries and the impact of Treasury shares. These adjustments have no impact on Cash Earnings.
	Net Promoter Score (NPS) ¹	Refers to an external measure of customer advocacy which looks at how willing our customers are to recommend Westpac to their family and friends.

¹ Net Promoter Scoresm and NPSsm is a service mark of Bain and Company Inc, Satmetrix Systems Inc. and Mr Frederick Reichheld.
