# FULL YEAR 2012 FINANCIAL RESULT

# Gail Kelly Chief Executive Officer

**CASH EARNINGS BASIS (UNLESS OTHERWISE STATED)** 

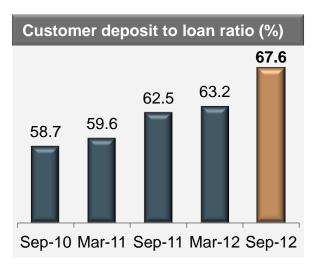

#### A strong 2012 result

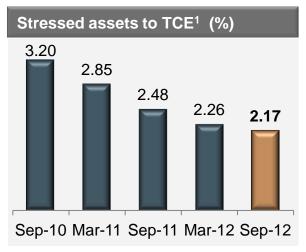

- Strengthened balance sheet across all dimensions capital, funding, liquidity and asset quality
- Excellent portfolio of businesses, all with good momentum and stronger financial and non-financial metrics
- Productivity contributing to improved efficiency while supporting targeted investment
- Strategy is delivering and being well executed with a clear forward agenda

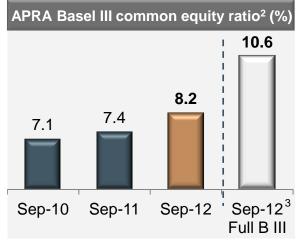

#### A strong company

1 TCE is Total Committed Exposure. 2 All figures prior to Sep-12 are pro forma estimates. 3 Common equity ratio on a fully harmonised Basel III basis

#### Balanced performance<sup>1</sup> across all dimensions

#### Strong growth in targeted areas

- Customer deposits up 12%
- Trade finance up 32%
- No.1 in platform flows<sup>2</sup>
- Wealth penetration up 152bps<sup>3</sup>

#### Growth

Investment driven

- Cash ROE at 15.5%
  - Customer return on credit RWA up 8bps to 4.09%

#### Return

Maintain discipline

- Strong management of margins, down 5bps
  - Dividends up 6%

- \$238m in expense savings
- Expense to income ratio down to 40.8%
- Revenue per FTE up 10%
- SIPs 70% complete

#### **Productivity**

Sector leading

#### Strength

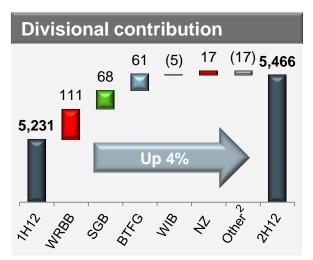

A strong company

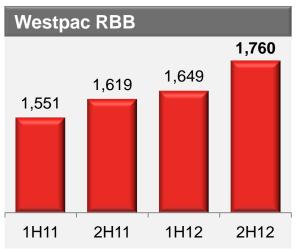

- Stable funding ratio up 6 percentage points
- Capital higher and within preferred range
- Asset quality improved, provisioning leads sector

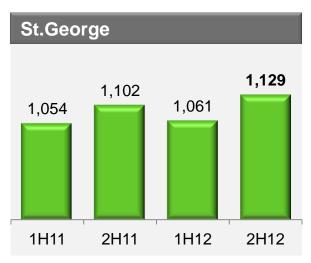

1. All metrics on this page refer to performance of FY12 compared to FY11. 2 Plan for Life, June 2012, All Master Funds Admin. 3 Refer to slide 119 for Wealth penetration metrics provider details

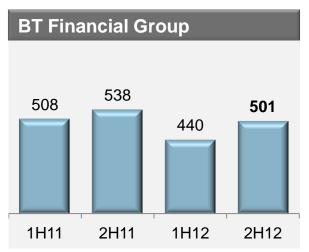

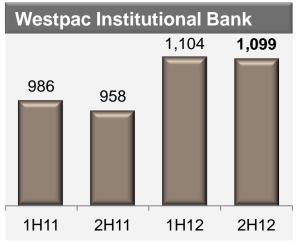

#### Good momentum across divisions (core earnings<sup>1</sup> \$m)

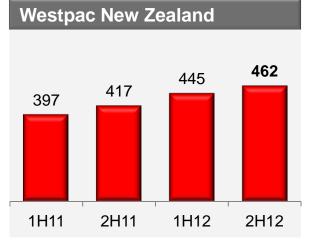

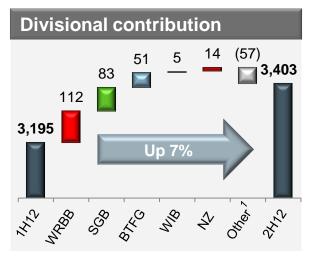

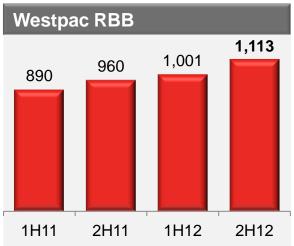

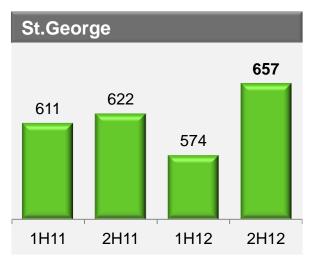

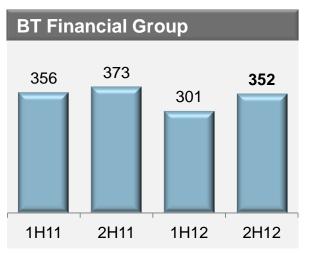

<sup>1</sup> Core earnings is operating profit before income tax and impairment charges. 2 Other includes Pacific Bank and Group Businesses.

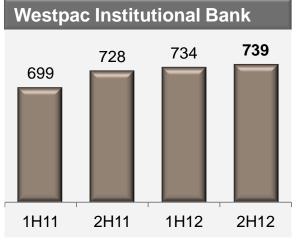

#### Strong earnings growth up 7% (cash earnings \$m)

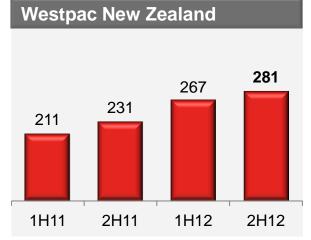

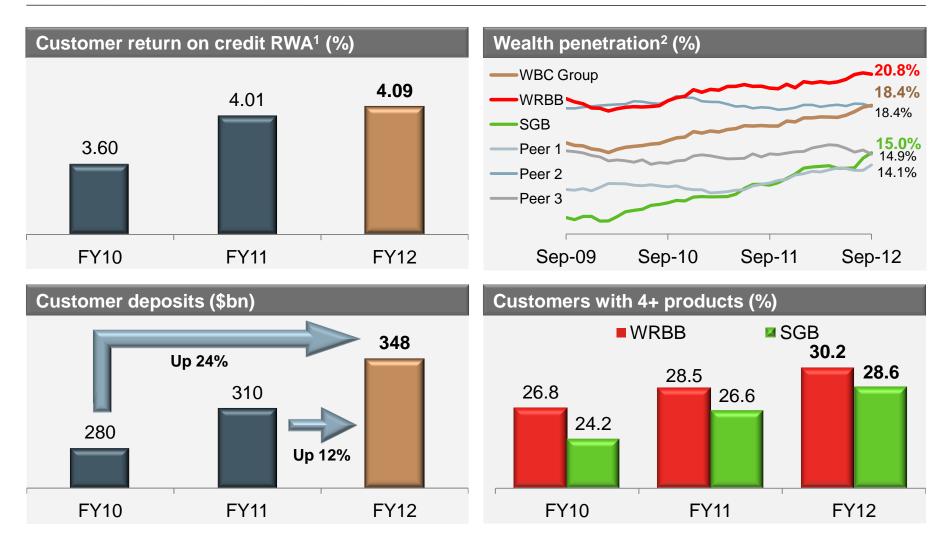

<sup>1</sup> Other includes Pacific Bank and Group Businesses.

#### Deeper customer relationships

<sup>1</sup> Customer return on credit RWA calculated as operating income less Treasury and Markets Income less operating expenses, divided by average credit risk weighted assets. 2 Refer to slide 119 for Wealth penetration metrics provider details.

#### Productivity delivering for shareholders

# Efficiency supporting investment

\$238m expense savings in FY12

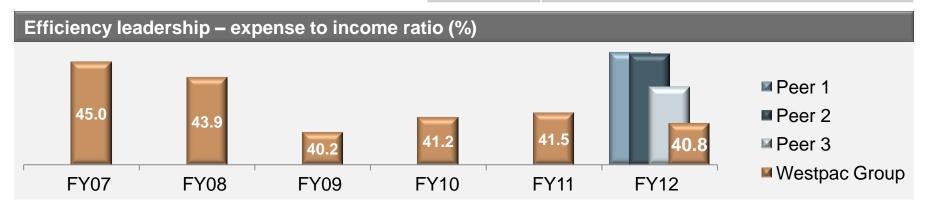

- AFS¹/Group Services \$97m
- Productivity program \$118m
- Supplier program \$23m

\$500m+ savings over last 2 years<sup>2</sup>

- 7% of cost base
- Reduction of over 4,000 FTE

Investment	Benefits delivered
Westpac Local	<ul> <li>Westpac RBB 2 year cash earnings CAGR 11%</li> </ul>
SIPs	<ul> <li>Strengthened technology infrastructure</li> <li>Revitalised front end systems, teller, call centre and mobile apps</li> </ul>
Asia	<ul> <li>Revenue from Asia up 46%</li> </ul>
Wealth	<ul> <li>New advice revenue up 34%</li> <li>#1 share of net FUA flows<sup>3</sup></li> </ul>
Bank of Melbourne	<ul><li>Deposits up 35%</li><li>Customer numbers up 13%</li></ul>

1. AFS is Australian Financial Services and comprises Westpac RBB, St. George and BT Financial Group. 2 Excludes St. George merger related synergies. 3 Plan for Life, June 2012, all Master Funds Admin.

## **Strong result – good momentum**

	FY12	Change FY11 – FY12	Change 1H12 – 2H12
Cash earnings	\$6,598m	5%	7%
Cash EPS	215.9c	3%	6%
Reported NPAT <sup>1</sup>	\$5,970m	(15%)	1%
Core earnings <sup>2,3</sup>	\$10,697m	7%	4%
Impairment charges to average loans	24bps	4bps	-
Common equity ratio APRA Basel III	8.2%	79bps	42bps
Return on equity <sup>3</sup>	15.5%	(50bps)	80bps
Expense to income ratio <sup>3</sup>	40.8%	(70bps)	(60bps)
Fully franked dividend	166c	6%	2%

<sup>1</sup> Reported net profit lower reflecting the movement in St.George merger related tax changes. In 2011, Westpac recorded a \$1.1 billion benefit from tax consolidation while in 2012 the Group incurred a \$165 million increase in tax associated with retrospective changes to TOFA legislation. 2 Core earnings is operating profit before income tax and impairment charges. 3 Cash earnings basis.

## Our strategic priorities

A strong company Consistent increase in dividends Reorient to higher growth/higher Maintain ROE above 15% return sectors and segments Continue building deeper Grow customer return on credit risk weighted assets customer relationships Materially simplify products and Maintain lowest expense to income ratio of peers processes Focus on leadership, diversity One team approach and flexibility

# FULL YEAR 2012 FINANCIAL RESULT

Philip Coffey Chief Financial Officer

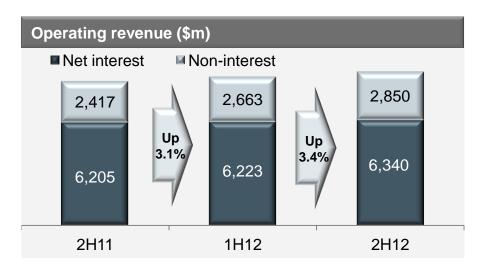

#### Looking behind the result

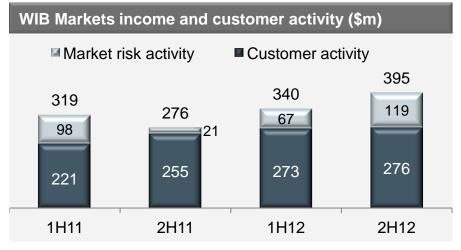

Analysis focusing on four primary market themes

- Quality and sustainability of financial performance
- Driver of returns across the business
- Investment and productivity focus and outcomes
- Franchise strength and risk profile

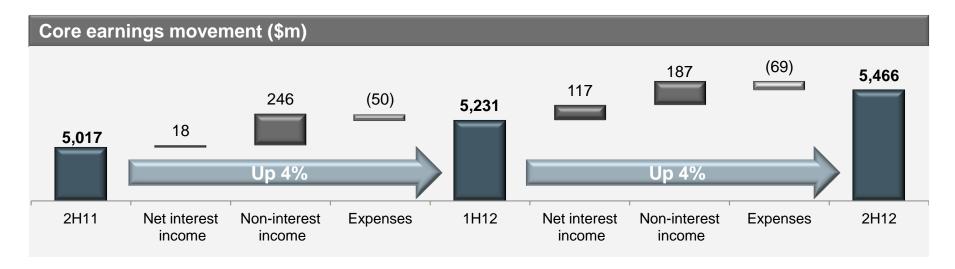

#### Solid growth

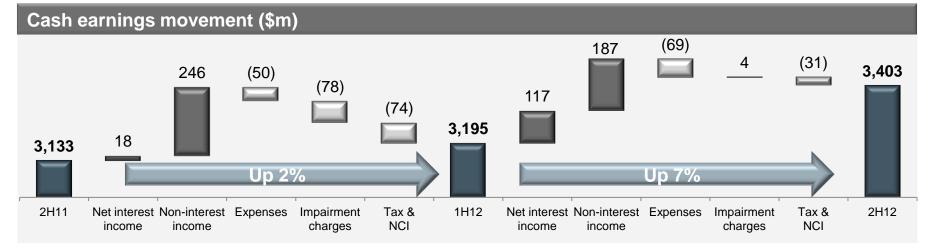

- Operating revenue up 6% over FY12 and 3% over 1H12
- J O Hambro acquisition added \$73m to revenue in FY12
- Revenue headwinds over FY12 included
  - More liquidity, less short term funding
  - De-risking of LMI (\$36m)
  - CVA movement (\$42m)
- Reported NPAT/cash earnings
  - Summed over last 2 years, NPAT larger than Cash earnings
  - Pre-tax movements in NPAT and cash earnings similar
- Markets income contribution up moderately in FY12 and 2H12

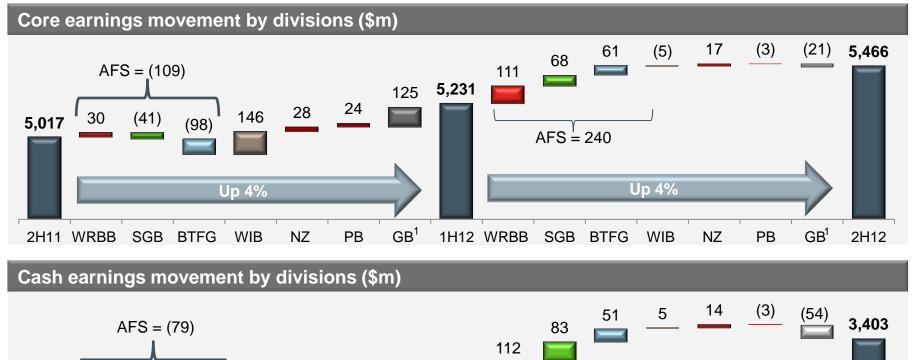

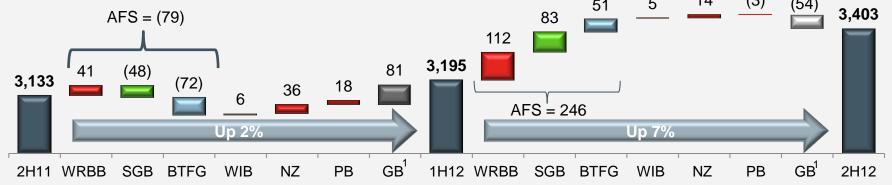

## Good momentum through the year

#### Benefits of portfolio diversification

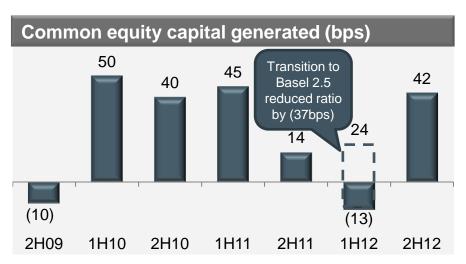

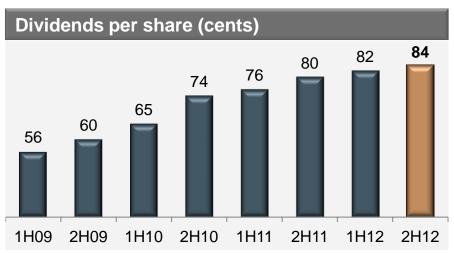

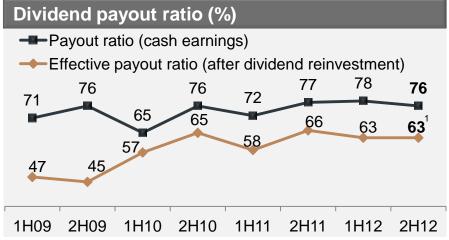

1 GB is Group businesses.

#### Healthy dividend, sustainable payout

- Dividend continues to be fully funded by capital generation with strong franking surplus of \$1bn
- Dividend reinvestment satisfied by share issuance, with no discount
- Attaching NZ imputation credits to benefit NZ based shareholders

<sup>1</sup> Based on an estimated DRP participation of 17%.

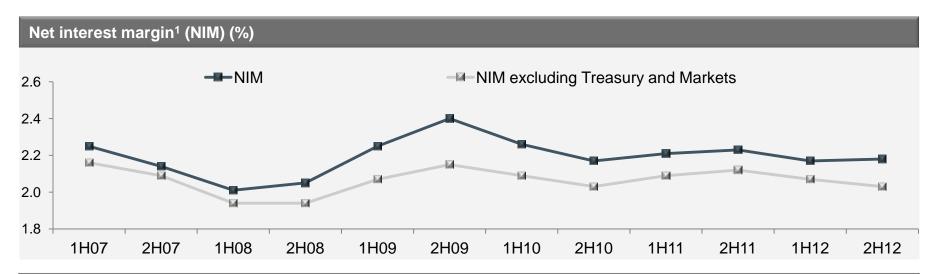

#### **Drivers of return**

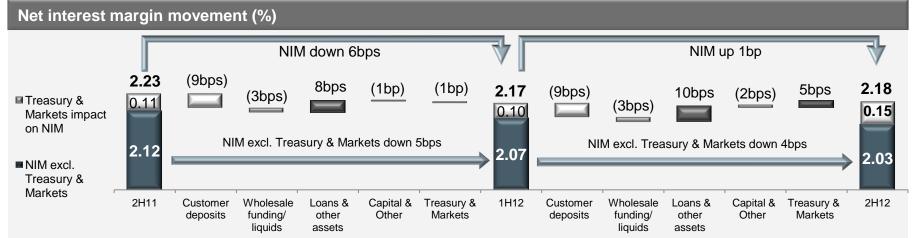

Return on average interest earning assets <sup>1</sup> (AIEA) (%)	2011	2012	1H12	2H12
Interest income (margin)	2.22	2.17	2.17	2.18
Non-interest income	0.90	0.95	0.93	0.98
Operating expenses	(1.30)	(1.28)	(1.27)	(1.28)
Impairment charges	(0.18)	(0.21)	(0.21)	(0.21)
Tax & Non-controlling interests	(0.50)	(0.50)	(0.50)	(0.50)
Cash earnings (ROA²)	1.15	1.14	1.11	1.17
Leverage (AIEA/AOE³)	13.92x	13.56x	13.57x	13.55x
Return on average ordinary equity (ROE)	16.0	15.5	15.1	15.9

<sup>1</sup> Analysis divides key profit and loss items by average interest earning assets to determine the return, or cost metric. Cash earnings to average interest earning assets multiplied by the leverage equals the return on equity. 2 ROA = Return on average interest earning assets. 3 AOE = Average ordinary equity.

## Underlying margins modestly lower

<sup>1 2007</sup> does not include St.George. 2008 and 2009 are pro forma including St.George for the entire period with 1H09 ASX Profit Announcement providing details of pro forma adjustments.

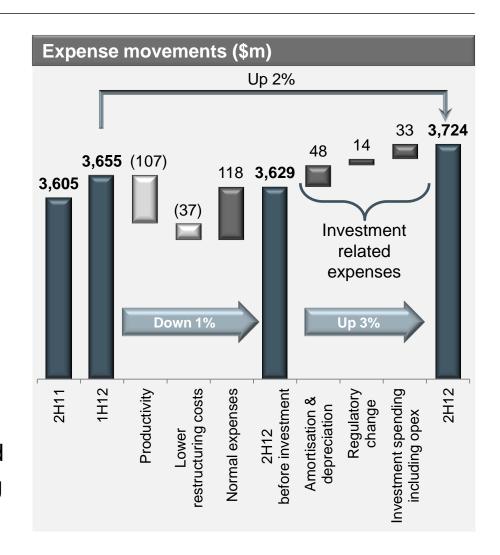

#### Increased focus on capital allocation and returns

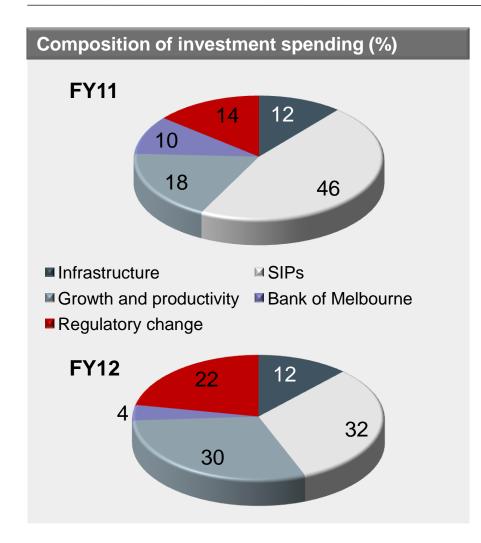

- Increased capital requires an even more intense focus on allocation and return
  - Updated transfer pricing method to ensure funding cost movements are more quickly reflected in pricing analysis
  - Enhanced economic capital allocation to better reflect regulatory overlays, with more capital allocated to divisions
  - Various initiatives underway to improve segment/industry and customer ROTE
  - More focus on regulatory RWA drivers to improve return on capital

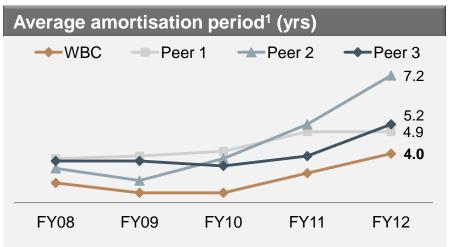

# **Expenses well managed supporting investment**

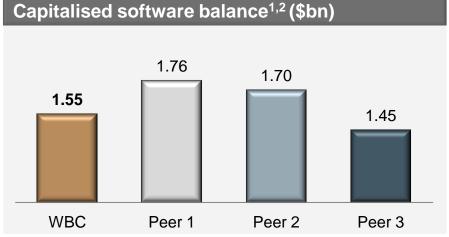

- Expenses up 2% (4% FY11/FY12) with increased investment partially offset by productivity
- Productivity savings
  - AFS/Group Services restructure
  - Productivity initiatives
  - Supplier program
- Flat expenses in St.George and Westpac RBB both 2H12 and FY11/FY12
- Investment includes
  - Rise in amortisation/ depreciation as projects completed
  - Higher operational spend including Asia/Bank of Melbourne

#### **Investment characteristics**

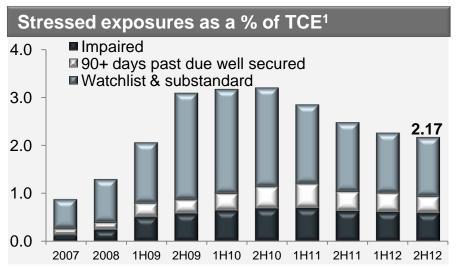

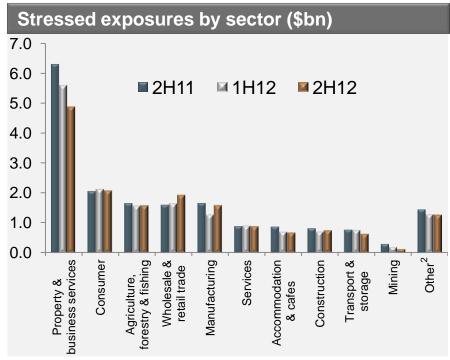

<sup>1</sup> Data for Westpac and peers from FY12 result. 2 Software capitalisation based on closing balances.

#### Asset quality continues to improve

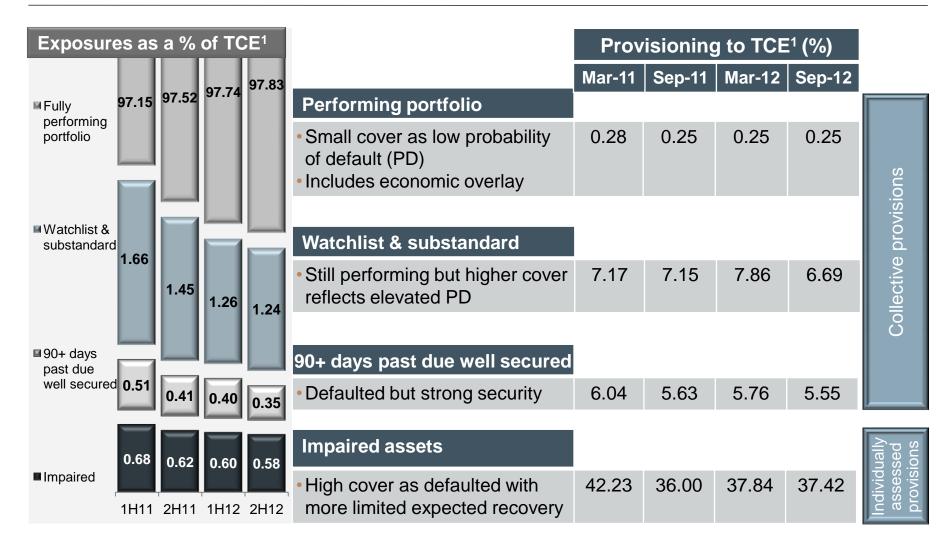

Economic overlay lifted (\$m)				
Balance at Sept-11		346		
Property overlay utilised	(24)			
Earthquake /flood overlays no longer required/utilised	(11)			
New economic / industry overlays	52			
Closing balance at Sept-12		363		

Strong provisioning coverage	1H12	2H12
Impairment provisions to impaired assets (%)	37.8	37.4
Collectively assessed provisions to credit risk weighted assets (bps)	122	113

<sup>1</sup> TCE is Total Committed Exposure. 2 Other includes Government, administration and defence, and utilities sectors.

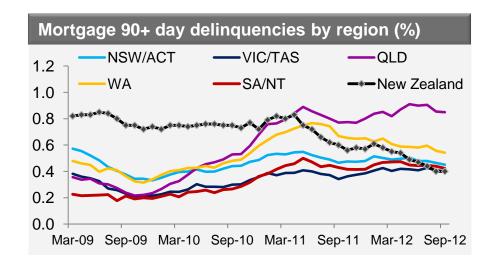

# Provision cover by portfolio category

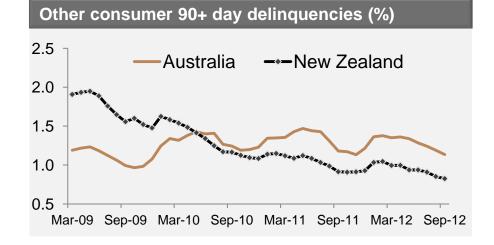

1 TCE is Total Committed Exposures.

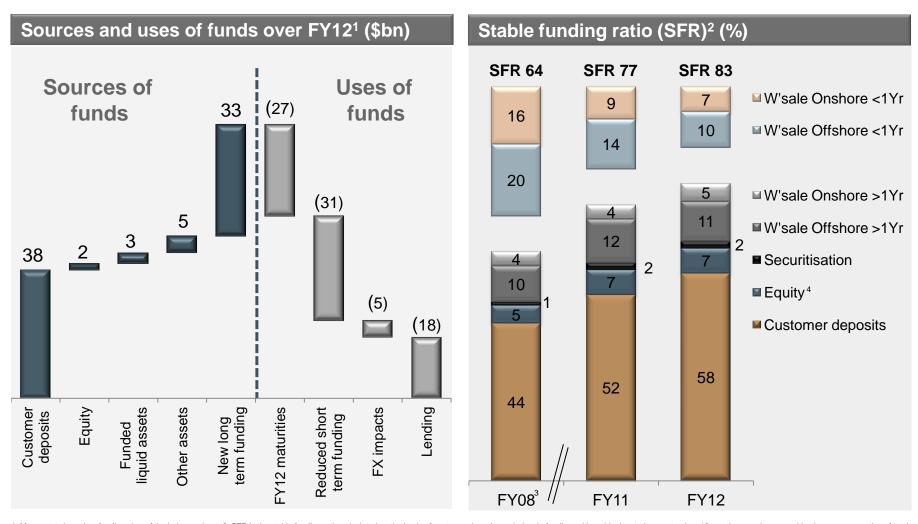

## Consumer asset quality remains solid

- Mortgages delinquency trends positive. Watching
  - Queensland, reflecting tougher conditions in that State
  - Low doc only around 6% of portfolio
- Properties in possession 289 down from over 500 at September 2011
- Other consumer delinquencies also improving

# Significant improvement in funding mix

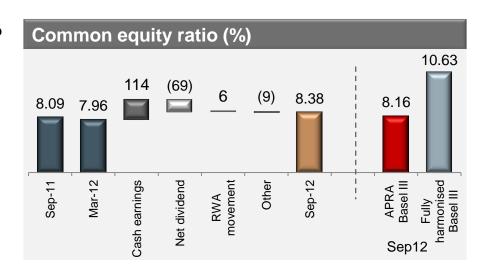

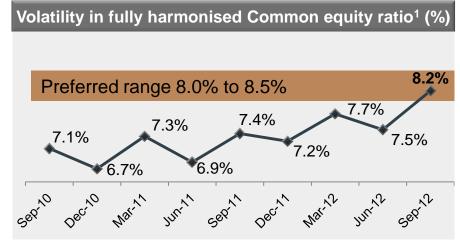

<sup>1</sup> Movements based on funding view of the balance sheet. 2 SFR is the stable funding ratio calculated on the basis of customer deposits + wholesale funding with residual maturity greater than 12 months + equity + securitisation, as a proportion of total funding. 3 2008 comparatives excludes St. George. 4 Equity excludes FX translation, Available for Sale Securities and Cash Flow Hedging Reserves.

# Strong capital – within new preferred range

- APRA Basel III common equity ratio 8.2% includes new operational risk models
- New preferred range for common equity ratio of 8.0% to 8.5%
  - Based on APRA Basel III standards
  - Considers internal and regulatory stress testing
  - Appropriately above APRA regulatory minimums and capital conservation buffer
  - Range reflects quarterly volatility of capital ratios under Basel III given dividend impact
- Westpac's preferred range, based on APRA standards, translates to over 10% under fully harmonised Basel III

<sup>1</sup> All figures prior to Sep-12 are pro forma estimates.

#### **Considerations for FY13**

- Deposit growth remaining solid. Loan growth likely to remain modest with stronger growth in target segments
- Margin disciplines to remain, focus on return
- Further productivity benefits to flow through, offset by higher investment and associated costs
- Revenue and expense growth managed to achieve core earnings growth
- Leading asset quality picture to remain, although not expecting a continued decline in stressed assets
- Continue to strengthen balance sheet although heavy lifting coming to an end
- Continuing balanced approach to strategy execution

# INVESTOR DISCUSSION PACK 2012

# FULL YEAR OVERVIEW 2012

COMPARISON OF 2H12 VERSUS 1H12 CASH EARNINGS (UNLESS OTHERWISE STATED)

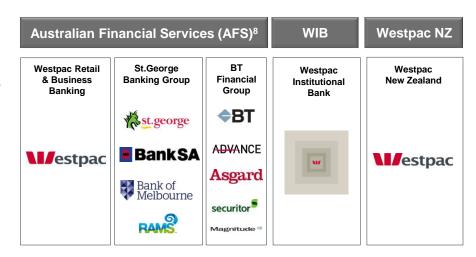

#### Westpac Group at a glance

- Australia's first bank and first company, opened in 1817
- Australia's 2<sup>nd</sup> largest bank, and within the top 20 largest banks in the world, ranked by market capitalisation<sup>1</sup>
- Strategy focused on supporting customers and markets connected to Australia, New Zealand and the near Pacific
- Portfolio of brands providing retail, business, institutional banking and wealth management services with excellent positioning in key markets
- Efficiency leader of peers and all global banks<sup>2</sup>
- · Strong capital, funding, liquidity and provisioning
- Solid earnings profile over time
- Leader in sustainability<sup>3</sup>

Collectively assessed provisions to credit RWA (bps)	113	(9bps)	(13bps)

<sup>1</sup> For profitability metrics the change represents results for FY12 versus FY11 and 2H12 versus 1H12, the actual results for 2H12 and 1H12 are not represented here. 2 EPS is Earnings Per Share. 3 Cash Basis. 4 Stable funding ratio calculated on the basis of customer deposits + wholesale funding with residual maturity greater than 12 months + equity + securitisation, as a proportion of total funding. 5 Source: Company reports. Includes long term wholesale funding with a residual maturity less than 1 year. 6 pro forma common equity ratio based on Basel III fully harmonised methodology. 7 NTA is Net Tangible Assets.

#### Reconciliation between Cash earnings and Reported profit

#### Cash earnings policy<sup>1</sup>

- In assessing financial performance, including divisional results, Westpac Group uses a measure of performance referred to as Cash earnings
- This measure has been used in the Australian banking market for over a decade and management believes it can be used to more effectively assess performance for the current period against prior periods and to compare performance across business divisions and across peer companies
- To calculate Cash earnings, reported results are adjusted for
  - Material items that key decision makers at the Westpac Group believe do not reflect ongoing operations
  - Items that are not considered when dividends are recommended, such as the amortisation of intangibles, impact of Treasury shares and economic hedging impacts
  - Accounting reclassifications between individual line items that do not impact reported results

#### **Approach in this Investor Discussion Pack**

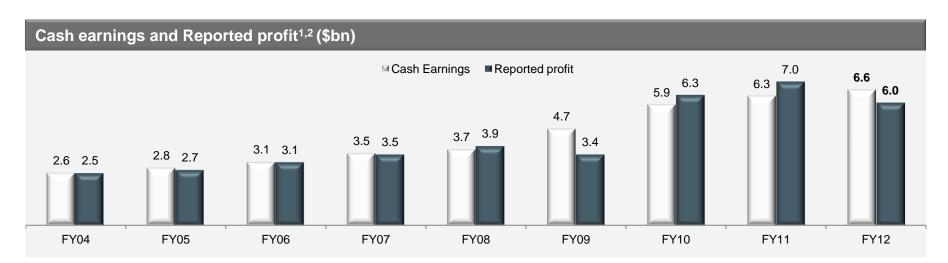

- Cash earnings is used as the primary method of management reporting for both the Group and operating divisions
- Cash earnings has been determined by adjusting reported profit at both an aggregate level and across individual lines in the income statement. A reconciliation of these adjustments is provided in sections 9.1 and 9.2 in Westpac's Full Year Results 2012 announcement
- Financial ratios in this presentation are calculated using Cash earnings unless otherwise noted
- It is important to note that at a divisional level, Cash earnings and reported profit
  are identical for all operating divisions except for St.George and BTFG due to
  merger/acquisition related amortisation. All other Cash earnings adjustments are
  processed through the Group Businesses.

Reported profit and Cash earnings <sup>1</sup> adjustments (\$m)			
	FY11	FY12	
Reported profit	6,991	5,970	
TPS revaluations	21	27	
Treasury Shares	(6)	27	
Ineffective hedges	13	(7)	
Fair value gain on economic hedges	36	7	
Buyback of government guaranteed debt	5	(5)	
Tax provision	70	0	
Supplier program	0	139	
Merger transaction and integration expenses	66	0	
Amortisation of intangible assets	146	151	
Fair value amortisation of financial instruments	69	46	
Tax consolidation adjustment	(1,110)	0	
Significant item	0	78	
TOFA tax consolidation adjustment	0	165	
Cash earnings	6,301	6,598	

<sup>1</sup> All adjustments shown are after tax. Cash Earnings is not a measure of cash flow or net profit determined on a cash accounting basis, as it includes non-cash items reflected in net profit determined in accordance with A-IFRS. The specific adjustments outlined include both cash and non-cash items.

#### Cash earnings is a fair measure of profit for Westpac Group

#### Cash earnings appropriate measure of profit

- Cash earnings is used as the primary method of management reporting for both the Group and operating divisions
- Adjustments to cash earnings have had little net impact on aggregate earnings over the last 2 years
- Difference between Cash earnings and Reported profit over the last six years (since AIFRS) has seen less than 2% of value generated. Tax has been the major driver of the difference (2009-2012) with other factors being closing NZ structured finance (2009), and St.George merger (2010-2012)
- · 2012 adjustments of (\$628m) include
  - One-off expenditure (\$217m)
  - Tax (\$165m)
  - Amortisation of intangibles (\$151m)
  - Timing adjustments (\$95m)

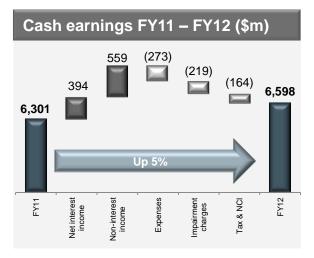

Cash earnings adjustments for 2 years	FY11 and FY12 \$m
Cash earnings	12,899
Tax	875
Amortisation of intangibles	(297)
One-off expenditure	(283)
Timing adjustments	(233)
Reported profit	12,961

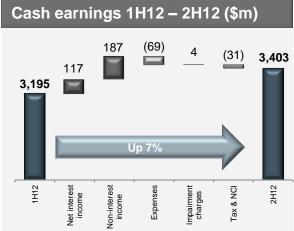

<sup>1</sup> Cash earnings is reported profit adjusted for material items to ensure they appropriately reflect profits normally available to ordinary shareholders. All adjustments shown are after tax. Refer to slide 33 for a summary of the Westpac Group Final 2012 Results. 2 2007 and prior excludes St. George.

#### **Strong Cash earnings growth**

Cash earnings	FY12 (\$m)	% change <sup>1</sup> 1H12-2H12	% change¹ FY11-FY12
Net interest income	12,563	2	3
Non-interest income	5,513	7	11
Expenses	(7,379)	(2)	(4)
Core earnings	10,697	4	7
Impairment charges	(1,212)	1	(22)
Cash earnings	6,598	7	5
Reported profit	5,970	1	(15)

#### Cash earnings features of FY12

- Cash earnings up 5%, with all divisions performing well. AFS was higher due to a strong performance by WRBB and stable St.George result, offsetting a weaker BTFG result mostly due to market impacts. Positive contribution from WIB, while Westpac NZ and Pacific Banking were strong performers
- Net interest income rose 3%, with housing, business and personal loan growth offsetting slightly lower margins from higher funding costs relative to market rates
- Non-interest income up 11%, with strong cross sell of wealth and risk management products across the Group, higher performance fees in Hastings and the inclusion of the J O Hambro business
- Expense growth well contained at 4%. Wage and property cost increases along with investment in SIPs, Bank of Melbourne, Wealth and Asia were partly offset by productivity savings
- Impairment charges higher due to reduced benefit of write-backs in WIB and economic overlays increasing \$17m compared to \$107m reduction in FY11.
   Asset quality continued to improve across the portfolio

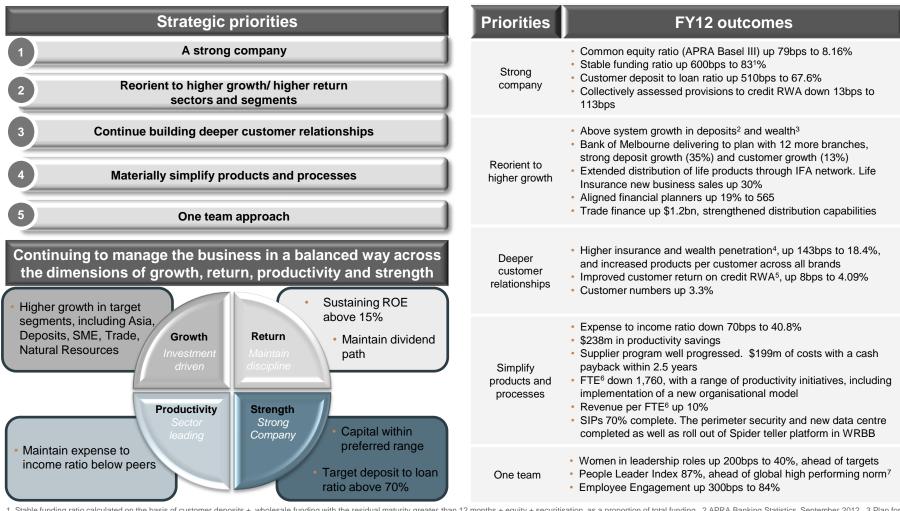

#### Cash earnings features of 2H12

- Cash earnings up 7%, driven by a strong performance across most divisions.
   AFS up 13% with a continued strong performance from WRBB and significantly improved contributions from St.George and BTFG. WIB earnings were slightly up, while Westpac NZ and Pacific Banking continued to be strong performers
- Net interest income up 2%, with sound balance sheet growth and slightly higher margins
- Non-interest income up 7%, driven by a significant uplift in wealth and insurance earnings and a rise in trading income
- Expense growth well contained at 2%. Productivity initiatives delivered \$107m in savings, largely offsetting higher business as usual costs. Ongoing investment in Bank of Melbourne, Wealth and Asia, along with amortisation/depreciation and compliance costs were higher
- Impairment charges slightly lower with improved asset quality, particularly in consumer, partially offset by an increase in the economic overlay by \$18m

<sup>1</sup> For profitability metrics the change represents results for FY12 versus FY11 and 2H12 versus 1H12, the actual results for 1H12 and 2H12 are not represented here.

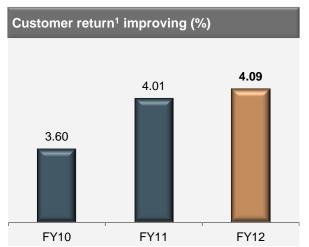

#### Our strategic priorities

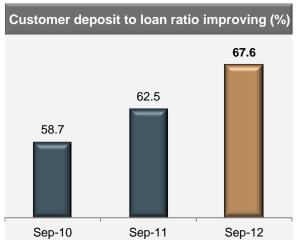

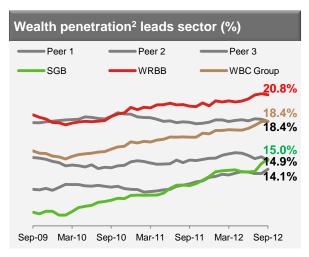

1 Stable funding ratio calculated on the basis of customer deposits + wholesale funding with the residual maturity greater than 12 months + equity + securitisation, as a proportion of total funding. 2 APRA Banking Statistics, September 2012. 3 Plan for Life, June 2012, All Master Funds Admin. 4 Refer to slide 119 for Wealth penetration metrics provider details. 5 Customer return calculated as operating income, less Treasury and Markets Income, less operating expenses, divided by average credit risk weighted assets. 6 Based on average FTE. 7 Towers Watson global high performing norm for Peoples Leader Index.

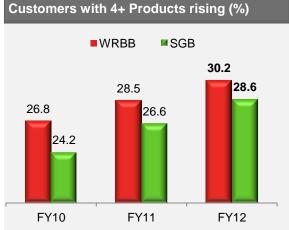

#### **Delivering against target metrics**

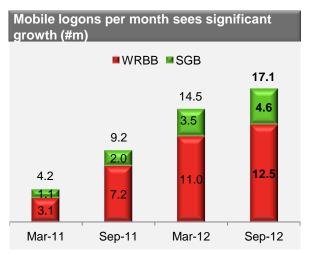

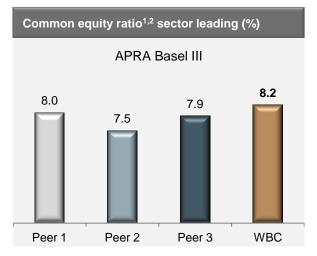

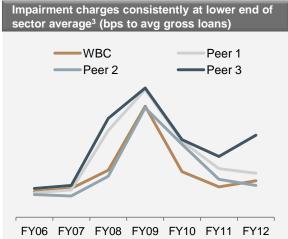

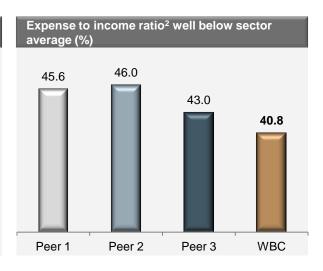

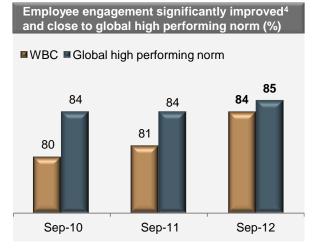

<sup>1</sup> Customer return is defined as operating income, less Treasury and Markets Income, less operating expenses, divided by average credit risk weighted assets. 2 Refer to slide 119 for Wealth penetration metrics provider details.

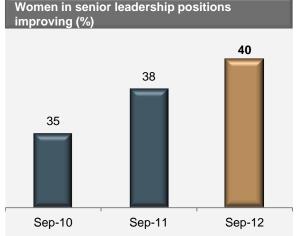

#### **Delivering against target metrics (cont.)**

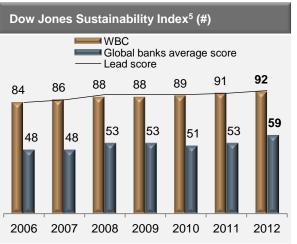

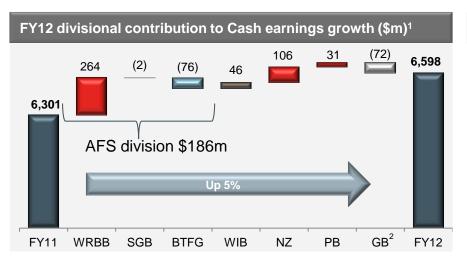

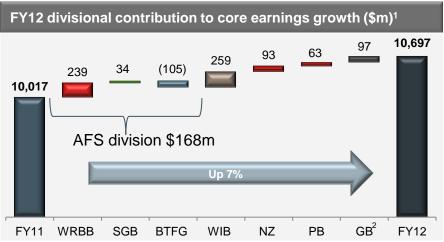

<sup>1</sup> WBC includes new operating risk requirements. 2 Peer 1 and 3 12 months to 30 September 2012; Peer 2 12 months to 30 June 2012. 3 Peer 1 and Peer 3 reporting dates for full year are 30 September and Peer 2 full year reporting date is 30 June. Peer 3 impairment charge excludes charges on investments held to maturity. Peer 3 gross loans and acceptances includes \$22; tho of loans at fair value at Mar08, \$19.5bn at Sep07 and \$17.5bn at Mar07. 4 Towers Watson Employee engagement global high performing norm. 5 Dow Jones Sustainability Index scores are based on the annual SAM Corporate Sustainability Assessment. The average score presented here is the average score of all the assessed companies in the Banks sector.

#### Growth driven by AFS, WIB, New Zealand and Pacific

FY12 Cash earnings (\$m)	AFS	WRBB	SGB	BTFG	WIB	NZ	Pacific	GB <sup>2</sup>	Group
Operating income	12,093	6,488	3,531	2,074	3,190	1,560	299	934	18,076
Expenses	(5,553)	(3,079)	(1,341)	(1,133)	(987)	(653)	(93)	(93)	(7,379)
Core earnings	6,540	3,409	2,190	941	2,203	907	206	841	10,697

#### Continued strong dividend growth path

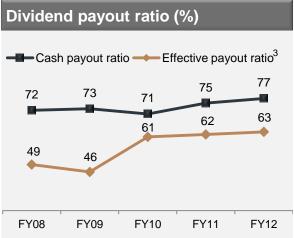

- FY12 record dividend of 166cents, up 6%
  - 1H12 dividend 82 cents and 2H12 dividend 84 cents
- Payout ratio at 77% in FY12 consistent with strong capital position. Effective payout ratio lower at 63% given approximately 17<sup>1</sup>% of dividends return to the Group via the dividend reinvestment plan (DRP)
- · DRP to be satisfied by new share issuance, with no DRP discount
- Significant franking balance of \$1.0bn after payment of final dividend
- Dividend yield<sup>2</sup> 6.7%
  - Equivalent to a fully franked dividend yield<sup>2</sup> of 9.6%
- Attaching NZ imputation credits to benefit NZ based shareholders

#### **Key dividend considerations**

- Seek to lift dividend cents per share each half while growing organic capital and maintaining a strong capital position
- Pay fully franked dividends, utilising franking surplus to distribute value to shareholders
- Maintain payout ratio that is sustainable in the long term

1 The Dividend Reinvestment Plan participation rate was 20.2% in 1H12 and 15.2% in 2H11. 2 FY12 dividend and using 28 September 2012 Westpac closing share price of \$24.85. 3 Effective payout adjusts for capital returned via the DRP.

## FULL YEAR FEATURES 2012

COMPARISON OF 2H12 VERSUS 1H12 CASH EARNINGS (UNLESS OTHERWISE STATED)

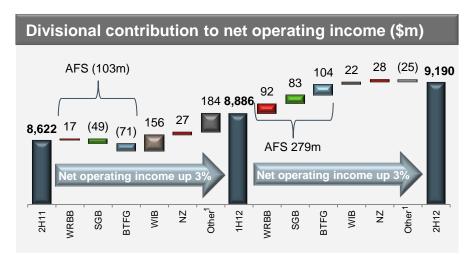

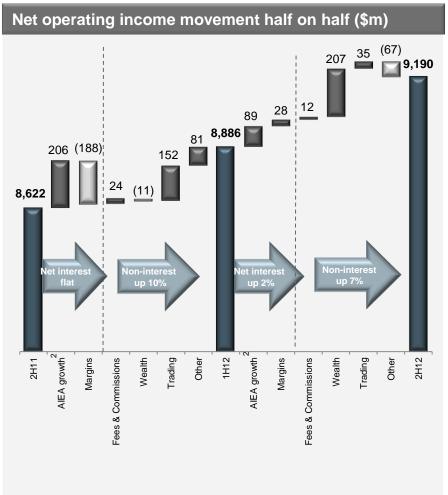

#### **Solid operating income**

- Net operating income up 3% (up 6% FY11/FY12)
- Net interest income up 2% (up 3% FY11/FY12)
  - Modest loan growth, strong customer deposit growth
  - Margins up 1bp
- Non-interest income up 7% (up 11% FY11/FY12)
  - Fees and commissions up slightly with higher business and commercial lending fees as well as higher card interchange income
  - Significant uplift in wealth with higher performance fees (mostly Hastings), higher advice income and a large uplift in General Insurance result due to higher premiums and seasonally lower catastrophie claims
  - Higher Trading income primarily due to improved income in Debt Markets and positive credit value adjustment movement
  - Other income decreased 46% with no gains on asset sales (Visa in 1H12)

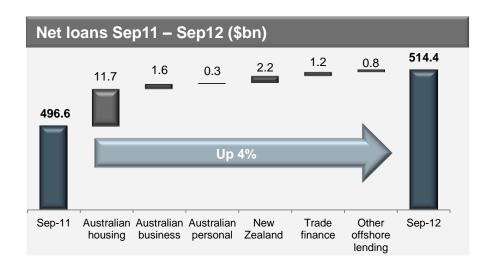

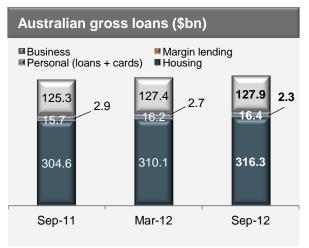

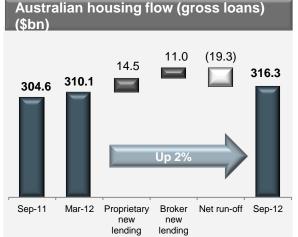

<sup>1</sup> Other includes Pacific Banking and Group Businesses. 2 AIEA is Average Interest Earning Assets.

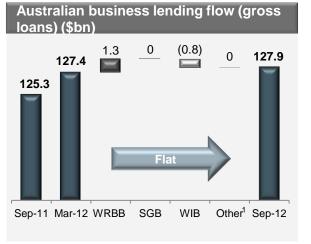

#### Loan growth predominantly in housing

- Westpac Group loans up 2% (up 4% FY11/FY12
- Australian housing loans up 2% (up 4% FY11/FY12)
  - Growth continues to be driven predominantly by proprietary channel and a strong take-up of our fixed rate mortgage product
- Australian business lending flat (up 2% FY11/FY12)
- AFS lending up 2%, offset by a modest decline in institutional lending, predominately in business lending and securitisation of customer facilities
- New Zealand lending up 2% (up 3% FY11/FY12) due to both mortgage and business growth
- Trade finance flat (up 41% FY11/FY12)

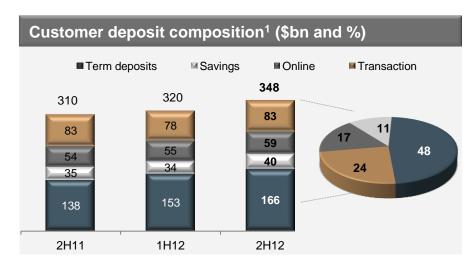

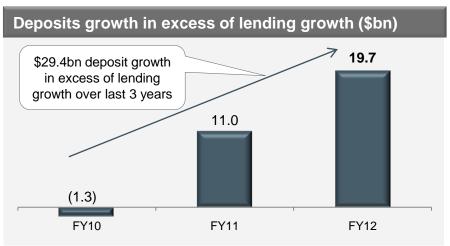

<sup>1</sup> Other includes BTFG and Treasury.

#### Customer deposit growth funding loan growth

- Customer deposits up \$28bn or 9% (up 12% FY11/FY12)
- · Increase in customer deposits more than three times loan growth
- Growth was spread across product types
  - Term deposits, up \$13bn (8%) given more attractive rates and seeking to encourage higher quality deposits
  - Strong flows from personal customers contributed to savings accounts growth, up \$6bn (18%)
  - Online deposits up \$4bn, with RAMS new online product contributing \$1.1bn since the launch in May
  - Transaction accounts were up \$5bn, with higher corporate deposits and an increase in mortgage offset accounts of \$1.8bn

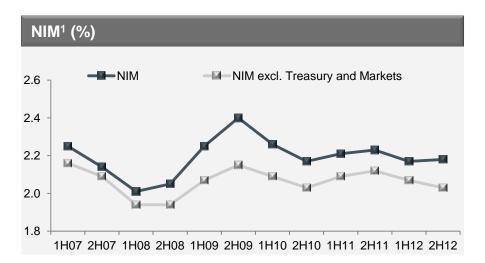

Customer deposit strategy					
Improve customer deposit to loan ratio	• Ratio up 440bps to 67.6% (up 510bps FY11/FY12)				
Ensure interest rates reflect value of deposit	<ul> <li>Seek to build high quality and stickier deposit base as transition to new liquidity rules. Have seen most growth in term deposits</li> <li>Focus on behavioural maturity</li> </ul>				
Increase distribution reach	<ul><li>Capture deposits on wealth platforms, especially superannuation</li><li>Attract via RAMS</li></ul>				
Further increase deposit focus across network	<ul> <li>Greater weighting in bankers' scorecards</li> <li>Increased focus on deposit rich segments</li> </ul>				

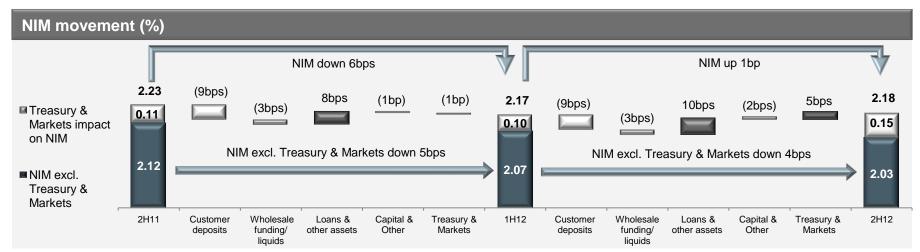

<sup>1</sup> Mortgage offset accounts are included in Transaction accounts.

#### **Underlying margins modestly lower**

- Net interest margin (NIM) up 1bp to 2.18% (down 5bps FY11/FY12)
  - 9bps decline from deposit impacts
    - 7bps decline in spreads, reflecting continued intense competition for deposits, particularly term and lower hedge benefit on low interest accounts
    - 2bps decline from negative mix impacts, with growth in lower spread term and online deposits
  - 10bps increase primarily from re-pricing of loan facilities, mostly mortgages
  - 3bps decline from higher wholesale funding and liquidity, due to higher cost of new issuance relative to maturing debt and holding higher funded liquid assets
  - 5bps improvement from Treasury and Markets income, with increased revenue from the management of liquid assets and higher contribution from Debt Markets
  - NIM excluding Treasury and Markets 4bps lower as asset repricing did not match movements in funding costs

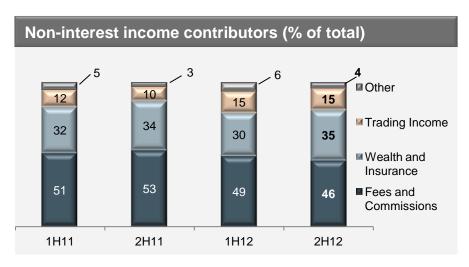

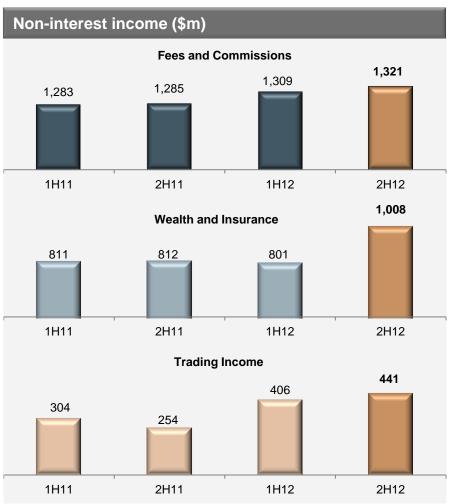

1 2007 does not include St.George. 2008 and 2009 are pro forma including St.George for the entire period with 1H09 ASX Profit Announcement providing details of pro forma adjustments.

#### Non-interest income solid performance

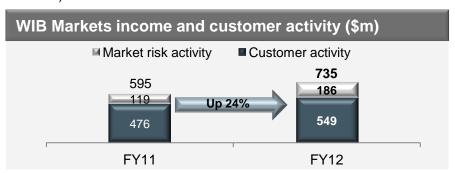

- Non-interest income up 7% (up 11% FY11/FY12)
- Fees & commissions up 1% (up 2% FY11/FY12) with higher business facility fees partly offset by lower deposit account keeping fees.
   Seasonally lower redemption of credit card reward points
- Wealth and Insurance income up 26% (up 11% FY11/FY12) due to increase in performance fees (Hastings); higher advice income from additional planners; and strong General and Life Insurance result on higher premiums and lower general claims relating to natural disasters
- Trading income was up 9% (up 52% FY11/FY12) with improved WIB markets income including positive credit value adjustment (CVA) movement. Foreign exchange income was lower post a strong 1H12
- Other income down 46% (up 11% FY11/FY12) primarily due to no asset sales in 2H12 versus \$46m gain on Visa sale in 1H12

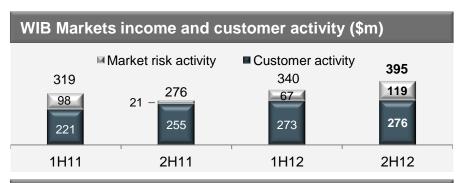

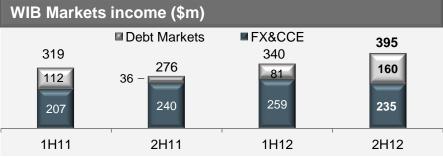

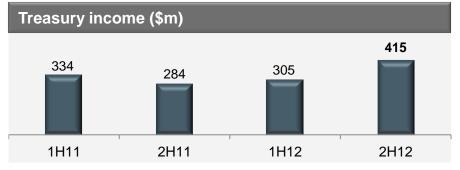

#### WIB Markets and Treasury income - strong result

- Market conditions in 2H12 improved from 1H12, however, concerns around Europe and global growth still persist. Credit spreads and market conditions improved during 2H12 leading to a stronger performance
- WIB Markets income was \$395m, up 16% in 2H12 (up 24% on FY11/FY12) driven by
- Good flows in customer activity (up 1% to \$276m)
- Improved market conditions and good positioning resulted in higher Market risk income
- \$24m favourable movement on counterparty credit exposures (CVA)
- WIB average daily VaR decreased by \$3.0m to \$5.4m for 2H12 (down 32% to \$6.9m for FY12)
- Treasury income was \$415m, up 36% (up 17% on FY11/FY12)
- Improved income from liquid asset portfolio, largely driven by fair value movements from tightening credit spreads
- Increased earnings contribution from interest rate risk management
- Average daily Treasury VaR relatively stable at \$29.7m (\$31.6m at FY12)

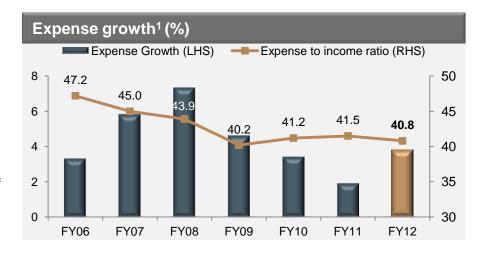

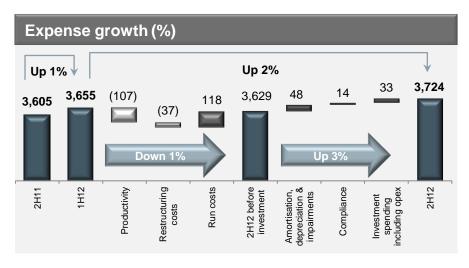

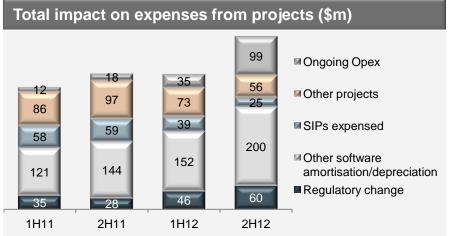

#### Expenses well managed, continued investment

- Expenses up 2% (up 4% FY11/FY12) contributing to a 60bps reduction in the expense to income ratio to 40.5% (down 70bps FY11/FY12 to 40.8%)
  - Productivity initiatives delivered \$107m in savings, largely offsetting usual business run costs. These included
    - AFS Group services restructure
    - Productivity initiatives
    - Supplier program
  - Amortisation and depreciation up \$48m (up \$119m FY11/FY12)
  - Compliance expenses up \$14m
  - Expenses associated with investment were higher with 7 additional Bank of Melbourne branches, 91 additional aligned planners in Wealth, and an increase in Asian presence

1 2006 & 2007 does not include St.George. 2008 and 2009 are pro forma including St.George for the entire period with 1H09 ASX Profit Announcement providing details of proforma adjustments.

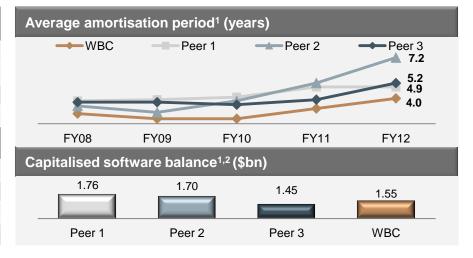

#### **Investment spend**

- Total cash spending on investments increased to \$486m
  - SIPs spending eased to \$116m as a number of projects were completed.
     Total cash spent on SIPs to date is \$1,377m and remains on track for circa \$2bn total spend
  - Regulatory change and compliance spending that was expensed increased 30% to \$60m (up 68% FY11/FY12)
- Capitalised software balances were \$1,551m, up \$116m
  - Capitalised software balance similar to peers
  - Average amortisation period more aggressive than peers reflecting conservative management practices
- Approach has no impact on capital
- Anticipate that amortisation and depreciation will add around 1.0%-1.5% to expenses in FY13

Capitalised software & deferred expenses (\$m)	2H11	1H12	2H12
Capitalised software			
Opening balance	1,038	1,303	1,435
Additions Amortisation, write–offs and other	410 (145)	287 (155)	316 (200)
Closing balance	1,303	1,435	1,551
Other deferred expenses

<sup>1</sup> Data for Westpac and peers as at FY12. 2 Software capitalisation based on closing FY12 balances.

#### **Continuous productivity focus**

- Westpac Group has implemented a variety of programs over recent years to maintain a strong efficiency advantage relative to peers
- This has included a broad productivity program, a divisional restructure and changes to supplier arrangements. Additional cost savings have also been achieved through a range of other initiatives including divisional programs and SIPs investment
- St.George merger was also a major contributor to efficiency
- In 2012 additional efficiency savings totalled \$238m
- · Looking ahead, programs to maintain the Group's efficiency advantage include
  - Finalising implementation of the supplier program
  - Completion of SIPs
  - Dedicated productivity team focused on simplifying our product set, process improvement, increasing self-serve and straight through processing via digital channels, and continuing to simplify our IT environment

#### **Efficiency programs**

Years	Major programs	Benefits
2008 - 2011	St.George merger synergies (13% ahead of business case)	\$413m
2011 - 2012	Productivity program - 2011 - 2012	\$289m \$118m
2012	Divisional restructure, creating Australian Financial Services and Group Services	\$97m
2012	Supplier program. Further benefits in 2013 and beyond expected	\$23m

#### **Westpac Group supplier program**

#### Details

In late 2011 Westpac commenced a program to implement changes to its back office and technology supplier arrangements. This program included bringing inhouse some functions previously provided externally and increasing the use of global specialists for certain activities to improve efficiency and flexibility

Costs associated with the programs in 2012 were \$199m (\$139m after tax). These costs were treated as a cash earnings adjustment given their one-off nature and because they were not considered when determining dividends

Costs of the program included

- Transaction and technology costs
- Costs associated with documenting processes and procedures
- Redundancy/redeployment costs

There will be no further cash earnings adjustments associated with this program

#### **Benefits**

#### Financial benefits

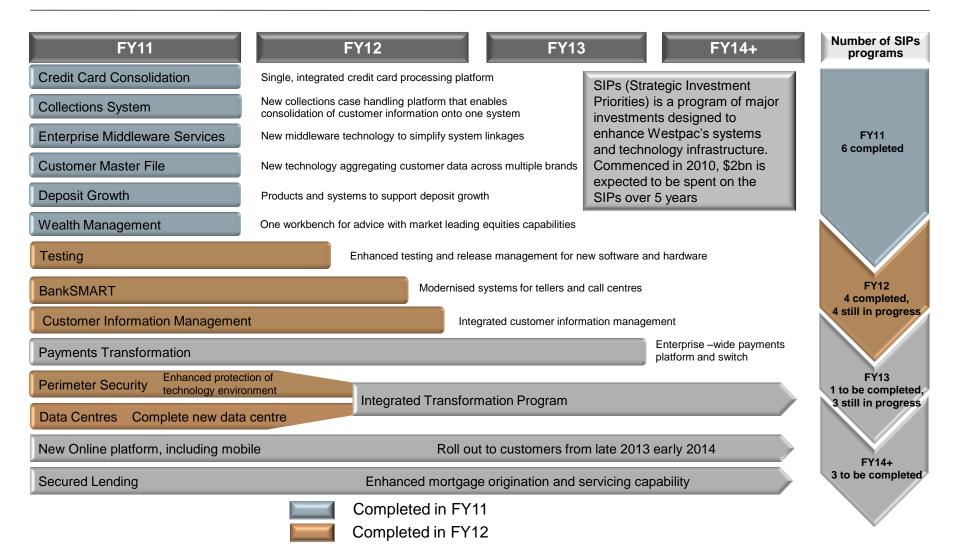

- On average, the programs to date are expected to have a cash pay-back of around 2.5 years
- \$23m in cost savings achieved in 2012
- Further cost savings expected to be realised in 2013
- Additional benefits to flow from lower project and technology changes costs

#### **Business benefits**

- Increases the variability of the cost base
- Improves the responsiveness of the Group to changes in technology and changing customer preferences
- Reduces higher cost contractor base
- Leverages scale and capability of global suppliers

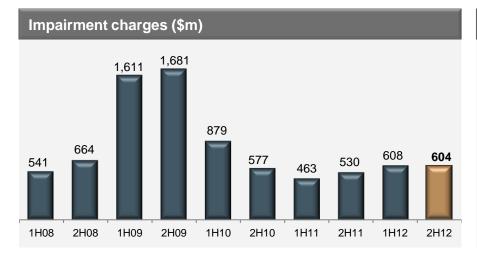

#### SIPs 70% complete

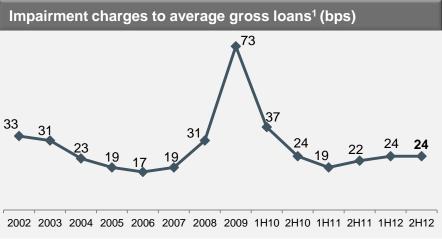

#### Impairment charges little changed in 2H12

- Impairment charges fell 1% to \$604m, representing 24bps of average gross loans
  - CAP charge of \$146m, down \$50m on 1H12, reflecting improved consumer portfolio quality in WRBB, St.George and New Zealand, as well as improved portfolio quality in WIB
  - New IAPs up \$12m on 1H12, or 2%
  - Economic overlay was increased \$18m to \$363m
- Impairment charges up 22% to \$1,212m FY11/FY12
  - Economic overlays up \$17m compared to \$107m reduction in FY11
  - Lower write-backs in WIB compared to previous year
- Asset quality continues to improve, although the rate of improvement has slowed, more evident in the corporate and business portfolios

Provisioning coverage ratios	2H11	1H12	2H12
Collectively assessed provisions to credit RWA	126bps	122bps	113bps
Collectively assessed provisions to performing non-housing loans	169bps	164bps	155bps
Impairment provisions to impaired assets	36%	38%	37%
Total provisions to gross loans	88bps	86bps	82bps

1 2000-2005 reported under AGAAP; 2006 onwards reported on A-IFRS basis. 2007 does not include St.George. 2008 and 2009 are pro forma including St.George for the entire period with 1H09 ASX Profit Announcement providing details of pro forma adjustments.

# FULL YEAR CAPITAL, FUNDING AND LIQUIDITY 2012

COMPARISON OF 2H12 VERSUS 1H12 CASH EARNINGS (UNLESS OTHERWISE STATED)

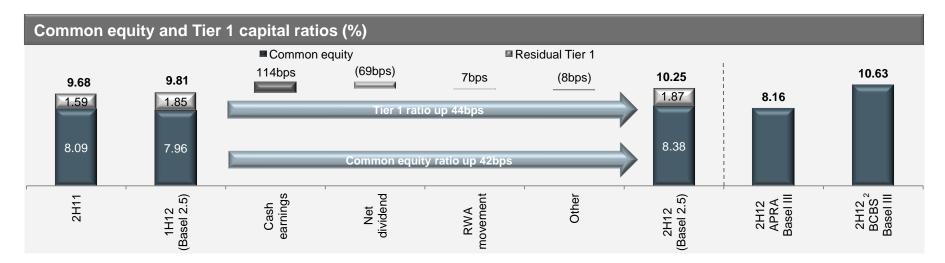

#### Strong capital position, up across all measures

- Westpac's Common equity ratio under Basel 2.5 increased 42bps to 8.4% (up 29bps FY11/FY12 largely impacted by implementation of Basel 2.5 in 1H12)
- Strong organic capital generation<sup>1</sup> contributed 52bps to capital
- Risk weighted assets down 1% largely driven by lower market risk and lower interest rate risk in the banking book
- Tier 1 ratio increased 44bps to 10.3% (up 57bps FY11/FY12)
- Total capital ratio further supported by issue of both Tier 1 hybrid and subordinated debt
- Common equity under APRA Basel III, increased 42bps to 8.16%
- Fully harmonised BCBS<sup>2</sup> Basel III common equity ratio, up 34bps to 10.6%

Key capital ratios (%)	2H11	1H12	2H12
Common equity ratio (APRA Basel 2.5)	8.1	8.0	8.4
Common equity ratio (APRA Basel III)	7.4	7.7	8.2
Common equity ratio (BCBS <sup>2</sup> Basel III)	9.8	10.3	10.6
Tier 1 ratio	9.7	9.8	10.3
Total capital ratio	11.0	10.8	11.7
Risk weighted assets	\$280bn	\$300bn	\$298bn

1 Organic capital generation is calculated as Cash earnings, dividends (net of dividend reinvestment plan) and RWA movement. 2 Basel Committee on Banking Supervision.

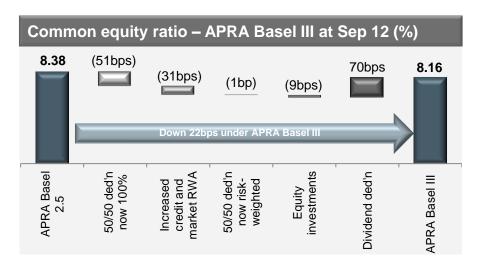

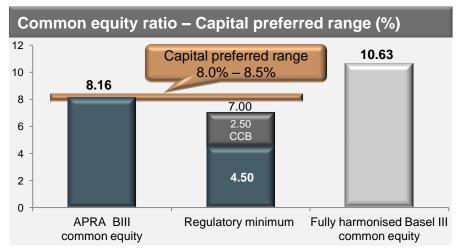

#### **Ready for Basel III transition**

- Common equity ratio APRA Basel III at 8.16%
- Well above APRA's 4.5% minimum requirements that come into effect 1
  January 2013. APRA also requires banks to maintain capital levels above
  the Prudential Capital Ratio (PCR) which is not disclosed
- On 28 September 2012, APRA released their final capital reform package
  - Final capital standards are largely as anticipated
  - Full implementation on 1 January 2013 (no transitional relief or phasing in of deductions)
  - Capital conservation buffer (CCB) of 2.5% comes into effect on 1 January 2016, which is designed to be used in times of stress
- On 12 October 2012, the BCBS¹ issued the paper 'A framework for dealing with domestic systemically important banks' (D-SIBs), which sets out a principles based framework for regulating D-SIBs
  - We expect APRA to commence discussions on local rules in 2013

#### Board approved Basel III preferred capital range

- New preferred range for APRA Basel III common equity ratio of 8.0% to 8.5%
- · New preferred range is comfortably above APRA minimums and CCB
- Range takes into consideration
  - Regulatory minimums and capital conservation buffer
  - Stress testing to maintain an appropriate capital ratio in a downturn
  - Quarterly volatility of capital ratios under Basel III from dividend payments
- On BCBS¹ fully harmonised basis new range translates to >10%

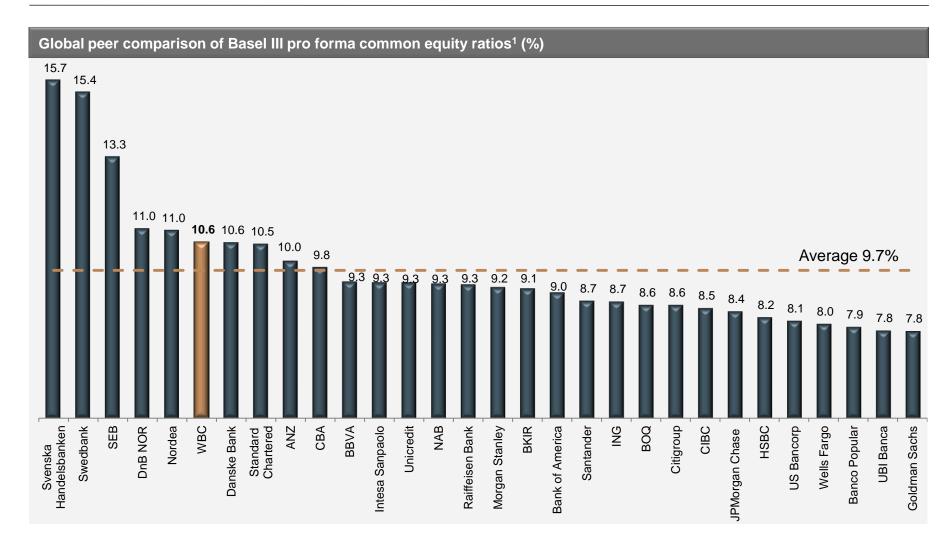

<sup>1</sup> Basel Committee on Banking Supervision.

#### **APRA to BCBS Basel III reconciliation**

- The Australian Prudential Regulation Authority (APRA) has maintained the conservative stance adopted under its Basel III capital standards, resulting in a significant variance between capital measured under APRA Basel III and fully harmonised Basel III
- Key differences between APRA's Basel III and fully harmonised Basel III under Basel Committee on Banking Supervision (BCBS) are highlighted in the table below

Description	Common equity ratio
Common equity ratio under APRA Basel III	8.16%
Under BCBS, supervisors have the option of applying concessional thresholds when determining the capital requirements of deferred tax assets, investments in non-consolidated subsidiaries (NCS) and equity investments. Risk weighted asset treatments apply in lieu of common equity deductions if these items are individually less than 10% and together less than 15% of common equity. To the extent the amounts are greater than the concessional thresholds, common equity deductions apply  APRA has chosen not to apply this concessional treatment and requires a 100% deduction from common equity for deferred tax assets, investments in non-consolidated financial institutions, NCS, equity investments in commercial entities held in the banking book, and all under-writing positions in financial and commercial institutions held for more than 5 business days	+134bps
Mortgage risk weights under APRA are based on a minimum loss given default (LGD) of 20% whereas BCBS sets a minimum LGD of 10%. APRA's higher minimum means that Australian mortgage risk weights are typically higher than those calculated using the lower BCBS LGD minimum	+67bps
APRA applies a risk weighted asset requirement to Interest rate risk in the banking book (IRRBB). This is not currently considered under BCBS Basel III requirements	+29bps
Other differences	+17bps
Fully Harmonised Basel III under BCBS	10.63%

#### Strong common equity ratio (Basel III) against peers globally

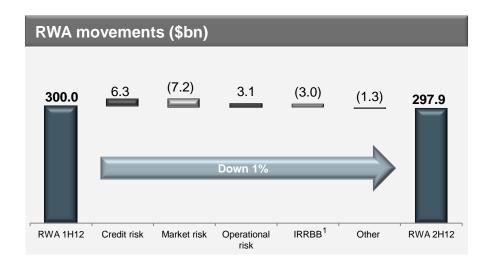

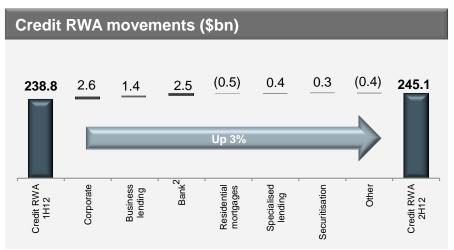

1 Source: Company data, Credit Suisse estimates (based on latest reporting data as at 26 October 2012).

#### Risk weighted assets relatively flat over half

- RWA decreased 1% (up 6% FY11/FY12)
  - Market risk reduction driven primarily by lower exposure to AUD interest rates
  - IRRBB¹ decreased due to higher embedded gains associated with lower interest rates
- Credit RWA up 3% (up 4% FY11/FY12) with movements driven by changes in the measurement of off-balance sheet exposures
- Equity risk fell 9% due to equity divestments (down 16% FY11/FY12)
- Operational risk rose 13% (up 36% FY11/FY12) following finalisation of the new Group operational risk capital model
- · Other impacts on capital
  - General reserve for credit losses increased \$12m to \$131m, a deduction from Tier 1 capital
  - Regulatory expected loss capital deduction decreased by \$40m to \$769m

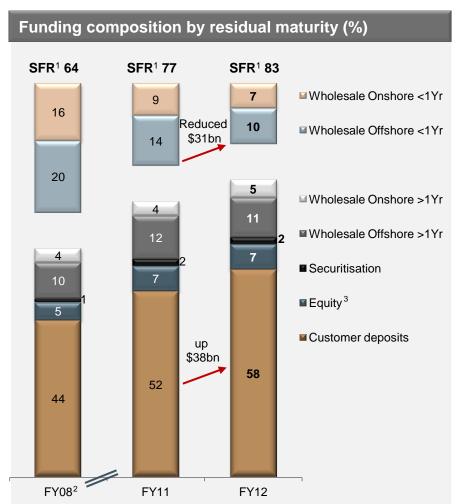

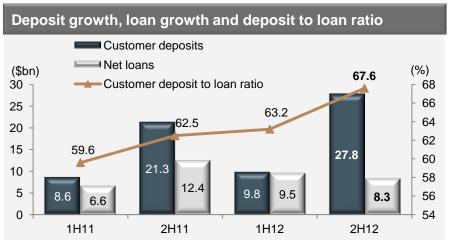

1 IRRBB is interest rate risk in banking book. 2 Bank includes exposures to licensed banks and their own or controlled subsidiaries, and overseas central banks.

#### Balance sheet growth funded via stable sources; Lowest short term funding of peers

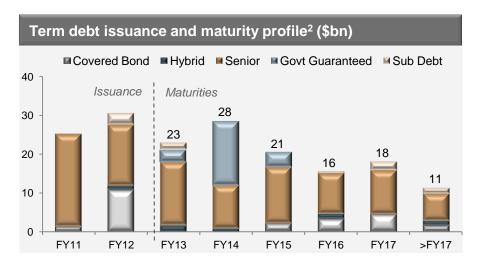

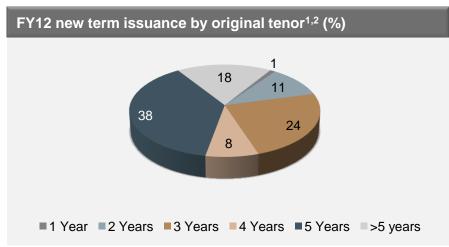

<sup>1</sup> SFR is the stable funding ratio calculated on the basis of customer deposits + wholesale funding with residual maturity greater than 12 months + equity + securitisation, as a proportion of total funding. 2 2008 comparatives excludes St. George. 3 Equity excludes FX translation, Available for Sale Securities and Cash Flow Hedging Reserves. 4. Company reports. Includes Central Bank deposits and long term wholesale funding with a residual maturity less than 1 year. Peer 1 and Peer 3 as at 30 Securities and Cash Flow Hedging Reserves. 4. Company reports. Includes Central Bank deposits and long term wholesale funding with a residual maturity less than 1 year. Peer 1 and Peer 3 as at 30 June 2012.

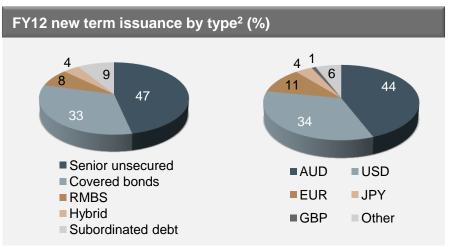

#### FY12 term issuance demonstrates funding diversity

- Westpac's term debt issuance in FY12 shows the strength and breadth of the Group's funding franchise
- Raised \$31.7bn across senior unsecured, covered bonds, securitisation and subordinated debt
  - Includes \$3.25bn of pre-funding for 2013
  - Includes \$10.7bn of covered bonds, reducing issuance in senior unsecured markets
- Raised a further \$1.2bn in hybrid securities
- Maintaining appropriate maturity profile weighted average maturity of new term issuance 4.3 years<sup>1</sup>
- A broad range of currencies and tenors used to meet investor demand, particularly from new investors to the Westpac name, including central banks and government institutions, as well as strong demand from Asian investors

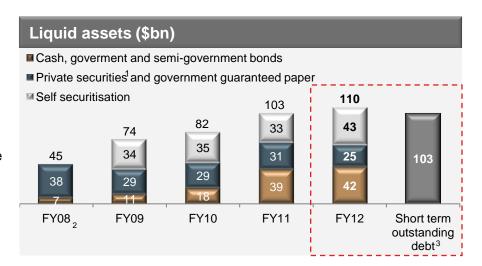

1 Excludes securitisation. 2 Based on residual maturity and FX spot currency translation. Includes all debt issuance with contractual maturity greater than 13 months, excluding US Commercial paper. Contractual maturity date for hybrids and callable subordinated instruments is the first scheduled conversion date or call date for the purposes of this disclosure. Perpetual sub-debt has been included in >FY16 maturity bucket.

#### Liquidity position further improved

- Unencumbered liquid asset balance of \$110bn as at 30 September 2012
  - Covers all short term wholesale outstandings (offshore and onshore)
  - Covers all wholesale debt maturities for over 16 months
  - All held and controlled by Group Treasury
- Additional liquid assets are also held in the institutional bank but are not included in the above liquid assets
- Portfolio provides a source of reserve liquidity as eligible collateral under the Reserve Bank of Australia's (RBA) repurchase facility
- APRA discussion paper and draft prudential standards on Basel III liquidity reforms released November 2011. Includes compliance with
  - Liquidity Coverage Ratio by 1 Jan 2015
  - Net Stable Funding Ratio by 1 Jan 2018
- In November 2011, RBA announced the introduction of a Committed Liquidity Facility (CLF) to enable Australian banks to meet the requirements of the LCR given the lack of Level 1 and 2 liquid assets in Australia. Key features
  - 15bps fee per annum, based on the size of the commitment (both drawn and undrawn)
  - Repo cost of 25bps over cash rate for usage
  - Self-securitised assets eligible for inclusion in CLF

<sup>1</sup> Private securities include Bank paper, RMBS, and Supra-nationals. 2 2008 does not include St.George. 3 Includes long term wholesale funding with a residual maturity less than 1 year

### FULL YEAR ASSET QUALITY 2012

COMPARISON OF 2H12 VERSUS 1H12 (UNLESS OTHERWISE STATED)

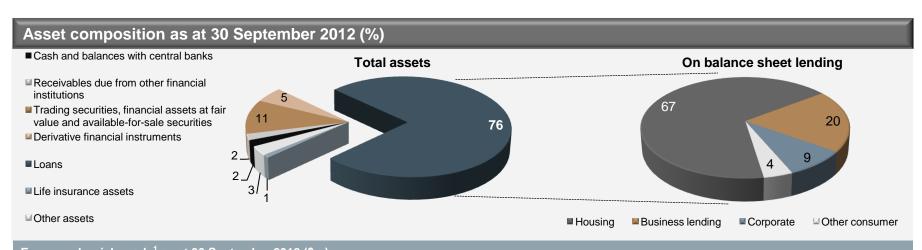

#### High quality portfolio with bias to secured consumer lending

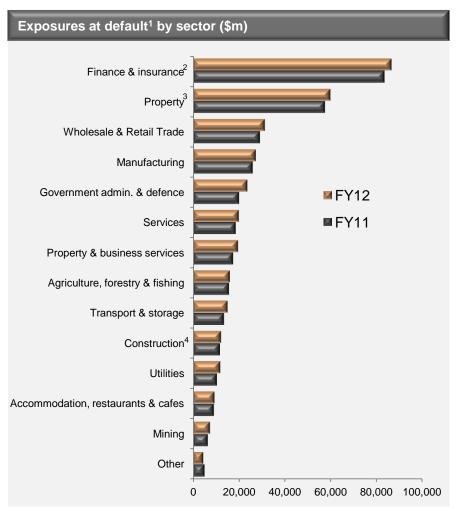

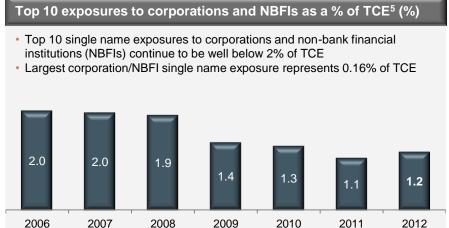

#### Exposure by risk grade<sup>1</sup> as at 30 September 2012 (\$m)

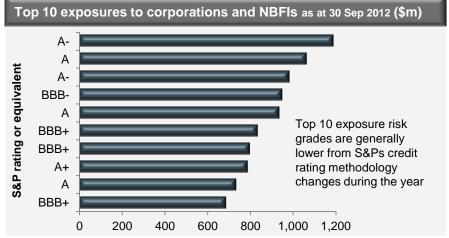

Standard and Poor's risk grade	Australia	NZ / Pacific	Americas	Europe	Asia	Group	% of Total
AAA to AA-	70,736	7,214	8,252	697	248	87,147	11%
A+ to A-	28,043	3,457	1,894	1,305	1,029	35,728	5%
BBB+ to BBB-	45,281	7,189	1,084	1,069	3,483	58,106	8%
BB+ to BB	57,878	7,040	245	312	1,214	66,689	9%
BB- to B+	54,089	7,130	6	24	-	61,249	8%
<b+< th=""><th>11,641</th><th>2,352</th><th>68</th><th>205</th><th>-</th><th>14,266</th><th>2%</th></b+<>	11,641	2,352	68	205	-	14,266	2%
Secured consumer	358,354	34,191	-	-	598	393,143	52%
Unsecured consumer	38,077	3,836	-	-	83	41,996	5%
Total committed exposure	664,099	72,409	11,549	3,612	6,655	758,324	
Exposure by region (%)	88%	10%	2%	<1%	<1%		100%

<sup>1</sup> Exposure by booking office.

#### Diversification across industries and large exposures

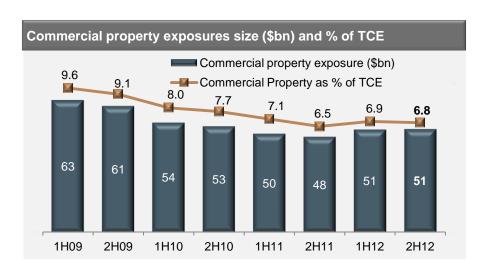

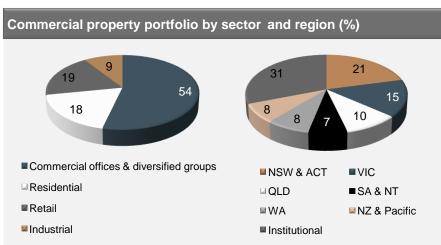

<sup>1</sup> Exposure at default represents an estimate of the amount of committed exposure expected to be drawn by the customer at the time of default and excludes consumer lending. 2 Finance and insurance includes banks, non-banks, insurance companies and other firms providing services to the finance and insurance sectors. 3 Property includes both residential and non-residential property investors and developers, and excludes real estate agents. 4 Construction includes building and non-building construction, and industries serving the construction sector. 5 Includes St. George from 2009 onwards.

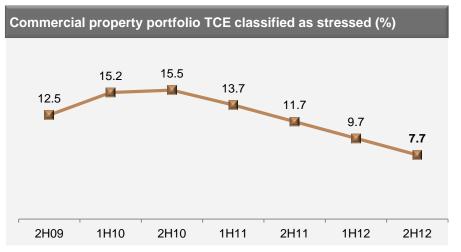

#### Commercial property portfolio comfortably within appetite

- Commercial property represents 6.8% of Total Committed Exposure (TCE) and 7.9% of gross lending at 30 September 2012, down from peak of 10.0% and 13.0% respectively in December 2008
- Current level of commercial property is well within risk appetite. The portfolio is well diversified across names, states and sectors
- Credit performance of commercial property portfolio continues to improve with the percentage identified as stressed at 7.7%, down 200bps on 1H12, and down significantly from the peak in FY10
- Upgrades, debt sales and refinancing has largely driven the improvement
- Low emergence of new stress, with most activity focused on working out existing stressed exposures

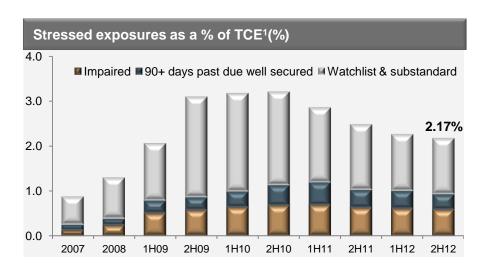

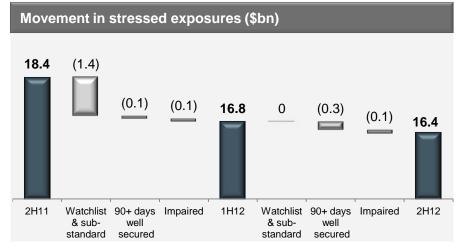

#### **Downward trend in stressed exposures**

- Asset quality continued to improve, with stressed exposures representing 2.17% of total committed exposures (TCE) at 30 September 2012, down 9bps (down 31bps FY11/FY12)
- This continues the downward trend of stressed exposures to TCE since reaching a peak in 2H10, however the rate of improvement has slowed, with stressed exposures down 9bps in 2H12, compared to 22bps in 1H12
- The reduction in stress has been partly due to upgrades out of stress resulting from repayments and refinancing, as well as lower flows into stressed asset grades

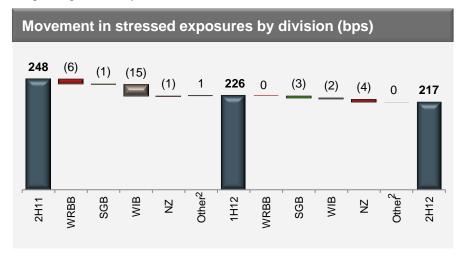

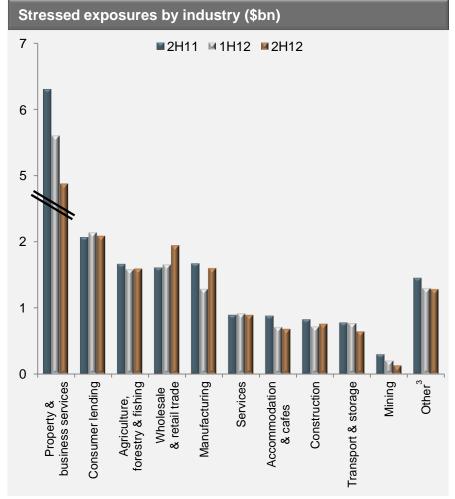

<sup>1</sup> Includes St. George from 1H09 onwards.

#### Stressed exposures across sectors

- Asset quality in the consumer segment has remained strong, benefiting from ongoing consumer caution, higher repayment levels, as well as low unemployment and interest rates
- The SME sector has also performed well, although it is beginning to recognise additional stress in those sectors undergoing structural change, impacted by soft consumer demand and those impacted by the high \$A, such as retail, tourism and manufacturing
- Commercial property continues to be the sector under the most stress however trends in the portfolio are generally positive, with the level of stress in that portfolio declining to 7.7% at 30 September 2012 (Commercial property represents 6.8% of the Group's TCE¹)
- The institutional and corporate segment continues to perform well, with further improvements in balance sheet strength and reductions in gearing over the year

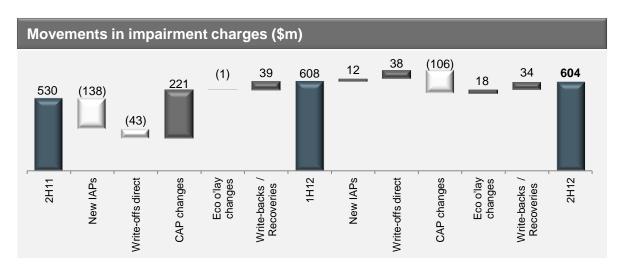

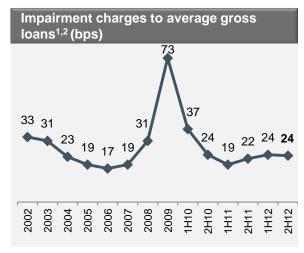

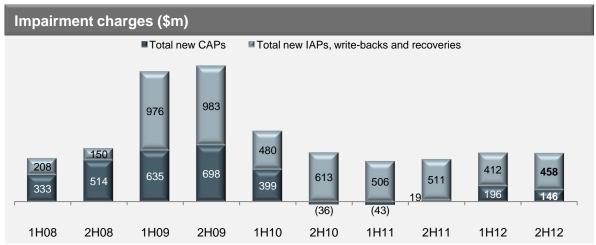

<sup>1</sup> TCE is Total Committed Exposures. 2 Other includes Group Businesses, BTFG and Pacific Banking. 3 Other includes Government, admin. and defence, and utilities sectors.

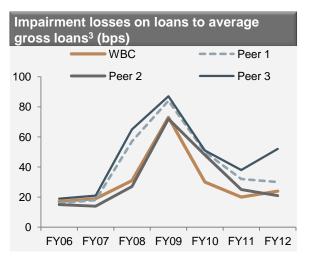

## Asset quality improving; impairment charges little changed in 2H12

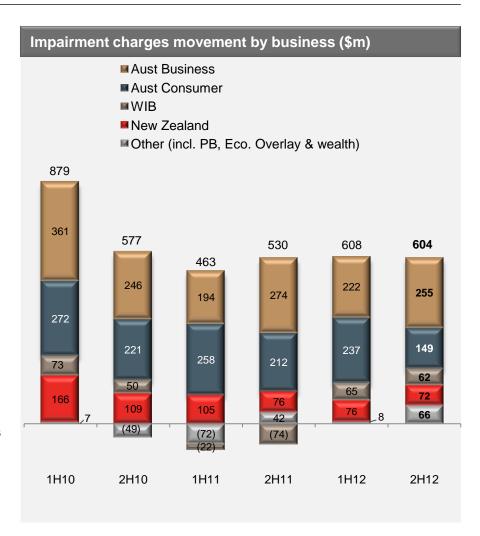

<sup>1 2000-2005</sup> reported under AGAAP; 2006 onwards reported on A-IFRS basis. 2 From 2008 includes St.George. 3 Peer 1 and Peer 3 reporting dates for full year are 30 September and Peer 2 full year reporting date is 30 June. Peer 3 impairment charge excludes charges on investments held to maturity. Peer 3 gross loans and acceptances includes \$22.1bn of loans at fair value at Mar08, \$19.5bn at Sep07 and \$17.5bn at Mar07.

## Asset quality improving; impairment charges little changed in 2H12

- In 2H12, impairment charges were \$604m, or 1% lower than 1H12
  - In the Australian business portfolio, impairment charges were a little higher, due to a reduction in write backs and from some increase in stress in those sectors impacted by the higher \$A and consumer caution
  - Australian consumer impairments were significantly lower as low unemployment and consumer caution has contributed to lower delinquencies in both the mortgage, and unsecured portfolios
  - Institutional asset quality has remained solid and combined with the sale of some stressed assets contributed to a small fall in impairment charges
  - New Zealand impairment charges continued to improve reflecting a further decline in stressed assets and significant improvements in mortgage and other consumer delinquencies which were down 15bps and 16bps respectively
  - The rise in impairment charges in the Other category was due to a rise in charges in Pacific Banking (both higher collective and individually assessed provisions) and the topping up of economic overlay provisions held in Group Businesses
- In FY12, impairment charges increased by \$219m to \$1,212m. This
  was mainly driven by
  - New collectively assessed provisions were \$366m higher as benefits from improving asset quality were smaller
  - A \$74m reduction in write-backs, mostly in WIB
  - A \$17m increase in economic overlays, compared to a \$107m reduction in overlays in FY11

#### Provision levels remain at upper end of peers

- Total provisions were \$4,241m at 30 September 2012
- Strong coverage was maintained, although provisioning levels have moderated consistent with reducing stress in the portfolio
  - Provisioning coverage levels remain at the upper end of peers
- New individually assessed provisions were lower, although remain relatively high as stressed assets continue to be worked through
- Economic overlay increased by \$18m to \$363m
  - Improvement in the commercial property sector led to a \$7m economic overlay unwind, offset by a \$25m increase in the overlay related to those sectors seeing emerging signs of stress due to structural changes, the high A\$, soft consumer demand and lower commodity prices

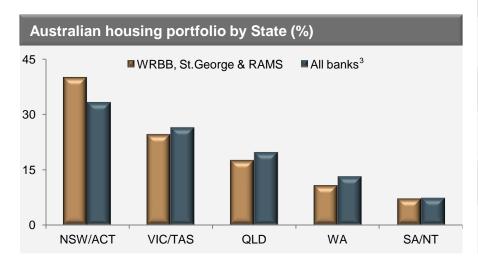

Provisionin	g (\$m)		
■IAP	■CAP (ex. Econ overlay)	■E	conomic overlay

## New flows support quality Australian housing portfolio

- Australian housing portfolio \$316bn, up 2% (up 4% FY11/FY12)
- Portfolio composition reflects brand strength across market segments
  - Owner occupied lending 48.2%
  - Investor lending 41.5%. All investor loans are first lien
- Continued reduction in the Low Doc portfolio due to policy tightening
  - <1% of flows and <6% of portfolio</p>
  - Low Doc lending, where borrowers certify income, has tighter lending standards to mitigate risk, including lower LVRs, more mortgage insurance and restricted location and security types

Australian housing portfolio <sup>1</sup>									
	FY11 Balance	FY12 Balance	2H12 Flow <sup>2</sup>						
Total portfolio (\$bn)	304.6	316.3	25.3						
Owner-occupied (%)	48.8	48.2	49.0						
Investment (%)	39.7	41.5	46.0						
Portfolio loan/line of credit (%)	11.5	10.3	4.7						
Variable rate / Fixed rate (%)	88 / 12	87 / 13	78 / 22						
Low Doc (%)	6.6	5.7	1.8						
Proprietary channel (%)	60.1	58.4	56.8						
First Home Buyer (incl. Low Doc) (%)	12.2	11.8	10.7						
Mortgage insured (%)	27.0	25.8	15.6						

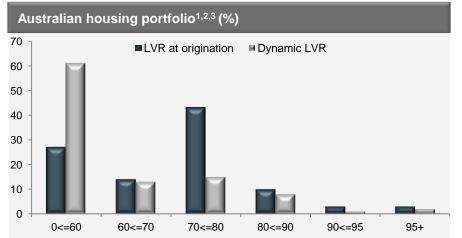

<sup>1</sup> Represents WRBB and St. George (including RAMS). 2 Flow is all new mortgage originations total settled amount originated during the 6 month period ended 30 September 2012. 3 ABA Cannex August 2012.

## Australian housing portfolio well collateralised

- Australian housing portfolio remains well collateralised
- Average dynamic LVR is 48%
  - Modestly up compared to FY11, mainly due to declines in property valuations in some regions in 1H12, including QLD and WA
- Average LVR of new loans unchanged at 69%
- Average LVR at origination slightly higher, reflecting a modestly higher proportion of investor lending in new flows
- Consumer caution continues to see a significant proportion of customers ahead of scheduled mortgage repayments at 59% (excluding offset balances)

Australian housing portfolio	FY11	FY12
Average LVR at origination <sup>1</sup> (%)	68	69
Average dynamic <sup>1,2,3</sup> LVR (%)	47	48
Average LVR of new loans <sup>4</sup> (%)	69	69
Average loan size (\$'000)	210	214
Customers ahead on repayments <sup>1,5</sup> (%)	61	59

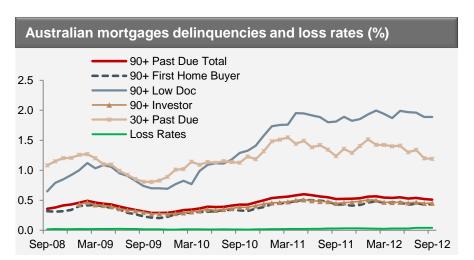

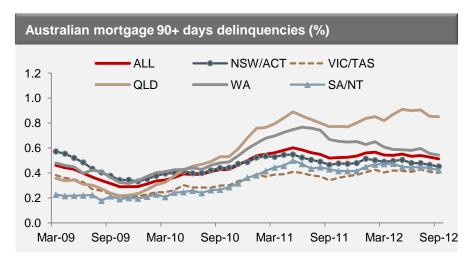

1 Includes WRBB and St.George (excl. RAMS). 2 Dynamic LVR represents the loan-to-value ratio taking into account the current outstanding loan balance, changes in security value and other loan adjustments. 3 Property valuation source Australian Property Monitors. 4 Average LVR of new loans is based on rolling 12 month window for each year end period. Includes WRBB and St.George (excl. RAMS). 5 Customer loans ahead on payments exclude equity loans/line of credit products as there is no scheduled principal payments. 6 'Behind' is more than 30 days past due. 7 'On time' includes up to 30 days past due.

## Low losses and delinquencies in Australian housing portfolio

- Australian mortgage delinquencies remain below industry benchmarks, with total portfolio 90+ days delinquencies 52bps, down 2bps (down 1bp FY11/FY12)
- Early cycle (30+ days) delinquencies are also lower, at 119bps, down 23bps (down 4bps FY11/FY12)
- Good performance across segments reflects continued cautious consumer behaviour and current low levels of unemployment, as well as improved early collections activities, including better segmentation
- Across the states, there has been significant improvement in WA over 2012 and modest improvements in NSW and SA. VIC remains the best performing state although delinquencies are modestly higher compared to 2011. Despite some improvement, QLD continues to experience difficulties, reflecting challenges to tourism and the property market in that state
- Properties in possession 289, down significantly from 519 at FY11.
   This reflects lower inflow, as well as an increase in activity to clear portfolios
- Actual loss rates in the mortgage portfolio increased to \$94m (net of insurance<sup>1</sup> claims) up \$43m (up \$50m FY11/FY12)
  - 3bps annualised
  - Increase over FY11 reflects softening property values in some regions
  - Loss rates remain low by international standards and reflect sound underwriting standards

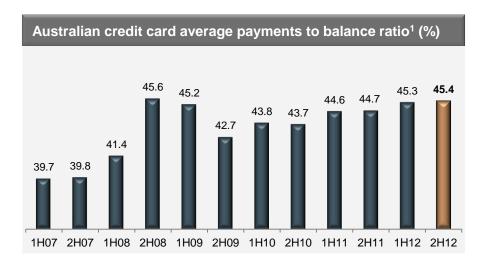

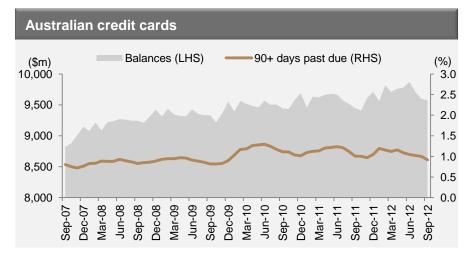

<sup>1</sup> Mortgage insurance claims 2H12 \$17m (1H12 \$13m and 2H11 \$11m).

## Australian credit card portfolio continues sound performance

- Australian credit card portfolio has continued to perform well, largely driven by cautious consumer behaviour resulting in increased payment levels
- The average credit card payments to balance ratio continued its rising trend, up 12bps to 45.4% (up 72bps FY11/FY12)
- Balances increased moderately over recent periods reflecting
  - Some growth in both WRBB and St.George cards following new product launches and campaigns
  - Low system growth
- Total credit card 90+ days delinquencies were down 26bps to 92bps (down 12bps FY11/FY12) due mainly to consumer deleveraging, current low unemployment levels and improvement in risk and collections strategies

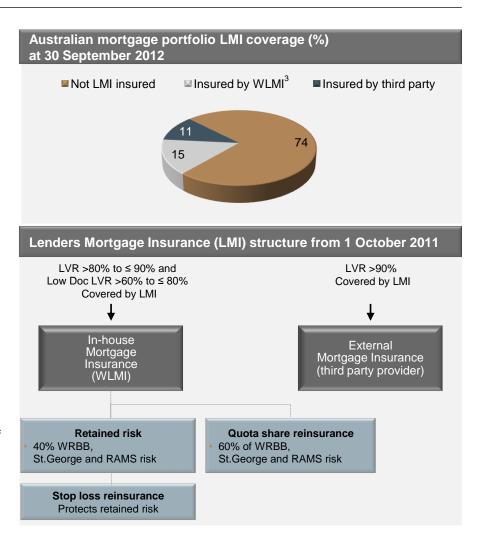

<sup>1</sup> Cards average payments to balance ratio is calculated using the average payment received compared to the average statement balance at the end of the reporting month.

## Lenders Mortgage Insurance managing risk transfer

- Westpac Group has one captive mortgage insurer, Westpac Lenders Mortgage Insurance (WLMI)<sup>1</sup>, which insures mortgages originated through all brands and channels
- Capital conservatively invested (cash and fixed interest) so returns primarily based on premium income and risk management
- All mortgages with origination LVR >90% insured with a third party since 2009 (prior to 2009 insured through WLMI)
- Mortgages with origination LVR between 80-90% and Low Doc between 60-80% are covered by WLMI. Westpac reduced its overall retained risk of higher LVR mortgages and further restructured the arrangement for mortgages originated from 1 October 2011
- WLMI reduced its retained risk to 40% for both WRBB and St.George brands (down from 70%)
- Retained risk for RAMS brand remains at 40%
- Increased number of quota share providers from one to four parties (Genworth Australia, QBE LMI, Arch Re and Tokio Millenium)
- Additional stop loss insurance with a separate party to cover potential extreme loss scenarios
- WLMI is strongly capitalised (separate from bank capital) and subject to APRA regulation. Capitalised at 1.33x MCR<sup>2</sup>
- Scenarios confirm sufficient capital to fund claims arising from events of severe stress (up to 1 in 250 years)
- In a 1 in 250 years loss scenario, estimated losses for WLMI are \$303m (net of re-insurance recoveries)
- 2H12 insurance claims \$17m (1H12 \$13m and 2H11 \$11m)

<sup>1</sup> WLMI provides cover for residential mortgages originated under WRBB, St.George and RAMS brand. 2 Minimum Capital Requirements (MCR) determined by Australian Prudential Regulation Authority. 3 Insured coverage is net of quota share.

## Benefits delivered by AFS structure and portfolio of brands

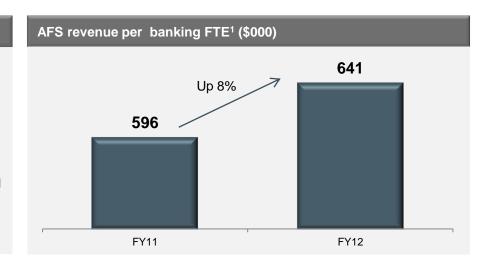

#### Benefits from new AFS structure

- AFS brings together a strong range of banking and wealth brands across Australia
- AFS model allows better co-ordination of our portfolio of brands, while enhancing brand distinctiveness, including
- Improving growth opportunities and maintaining strong retention
- Leveraging scale, maximising shared services, networks and facilities
- Leveraging best practice across brands
- Extending brand individuality to focus on core customer segments and target markets - deepening customer relationships
- Further embedding one team approach leveraging opportunities for wealth cross-sell

#### FY12 achievements in AFS

- · Cost savings achieved through operating model changes and productivity initiatives
- Improvements in sales force productivity with revenue per FTE up 8%
- Leveraging Westpac Local best practices through the St.George network including implementing consistent metrics between brands
- Deepening customer relationships with customers holding 4+ products up 200bps to 28.6% in St.George and 170bps to 30.2% in WRBB
- Improved wealth penetration with WRBB up 105bps to 20.8%<sup>2</sup> (sector leading) and St.George up 235bps to 15.0%2 (now 3rd highest wealth penetration behind only WRBB and CBA brands, having had highest growth in wealth penetration over the last three years)

#### **Future opportunities**

- More active portfolio management across our products, customer segments, brands, and channels
- Redirect resource to areas of higher growth, such as wealth, growth states, and specialised industry portfolios
- Driving productivity and frontline sales effectiveness through improved banker capability
- Lifting service quality and getting the simple things right
- · Simplifying our product sets, processes and services
- · Further build our digital capabilities to create further efficiencies

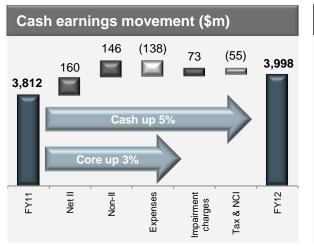

<sup>1</sup> Based on average FTE. 2 Refer to slide 119 for Wealth penetration metrics provider details.

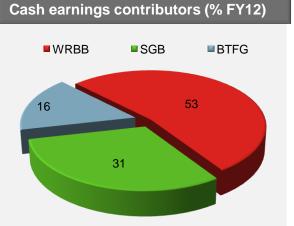

## AFS Cash earnings up 13% in 2H12, all businesses contributing

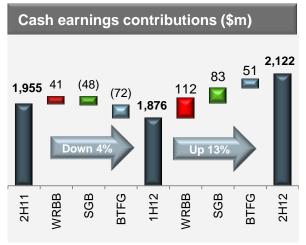

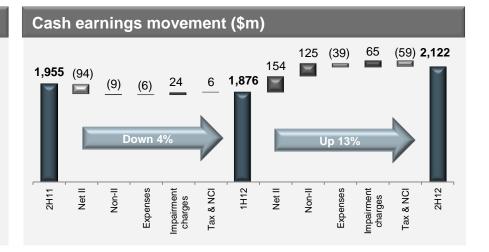

#### **Key features of AFS in 2H12**

- Cash earnings up 13%, Core earnings up 8%
- Driven by strong growth across all divisions
- Net Interest income up \$154m (up 4%) with sound volume growth and margins well managed, up 5bps
- Non-interest income up \$125m (up 8%) driven by increased line fees, financial market sales and insurance income
- Expenses well managed, only up \$39m (up 1%), with productivity savings helping to make room for continued investment, particularly Bank of Melbourne and BT financial planner growth. Expense to income ratio down 150bps to 45.2%
- Impairment charges down \$65m (down 14%) due to further improving performance in the consumer portfolio and deleveraging in commercial property

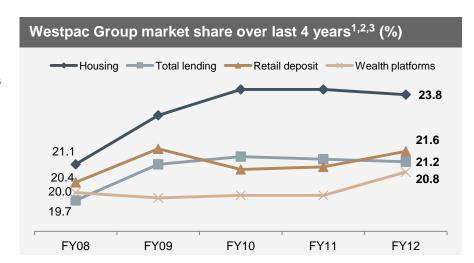

## AFS deposit growth above system, fully funding loan growth

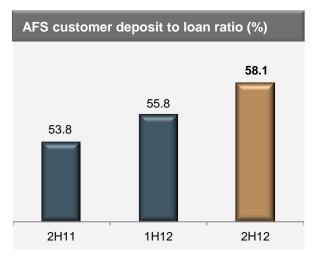

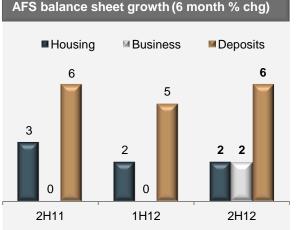

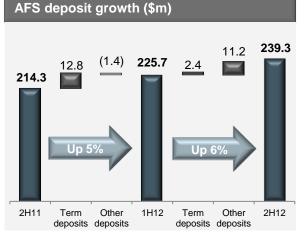

- Strong deposit growth exceeded loan growth, improving the deposit to loan ratio 230bps to 58.1% (up 430bps FY11/FY12)
- Deposits up \$13.6bn or 6% (up 12% FY11/FY12)
  - Strong growth in Term deposits in 1H12 and strong growth in other deposits in 2H12
- Housing up \$6.3bn or 2% (up 4% FY11/FY12)
  - Focused on service led strategy with strong retention
  - Prioritised proprietary lending, 59% of FY12 flows
- Other lending flat (up 1% FY11/FY12)
- Business lending up 2% (up 2% FY11/FY12)
  - Solid growth in WRBB business lending up 3% in 2H12
  - Working with business customers to ensure appropriate margins and meeting their FX and interest rate hedging needs

<sup>1</sup> RBA Banking Statistics, September 2012. 2 RBA Banking Statistics, September 2012. 3 Plan for Life, June 2012, All Master Funds Admin.

## AFS maintaining strong risk profile, consumer impairment charges lower

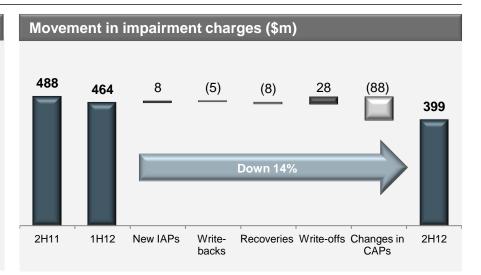

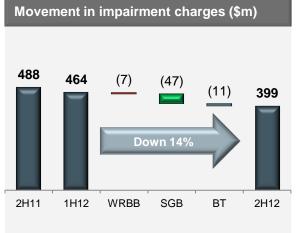

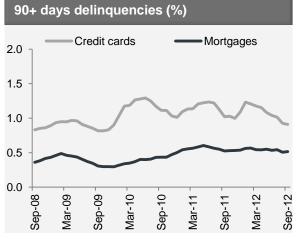

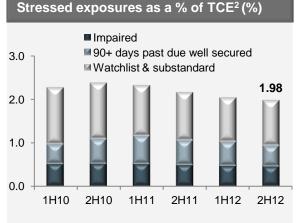

#### Strong risk profile<sup>1</sup>

- Stressed exposures as a % of TCE<sup>2</sup> at 198bps, down 5bps (down 17bps) FY11/FY12)
  - Impaired assets down 1bp to 47bps (down 3bps FY11/FY12)
  - 90+ days past due down 8bps to 47bps (down 9bps FY11/FY12)
  - Watchlist and substandard up 3bps to 104bps (down 6bps FY11/FY12)
- Mortgage 90+ days delinquencies down 2bps to 52bps (down 1bp FY11/FY12)
- Credit cards 90+ days delinquencies down 27bps to 92bps (down 12bps FY11/FY12)
- Impairment charges down 14% to \$399m
  - Consumer impairment charges down \$99m, with improvement in early cycle delinguencies, attributed to 'cautious consumer' behaviour and strong collections performance driving a lower CAP charge
  - Business impairment charges up \$34m, driven by higher CAP charges

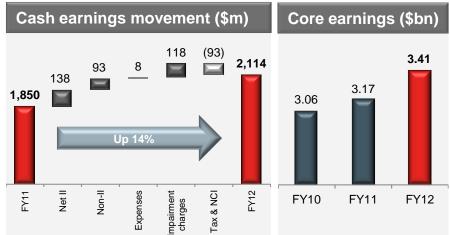

1 Refer slide 120 for asset quality definitions, 2 TCE is Total Committed Exposure

## Engaged employees and deeper customer relationships driving growth

#### **Key features of 2H12**

- Increased momentum continued from Westpac Local strategy of meeting more customer needs, combined with disciplined pricing, expenses and risk management
- · Improved key metrics, include
  - Strong balance sheet with 180bps increase in deposit to loan ratio
  - One team benefits with highest wealth penetration of major banks¹ at 20.8%, up 57bps, and higher business revenue from delivering more debt market solutions to WRBB customers to manage FX and rate risk
  - Customers up 1% and those with 4+ products up 70bps to 30.2%
  - 2nd in market share for both online /mobile (active mobile customers up 213,000 or 22%)<sup>2</sup>
  - Strong growth in transaction banking solutions, driving account balances up 9.7%
  - Business lending growth of 3%
  - Leaner operating model with process efficiencies helping to reduce FTE 4%, and improving banker productivity with revenue per FTE<sup>3</sup> up 7%

### **Deeper customer relationships**

- Making banking easier through new developments in mobile and online, including the iPad app launch, which has already reached 70,000 active customers in first two months
- Local teams with improved capability are more able to meet a broader range of customer needs across transaction, savings, insurance, investment and superannuation
  - Supported business customers to improve their risk management through an increase in interest rate hedging (hedging ratio increased from 19% to 26%)
- Driving more value from broker introduced customers, with 75% of customers having 4+ products
- Best practice banker accreditation for business banking staff, supported the creation of specialist industry segments, driving growth in target sectors including natural resources, health and business services
- Focus on service quality and delivering customer solutions reduced customer complaints by 18% in FY12 to their lowest levels since 2003

## Solid momentum in key operating metrics with reinvigorated strategy

#### **Key features of 2H12**

- St.George has seen improved momentum in 2H12 with a reinvigorated strategy.
   Sustainably improved share in mortgages, deposits, and wealth
- Continued to strengthen the balance sheet with improved deposit to loan ratio, lower property exposure and good asset quality
- Improved customer retention and proprietary mortgage growth of 3.2%. Increased share in cards and personal loans
- Customer numbers up 2%, with Bank of Melbourne customers up 6%
- Growth in wealth penetration<sup>1</sup> significantly higher than majors, up 96bps to 15.0% (now 3<sup>rd</sup> highest wealth penetration behind only WRBB and CBA brands)
- BT Super for Life customers up 23%
- Retained lead on majors in NPS<sup>3</sup>
- Bank of Melbourne is delivering to plan and RAMS move into the deposit market has been very successful
- Strong improvement in employee engagement and advocacy

### **Driving distinct proposition in each market**

- Strengthening position as a regional alternative to majors. To ensure brand distinctiveness and enhanced value we are progressing five key distinctive elements
  - Via improved training, build the best team of bankers that proactively help customers grow, know customer needs, and have the strongest credit skills
  - Customer led strategy of SME and MyBank
  - Fast decisions and hassle free banking through improved productivity
  - Smarter banking by providing innovative customer solutions in online, mobile and everything we do
  - Profitable growth, strong bank generating a sound shareholder return and growing by helping customers and communities prosper

## All brands on a firm footing for profitable growth

#### St.George in 2H12

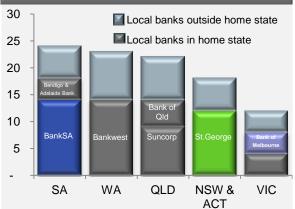

- St.George (NSW/QLD/ACT/WA) cash earnings were higher aided by mortgage growth in both proprietary and broker channel; margin improvement; and reduced expenses.
   Impairments significantly lower
- Large uplift in wealth penetration in NSW/ACT, up 145bps to 13.5% of customers<sup>2</sup>
- St.George continues to lead customer advocacy across NSW and ACT in both business and retail versus the majors
- Customer growth of 1% and proportion of customers with 4+ products up 100bps to 28.8%
- Strong deposit growth with an improvement in the deposit to loan ratio of 300bps to 65%

#### BankSA in 2H12

- BankSA cash earnings higher due to a good mix of volume and margin growth. Expenses flat with disciplined management. Impairments were well contained
- Growing market share in deposits and home loans in a low growth environment
- Bank nearly 1 in 3 of population in South Australia
- Deepening customer base, customers with 4+ products up 110bps to 28.3%
- 12 BankSA branches celebrated their 100<sup>th</sup> birthday during FY12

### Local Bank footings by State<sup>1</sup> (%)

### Bank of Melbourne in 2H12 Bank of Melbourne

- Bank of Melbourne cash earnings growth funding expansion. Impairment charges lower
- Mortgage and deposit growth substantially ahead of Victorian system<sup>3</sup>
- Bank of Melbourne first year of operation delivered 35% deposit growth to \$7.6bn; 10% lending growth to \$17.1bn; 13% customer growth; and a 164bps lift in customers with 4+ products to 27.3%
- Strong uplift in wealth penetration up 211bps to 18.9%

#### RAMS in 2H12

- RAMS cash earnings higher, with growth in home loans and deposits. Slightly higher expenses associated with launch of deposit products.
   Impairments improved due to focus on delinquency management
- RAMS launched deposits to customers at the end of May 2012 and have surpassed \$1.1 billion or 25,000 customers. 87% of customers were new to RAMS
- RAMS increased online presence with a 123% increase in customers in 2H12

1 Roy Morgan research January – December 2010, respondents aged 14+, mainly excludes small business. Footings include Deposits, Mortgages, Personal, Lending, and major cards. 2 Refer to slide 119 for Wealth penetration metrics provider. 3 APRA deposit and housing market share growth for Victoria, September 2012.

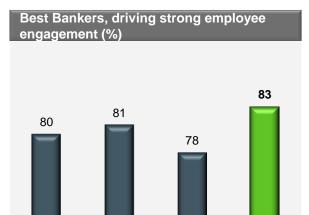

## Strategic priorities to deliver profitable growth

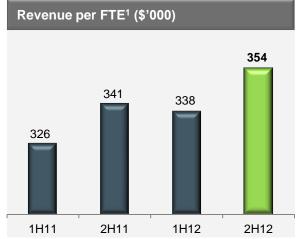

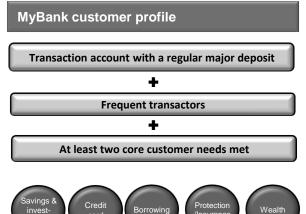

### Grow under represented SME customer base

Jul-10

Jul-09

 St.George has a strong commercial business offer, however, the SME segment is under served.
 A significant growth opportunity exists through the following initiatives

Jul-11

Jul-12

- New hub distribution model focused on efficient access to specialists using online, video and mobile
- Relationship based approach supported by emerging technologies
- Convenience with 24 hour lobbies, coin counters and dispensers

#### **Maintain leadership in Innovation**

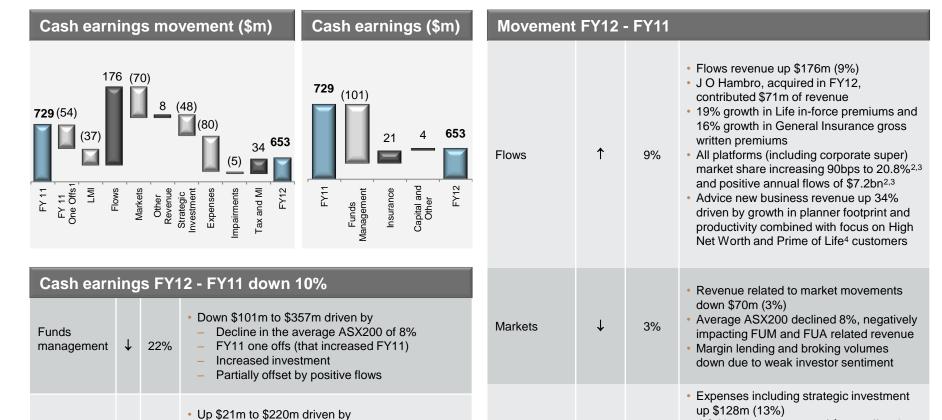

- Leverage strong heritage of online/mobile capability
- First internet banking (1995)
- First to send SMS alerts (2003)
- First savings/transaction accounts opened via mobile devices (2010)
- First mobile credit card applications (2012)
- Provide innovative customer solutions
  - Pay anyone via mobile (April 2012)
- Budget tool (June 2012)
- PropertyMate (August 2012)

<sup>1</sup> Based on average FTE. 2 Refer to slide 119 for Wealth penetration metrics provider details. St. George improvement in wealth penetration each six months versus a simple average of Peer 1, Peer 2 and Peer 3 improvement.

# Solid underlying business momentum offset by weaker markets and continued strategic investment

<sup>1</sup> FY11 One Offs include: profits on the sale of single manager rights; changes in the accounting treatment for certain deferred income and expense items and J O Hambro FX gains. 2 Plan for Life, June 2012, All Master Funds Admin. 3 Includes Westpac Staff Super of \$3.0bn and St.George Staff Super of \$0.3bn. 4 Prime of Life customers are defined as those between 45 and 65 years of age.

## Financial planner growth delivering new business sales momentum

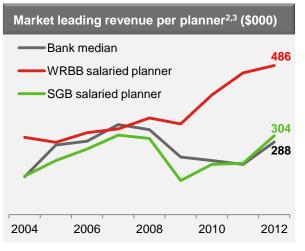

#### **Key features of 2H12**

- BT Select established and launched in July 2012
- · Aligned financial planners up 19% to 565
- Expanded distribution to aligned and Independent Financial Advisers (IFAs) with launch of "BT Protection Plan" through IFA network (joint winner of the 2012 Plan for Life/AB&F Innovation Award)
- Market leading revenue per WRBB salaried planner
- Advice new business sales revenue up 30% with planner growth and improved productivity
- Life Insurance sales by salaried, aligned and IFAs up 38%
- Westpac Group wealth penetration increase of 75bps to 18.4%<sup>1</sup> leads peers
- New client Private Wealth acquisition improved 23%
- Private Wealth business awarded outstanding institution (\$10m-30m) at Australian Private Banking Awards, 2012

<sup>1</sup> Refer to slide 119 for Wealth penetration metrics provider details. 2 Comparator September 2012 data from 1 July 2004 to 30 June 2012. 3 Includes salaried planners only.

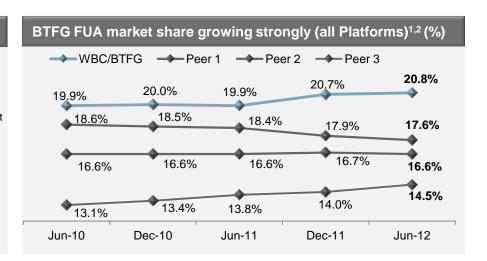

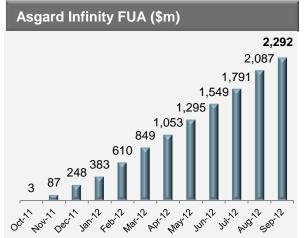

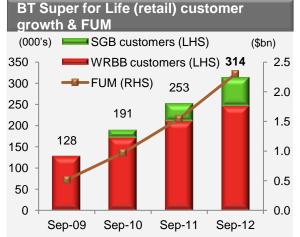

## Platforms and superannuation performing above peers

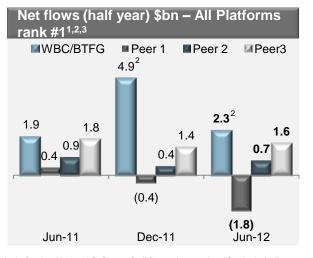

#### **Key features of FY12**

- Ranked #1 on All Platforms (including corporate super) with FUA share up 90bps to 20.8%<sup>1,2</sup>. Ranked #1 for annual net flows of \$7.2bn<sup>1,2</sup> (87%<sup>1,2</sup> of total net market flows)
- Corporate Super market share up 350bps to13.8%, ranked 3<sup>rd</sup> (up from 5<sup>th</sup> year on year).
   Ranked #1 for share of annual net flows of \$3.9bn (69%1.2 of total market flows)
- Ranked #3 for All Retail Super (including All Retail Retirement) FUA and #1 for annual net flows with 61%<sup>1,2</sup> market share
- Asgard Infinity (a pay for what you use platform solution launched in October 2011)
   reached \$2.3bn in FUA. Won Investment Trends' "Best New Product 2012" award
- Open architecture platform model preferred by independent financial planning groups, up 4.5% to 11,500 in FY12
- BT Wrap awarded "Best Retail Platform Investments", AFR 2012 Blue Ribbon Smart Investor Awards
- BT Super for Life (Retail) FUM up 51% on FY11 to \$2.3bn, with 314,000 customers. BT Super for Life (Corporate) FUA \$3.8bn² with 40,000 customers

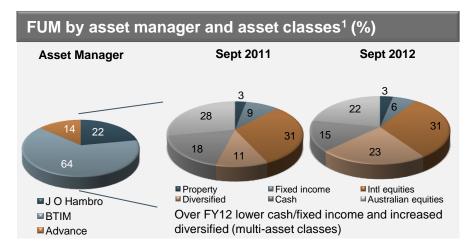

1 Plan for Life, June 2012, All Master Funds Admin. Peer 1, 2 and 3 are the largest competitors by FUA (excluding BTFG). 2 Includes Westpac Staff Super transfer of \$3.0bn in October 2011 and St. George Staff Super plan transfer of \$0.3bn in April 2012. 3 Investment Trends Platform Competitive Analysis and Benchmarking Report June 2012.

### Well represented across asset management styles

#### BTIM - global asset manager<sup>3</sup>

- BTIM is separately managed and listed on the ASX, with majority share (64.5%) consolidated into BTFG
- BTIM Spot FUM up 5% on FY11 to \$34.4bn
- Positive flows through the Westpac channels in BT Super for Life, Corporate Super funds and the Fixed Interest funds were offset by cautious market sentiment and legacy retail product redemptions (\$1.7bn)
- Performance has been particularly strong in the long/short, small cap, and micro cap funds
- 71% of pooled funds above benchmark (3 years)
- Launching two new funds: (a) Emerging Market product in Q412 and (b) Equity Income Fund series in Q113

#### Ascalon Capital Managers

#### Ascalon & Advance fund managers ADV

#### **ADVANCE**

#### Ascalon – stable of boutique managers

- Continued strong FUM<sup>2</sup> growth and positive net flows
- 10 boutique managers including 3 in Asia. Regal (30% minority stake acquired in July 2010) won "Australian Equities Long Short" category at the 2012 Money Management/Lonsec Fund Manager of the Year Awards and "Best Asian Relative Value Fund" for 3<sup>rd</sup> consecutive year for its Regal Amazon Market Neutral Fund at 2012 Eurekahedge Asian Hedge Fund Awards

#### Advance - manager of managers

- Spot FUM up 22% on FY11 to \$13.1bn
- 81% of funds above benchmark (3 years)
- Awarded best "Multi-strategy/fund of hedge fund" for the Advance Alternative Strategies Multi-Blend fund at the Professional Planner/Zenith Fund Awards

#### J O Hambro fund manager

- J O Hambro (European fund manager) was acquired on 26 October 2011 by BTIM and has been successfully integrated during the year with no loss of key personnel
- Continued strong FUM growth (FUM up 23% on FY11) to \$12.2bn with positive fund flow in a tough European market
- Maintained and improved asset consultant ratings with the JOHCM Global Select and JOHCM Asia funds being re-rated as 'buy' by Towers Watson
- 78% of funds above benchmark (3 years)

<sup>1</sup> September 2011 asset allocated adjusted for acquisition of J O Hambro. 2 Represents FUM of boutique investment managers in which Ascalon Capital Managers Limited (Ascalon) holds minority ownership interests. These boutiques are not part of the Westpac Group of companies and it is not intended to attribute the FUM to Ascalon or any other entity of the Westpac Group. 3 BTIM excluding J O Hambro.

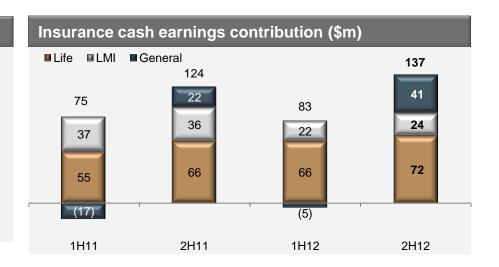

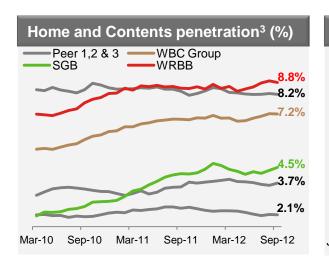

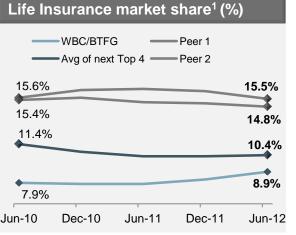

### **Strong growth in Life and General Insurance**

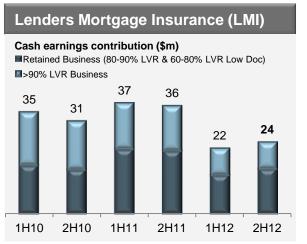

#### **Key features of 2H12**

- Growth in Life and General Insurance driven by extended distribution of Life products through network and increased bank sales of General Insurance
- Life Insurance growing new business sales at nearly twice the rate of market over FY12 (up 30% versus 14% for market¹)
- General Insurance market share up 10bps to 4.2%² over 1H12 benefitting from strong national marketing campaigns promoting our comprehensive policy coverage. Seasonal decline in loss ratios to 54% for 2H12 contributed to result
- Westpac Group Home and Contents penetration up 20bps over 1H12 to 7.2%<sup>3</sup>
- Lenders Mortgage Insurance only 17% of 2H12 insurance earnings as we have de-risked the portfolio. One of the lowest loss ratios in the industry
- Well placed to address the new Life Insurance and General Insurance capital requirements with no significant additional capital impact anticipated

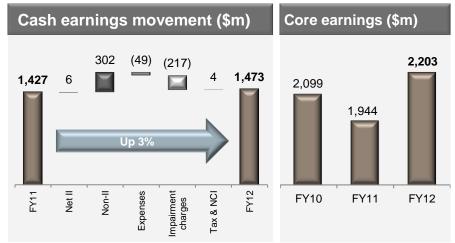

<sup>1</sup> Source: Plan for Life data (new sales includes sales, premium re-rates, age and CPI indexation), June 2012. 2 Source: APRA statistics based on Gross Earned Premiums (GEP) March 2012. 3 Refer to slide 119 for Wealth penetration metrics provider details. Peer 1, 2 and 3 represent the major banks.

## **Strong core earnings from increased customer flows**

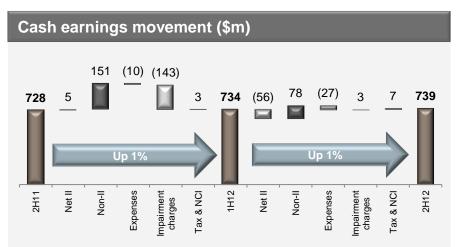

WIB Key metrics

Core earnings	<b>↑</b>	13%	<ul> <li>Core earnings up 13% to \$2,203m, up across all businesses</li> </ul>				
Net interest income		flat	<ul> <li>Deposits increased 34% and loans up 4%</li> <li>Higher loan volumes mostly in trade finance from solid demand and increased resources focused on this sector, particularly in Asia</li> <li>Accelerated recognition of establishment fees offset by lower markets contribution</li> </ul>				
Margins	1	11bps	<ul> <li>Margins 11bps lower to 2.49%, primarily due a lower proportion of markets income recorded as net interest income and increased competition for lending</li> </ul>				
Non-interest income	1	26%	<ul> <li>Strong growth in customer revenue from improved markets flows, particularly across interest rates and FX</li> <li>\$130m increase in performance fees recognised in Hastings, mostly in connection with corporate activity in the listed funds</li> <li>Partially offset by \$74m unfavourable movement in counterparty credit risk valuations (CVA)</li> </ul>				
Expenses	<b>†</b>	5%	<ul> <li>Increased investment in Asia has contributed to higher FTE and increased technology costs</li> <li>Annual salary rises and higher performance related pay</li> <li>Partially offset by controlled variable expenses</li> </ul>				
Impairment charges	1	large	<ul> <li>FY11 had an impairment benefit of \$90m compared to a net impairment charge in FY12</li> <li>Asset quality remains strong</li> <li>Change in impairment charge was driven mainly by lower write backs and repayments</li> <li>Partially offset by a reduction in downgrades</li> </ul>				

<sup>1</sup> Based on average FTE.

## Strong risk management supporting modest Cash earnings growth

Movemer	Movement 2H12 – 1H12					
Cash earnings	1	1%	Cash earnings up 1% to \$739m			
Core earnings	-	flat	Core earnings stable at \$1,099m			
Net interest income	<b>\</b>	6%	<ul> <li>Deposits increased 23% and loans down 1%</li> <li>Modest declines in business lending and securitisation</li> <li>One-offs lifted 1H12, predominately accelerated recognition of establishment fees</li> </ul>			
Margins	<b>+</b>	20bps	<ul> <li>Margins down 20bps</li> <li>Largely due to one-off items reflected in net interest income, particularly the establishment fee benefits recognised in 1H12</li> <li>Tightening spreads on assets due to competitive pressures and more subdued asset volumes</li> <li>Partially offset by improved deposit funding position</li> </ul>			
Non-interest income	1	11%	<ul> <li>Strong markets income supported by strong customer flows across all business segments, particularly in interest rate products</li> <li>A \$91m increase in Hastings contribution from performance fees associated with corporate activity in its listed funds</li> <li>Partially offset by softer foreign exchange income</li> </ul>			
Expenses	1	6%	<ul> <li>Increasing investment in Asia and extending Trade capability contributed to higher FTE and higher technology costs associated with expanding infrastructure</li> <li>Annual expense increases were partially offset by strong control of variable expenses</li> </ul>			
Impairment charges	<b>\</b>	5%	<ul> <li>Asset quality remained solid</li> <li>Lower top-ups of existing individually assessed provisions partially offset by lower write-backs</li> <li>Small number of stressed exposures moving into impaired</li> <li>Modest increase in recoveries</li> </ul>			

# Deep customer relationships, institutional insight and innovation underpin WIB strategy

#### **Strategy**

- Deep and enduring customer relationships form the core of WIB's strategy to sustainably grow and deliver superior returns
  - Build collaborative customer partnerships to better understand customers' needs
  - Insight-based approach (providing valuable insights to customers about markets, sectors and financial products) to deliver superior service and solutions
  - Investment in technology and innovation to enhance support for customers
  - The best bankers with the right capabilities to understand customer needs
- Aligning Asia, Trade, Natural Resources and Agribusiness capabilities to optimise coordination across geographies, products and sectors

#### **Extending WIB franchise**

• Accelerating investment in the fast growing Asian region, connecting trade, capital and people flows

Asia Asia Asia revenues up 46% FY11/FY12

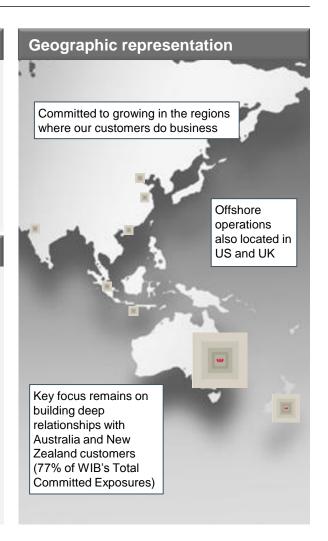

Asia

Trade revenues up 77%
FY11/FY12

Natural Resources & Agribusiness revenues up 13% FY11/FY12

#### **Enhanced Asia capabilities**

- Focusing on building Asia capabilities, capacity and expanding our footprint
- Localise global capabilities by market, including key partnerships and alliances
- Accelerated capabilities in FY12 through
  - GM Asia appointment
- FTE increased 27%
- Investments to enhance critical infrastructure, processes, policies, and controls
- Received in-principle approval for Mumbai branch

# Institutional leadership and deep customer relationships delivering strong revenue performance

#### **Leading Institutional Bank**

#### No.1 Lead Bank

### Customer revenue drives strong performance

#### Strong customer income growth

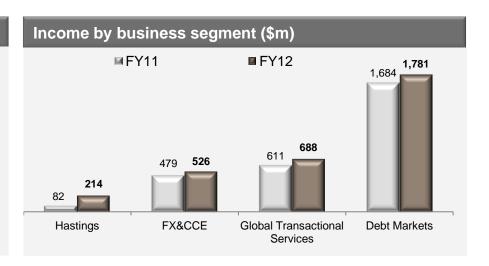

- Deep and enduring relationships are a core part of WIB's strategy and customer driven income underpins WIB's strong performance
- Customer income of \$2,354m up \$171m in FY12
  - Represents 74% of WIB's revenue and has grown 8% on FY11
  - Driven by higher transactional flows and strong interest rate and FX sales
- Market risk income remains a small portion at 6% of total WIB income

#### All businesses delivering strong returns

- Best understanding of customer needs delivered revenue growth across all business segments during FY12, particularly in 1H12
- Global Transactional Services income of \$688m, up 13% FY11/FY12 (up 2% on 1H12) driven by
  - Increased volumes and margins
  - Delivering growth in key target segments predominately in natural resources and Asia trade
- Strong Debt Markets income of \$1,781m, up 6% FY11/FY12 (down 1% on 1H12) with improved customer flows, particularly in interest rate products
- Hastings up \$132m during FY12 (up \$92m 2H12) largely due to performance fees associated with corporate activity in the listed funds

Other includes Hastings and Capital benefit.

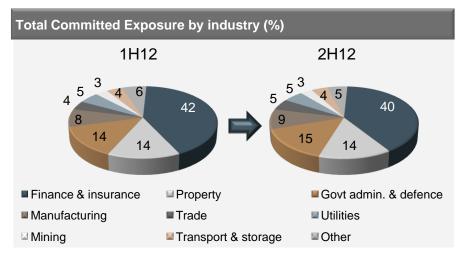

## Balance sheet strengthening through deposit growth

- Deposits increased 23% to \$64.5bn (up 34% FY11/FY12) following a concerted focus to capture more of our customers' business with a particular emphasis on deposits
- Leading position and ongoing investment and innovation in transactional banking capabilities to support deposit gathering
- Strong growth in corporate cash deposits, up 15%, as institutions remain relatively liquid
- Deposit to loan ratio improved 24 percentage points to 120%
- Loan growth has been relatively stable (down 1% during 2H12 and up 4% FY11/FY12). Subdued loan growth and low M&A activity has persisted through the half as customers remain cautious
- Lending at \$53.9bn, up \$2.1bn in FY12, with growth in business lending and Trade finance
- The portfolio remains well diversified across industries

Net loans F	Y12 – FY11	(\$bn)			
51.8	1.0	1.0	(0.3)	0.4	53.9
FY11	Business lending	Trade finance	Securitisation & asset finance	Other	FY12

Balance sheet (\$bn)								
	2H11	1H12	2H12	% change 2H12- 1H12	% change 2H12- 2H11			
Total Deposits	48.3	52.4	64.5	23%	34%			
Net Loans	51.8	54.5	53.9	(1%)	4%			
TCE <sup>1</sup>	204.3	191.9	193.1	1%	(5%)			

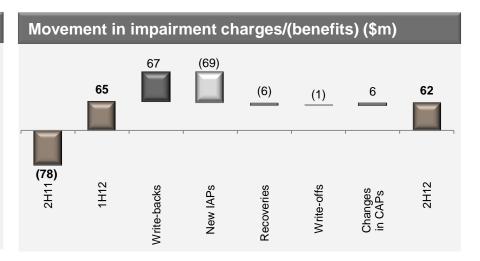

<sup>1</sup> TCE is Total Committed Exposure.

## High quality portfolio, reductions in stressed exposures slowing

#### Asset quality remains strong

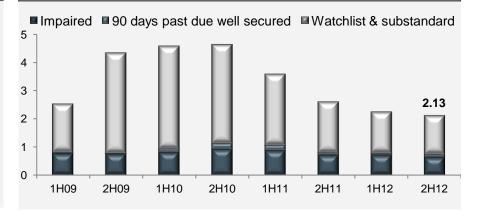

- Level of stressed assets was steady following a strong reduction during FY11 and 1H12
- Impairment charges down 5% to \$62m reflecting
- New IAPs decreased \$69m, driven by lower top-ups of existing provisions partially offset by a small number of new impaired exposures
- Write-back benefits slowed decreasing \$67m
- CAP steady, as increase in repayments offset by an increase in downgrades
- Asset quality remains strong although some companies remain under pressure from the high Australian dollar and soft consumer spending

#### Stressed exposures steady<sup>1</sup>

- Stressed exposures as a percentage of TCE<sup>2</sup> reduced 13bps (down 47bps FY11/FY12) to 2.13% of the WIB portfolio<sup>3</sup>
  - Stressed exposures down from peak of 4.6% at 30 September 2010
  - Property's contribution to stressed exposures reduced from 33.4% to 23.5% (reduced from 36.1% FY11/FY12)
  - Reduction in stressed assets driven by write offs and repayments and asset sales partially offset by some downgrades to watchlist and substandard
- Impaired exposures decreased 7bps to 64bps

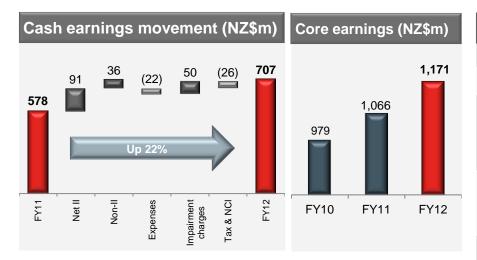

#### Stressed exposures as a % of TCE<sup>2, 3</sup> (%)

<sup>1</sup> Refer to slide120 for asset quality definitions. 2 TCE is Total Committed Exposure. 3 Includes Premium Business Group.

## Strong performance in a competitive market

## Momentum maintained across key metrics

### **Key features of 2H12**

- Solid performance has resulted from a strong distribution focus, continued front line investment, combined with localised marketing and decision making
- Further investment in online and mobile technology and branch enhancements also key to continued momentum
- Ongoing investment in Westpac Local and 'MyBank' have contributed to the deepening of customer relationships, enhancing cross sell capability:
- Customers with 4+ products increased 60bps to 49.6%
- Customers with Wealth products improved 220bps to 23%
- Improved banker productivity, revenue per FTE up 1%
- Continued focus on productivity measures that improve the customer experience

### Deeper customer relationships

- Customer centric strategy that differentiates Westpac New Zealand by providing an experience that delights, with a local and seamless one bank approach
- Rewarding customers for having deeper relationships through our 'MyBank' strategy
- Local teams with higher frontline capability, increased sales and service training and continued focus on credit skills driving better quality and faster lending decisions
- Expansion focused on high-tech community branches complemented with online and mobile technology, providing self-service options available 24 hours making banking easier for customers

Key employee / customer metrics

<sup>1</sup> Based on average FTE. 2 Change over year as data not collected on half yearly basis.

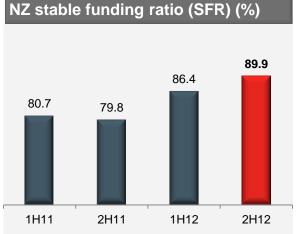

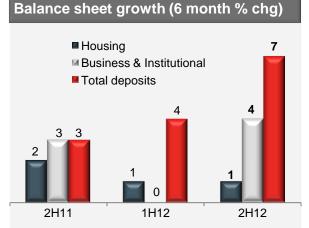

## Good balance sheet growth in a subdued environment

- Strong deposit growth with sustainable lending growth resulted in an improvement in the deposit to loan ratio to 71%, up 300bps in 2H12
- Total lending increased slightly above banking system growth in 2H12 up \$1.2bn (up 2%)
- Housing loans increased \$0.5bn (up 1%) in a competitive market where peers offered heavy discounts and cash incentives to drive volume
- Business lending growth of \$0.8bn (up 4%) with good growth in both business and institutional balances. Key areas of lending growth in agricultural, mining and media/telecommunications sectors
- Deposits up 7%, compares favourably with system growth of 4%, has more than fully funded loan growth. Term deposits increased \$2.2bn (up 11%) and other deposits increased \$0.4bn (up 2%), with most other deposit growth in personal online savings and business savings accounts

Balance sheet (NZ\$bn)						
	2H11	1H12	2H12	Chg on 1H12 (%)		
NET LOANS	57.6	58.2	59.4	1	2

TCE <sup>1</sup>	81.1	83.3	83.7	1	-	

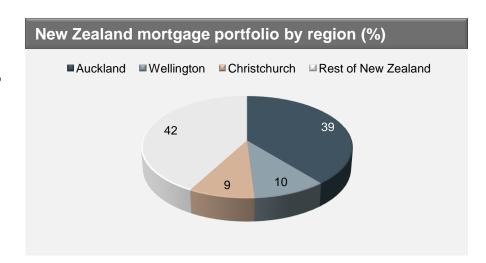

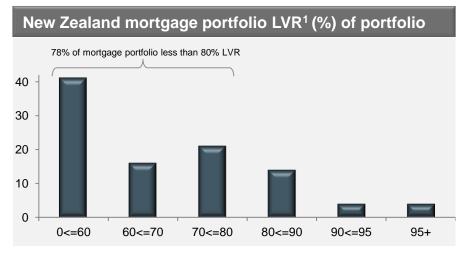

<sup>1</sup> TCE is Total Committed Exposures.

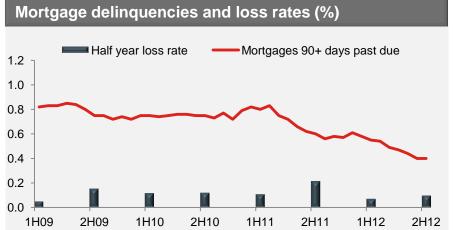

## New Zealand mortgage portfolio

- Mortgage portfolio of \$35.9bn, up 1%
- The distribution of the mortgage portfolio across regions is consistent with population concentrations of New Zealand
- Quality of portfolio remains high and well secured with 78% of the portfolio having a LVR less than 80%
- Mortgage 90+ days delinquencies down 15bps (down 20bps on FY11/FY12) to 40bps, reflecting improved origination and stable employment levels
- Loan origination through proprietary channel remained relatively stable at 74% (up from 73% at FY11/FY12)
- Mortgage write-offs of 0.1% of the portfolio, up 3bps
- During 2H12, the trend towards variable rate mortgages started to reverse with the proportion of variable rate mortgages reducing from 52% at 1H12 to 48%

1 LVR based on current loan balance and current assessment of property value.

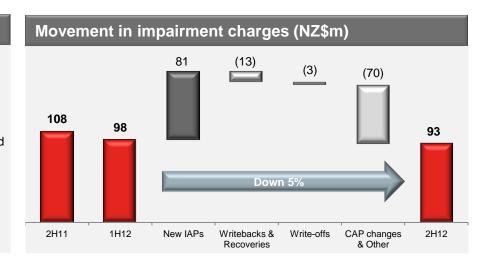

## Improving asset quality across portfolios

### Asset quality continues to improve<sup>1</sup>

- Impairment charges down 5% (down 21% on FY11/FY12)
- Business stressed exposures as proportion of TCE<sup>2</sup> reduced significantly primarily due to partial write-offs of \$123m in 2H12
- Business stressed exposures fell to 6.8% of TCE, down 20bps (down 642bps from FY11/FY12)
- Stressed business exposures down mostly across property, agriculture and manufacturing sectors
- Business impaired exposures 2.21% of TCE<sup>2</sup>, up 21bps (down 117bps FY11/FY12), driven by downgrades of institutional exposures
- Total provisions decreased \$78m, largely due to a \$39m decrease in transaction managed portfolio and a \$29m decrease in mortgage portfolio

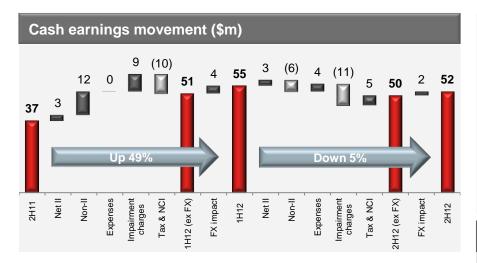

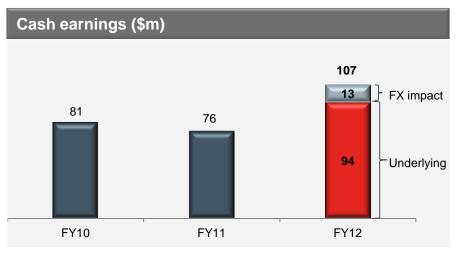

1 Refer slide 120 for asset quality definitions. 2 TCE is Total Committed Exposure.3 Large reduction in stressed exposures from 2H11 to 1H12 due primarily to transfer of WIB assets during 1H12.

## Strong business performance across all regions

#### **Key Highlights FY12 - FY11**

- Pacific Banking delivered a very strong performance in FY12 with a 41% growth in Cash earnings to \$107m
- In 2H12 Cash earnings remained relatively high, but did not match the very strong 1H12
- Core earnings were up \$63m (44%) to \$206m in FY12
- Strong growth across the region supported by a rise in the value of the PNG Kina and strong foreign exchange activity
- Financial education programmes have been conducted throughout the Pacific, with almost 16,000 participants since October 2011
- Electronic banking initiatives are a key strategic focus to support productivity initiatives and make banking services more accessible to remote areas

Movement 2H12 – 1H12						
Cash earnings	<b>\</b>	Reported 5%	<b>Ex-FX</b> 9%	Cash earnings down 5% to \$52m		
Core earnings	1	4%	1%	<ul> <li>Core earnings up 4% to \$105m</li> </ul>		
Net interest income	<b>↑</b>	6%	4%	<ul> <li>Lending up 7% (predominately in mortgages) and deposits up 4%</li> </ul>		
Margins	1	17bps	n/a	<ul> <li>Improvement driven by tighter deposit spreads</li> <li>Partially offset by reduction in lending spreads driven by strong competition, particularly in Fiji</li> </ul>		
Non-interest income	<b>\</b>	4%	8%	<ul> <li>Higher fees driven by strong account growth offset by lower foreign exchange volumes in PNG</li> </ul>		
Expenses	<b>\</b>	6%	8%	<ul> <li>Inflation related costs increases and higher salary costs fully offset by productivity initiatives</li> </ul>		
Impairment charges	1	large	large	<ul> <li>Impairment charges increased \$11m to \$21m due to top up of provisions and one large impaired exposure in Vanuatu</li> </ul>

# FULL YEAR APPENDIX AND DISCLAIMER 2012

# **Appendix 1: Cash earnings adjustments**

	Cash earnings adjustment	2H11	1H12	2H12	Description		
	Reported NPAT	3,030	2,967	3,003	Reported net profit after tax attributable to equity holders of Westpac Group		
	TPS revaluations	(6)	24	3	The TPS hybrid instrument is not fair valued however the economic hedge is fair valued. The mismatch in the timing of income recognition is added back		
	Treasury shares	(13)	12	15	Earnings on Westpac Group shares held by Westpac in the wealth business are not recognised under A-IFRS. These are added back as these shares support policyholder liabilities and equity derivative transactions, which are revalued in deriving income		
	Fair value gain/(loss) on economic hedges	(26)	20	(13)	nrealised profit/losses on economic hedges and revaluation of hedges on future NZ earnings are reversed because they may creat aterial timing difference on reported earnings in the current period, which does not affect profit available to shareholders		
us	Ineffective hedges	17	(8)	1	The gain/loss on qualified hedge ineffectiveness is reversed because the gain/loss from fair value movements reverses over time		
Non-merger related items	Buyback of government guaranteed debt	(15)	(5)	-	The Group has undertaken a buyback of a portion of its government guaranteed debt which reduced the government fee on that debt, currently 70bps. The benefit is being amortised over the original term of the debt that was bought back. This has been treated as a Cash earnings adjustment as the economic benefit of ceasing to pay the government guarantee fee cannot be recognised		
	Tax provision	(23)	-	-	The tax provisions were increased in 1H11 on certain existing transactions undertaken by the Group in response to the recent trend of global tax authorities challenging the historical tax treatment of complex and/or cross border transactions. In 2H11 some of these matters were resolved releasing \$23m. Treated as a Cash earnings adjustment as it relates to global management of existing tax positions and does not reflect ongoing operations		
	Supplier program	-	93	46	Expenses relating to change to supplier arrangements and include costs associated with streamlining and better documenting systems and processes, technology costs to enable infrastructure and enhance interaction with suppliers and costs associated with restructuring the workforce. Given these significant expenses are not considered in determining dividends they are treated as Cash earnings adjustments		
	Amortisation of intangible assets	-	2	3	The acquisition of J O Hambro during 1H12 resulted in the recognition of management contract intangible assets and are amortised over their useful lives ranging between 5 – 20 years. The amortisation is a Cash earnings adjustment because it is a non-cash flow item and does not affect returns to shareholders		
	Significant item	-	-	78	The Group recognised an increased provision with respect to longstanding legal proceedings, where an adverse judgement was received during FY12. Consistent with previous treatment this has been treated as a Cash earnings adjustment due to its size and the historical nature of the proceedings.		
e	Merger transaction and integration expenses	32	-	-	Transaction and integration expenses incurred over three years following the St.George merger were treated as Cash earnings adjustments. They do not impact the earnings expected from St.George following the integration period		
je merg i items	Amortisation of intangible assets	74	72	74	The recognised balance of the majority of merger-related identifiable intangible assets including brands, the core deposits intangible and credit card and financial planner relationship intangible assets will be amortised over their useful life. The amortisation is a Cash earnings adjustment because it is a non-cash flow item and does not affect returns to shareholders		
St.George merger related items	Fair value amortisation of financial instruments	63	18	28	The unwind of the merger accounting adjustments associated with the fair valuing of St.George retail bank loans, deposits, wholesale funding and associated hedges. Given these are not considered in determining dividends they are treated as Cash earnings adjustments		
0)	Tax consolidation adjustment	-	-	165	The resetting of the tax value of certain St.George assets to the appropriate market value as at the tax consolidation effective date. Is treated as a Cash earnings adjustment due to its size and because it does not reflect ongoing operations		
	Cash earnings	3,133	3,195	3,403			

# **Appendix 2: Definitions**

Westpac's business units					
Australian Financial Services or AFS	Australian Financial Services is responsible for the Westpac Group's Australian retail banking, business banking and wealth operations. It incorporates WRBB, SGB and BTFG. AFS also includes the product and risk responsibilities for Australian banking				
Westpac RBB or WRBB	Westpac Retail & Business Banking is part of Australian Financial Services division and provides sales, marketing and customer service for all consumer and small-to-medium enterprise customers Australia under the 'Westpac' brand				
St.George Banking Group or St.George or SGB	St.George Banking Group is part of Australian Financial Services division Provides sales and customer service for our consumer, business and corporate customers in Australia under the St.George brand. It also includes the management and operation of: the Bank of South Australia (BankSA), Bank of Melbourne and RAMS brands				
BTFG	BT Financial Group (Australia) is part of Australian Financial Services division and is the Group's wealth management business, including operations under the Advance Asset Management, Ascalon, Asgard, BT, BT Investment Management, Licensee Select, BT Select Magnitude, and Securitor brands. Also included are the advice, private banking, and insurance operations of Bank of Melbourne, BankSA, St.George and WRBB. New Zealand operates under the Westpac New Zealand, Westpac Institutional Bank, Westpac Life and BT brands in NZ				
Pacific Banking or PB	Pacific Banking Provides banking services for retail and business customers throughout the South Pacific Island Nations				
GB	Group Businesses Provides centralised Group functions, including Treasury and Finance				

Financial pe	erformance
Cash earnings	Net profit attributable to equity holders adjusted for the impact of the economic hedges related to TPS, earnings from Treasury shares, fair value gains/losses on economic hedges, ineffective hedges, buyback of government guaranteed debt, special tax provisions, supplier program, merger transaction and integration expenses, the amortisation of certain intangibles in relation to the merger with St.George and the J O Hambro acquisition, fair value amortisation of financial instruments, the St.George tax consolidation adjustment, TOFA tax consolidation adjustment and a litigation provision
Core earnings	Operating profit before income tax and impairment charges
AIEA	Average interest earning assets
Net interest spread	The difference between the average yield on all interest bearing assets and the average rate paid on all interest bearing liabilities
Net interest margin	Net interest income divided by average interest earning assets
Full-time equivalent employees (FTE)	A calculation based on the number of hours worked by full and part-time employees as part of their normal duties. For example, the full-time equivalent of one FTE is 76 hours paid work per fortnight
Wealth and Home and Contents Penetration Metrics	Data based on Roy Morgan Research, Respondents aged 14+. Wealth penetration is defined as the number of Australians who have Managed Investments, Superannuation or Insurance with each group and who also have a Deposit or Transaction Account, Mortgage, Personal Lending or Major Card with that group as a proportion of the total number of Australians who have a Deposit or Transaction Account, Mortgage, Personal Lending or Major Card with that group. Home and Contents penetration is defined as the number of Australians who have Household Insurance (Building, contents and valuable items) within the Group and who also have a Deposit or Transaction Account, Mortgage, Personal Lending or Major Card with that group as a proportion of the total number of Australians who have a Deposit or Transaction Account, Mortgage, Personal Lending or Major Card with that group as a proportion of the total number of Australians who have a Deposit or Transaction Account, Mortgage, Personal Lending or Major Card with that group. 12 month rolling average to Sep 2012. WRBB includes Bank of Melbourne (until Jul 2011), BT, Challenge Bank, RAMS (until Dec 2011), Rothschild, and Westpac. St.George includes Advance Bank, Asgard, BankSA, Bank of Melbourne (from Aug 2011), Barclays, Dragondirect, Sealcorp, St.George and RAMS (from Jan 2012). Westpac Group includes Bank of Melbourne, BT, Challenge Bank, RAMS, Rothschild, Westpac, Advance Bank, Asgard, BankSA, BankSA, Barclays, Dragondirect, Sealcorp and St.George.

## **Appendix 2: Definitions (continued)**

Financial performance (cont.)					
Net Promoter Score or NPS	Refers to an external measure of customer advocacy which looks at how willing our customers are to recommend Westpac to their family and friends.  To calculate NPS, customers are asked how likely they are to recommend Westpac's banking brands to a friend or colleague. On a scale of 1 to 10, the NPS is calculated taking promoters (those who score 9 or 10) and subtracting the detractors (those who rate the company 6 or less). Those who score 7 or 8 are ignored as although positive, are not enthusiastic				
WRBB Consumer Affluent NPS	Net Promoter ScoreSM and NPSSM is a service mark of Bain & Company, Inc., Satmetrix Systems, Inc. and Mr Frederick Reichheld. 2 Affluent NPS Source: Roy Morgan Research. Metric based on six month rolling average. Affluent NPS = NPS of main financial institution, aged 25-59 & household income \$100k+ or aged 60+ & household income \$50k+ or aged 14+ & banking & finance (excluding WB super) footings \$400k+. Westpac includes Westpac, Bank of Melbourne (until Jul-11) and Challenge bank. Peer Group is the weighted average of the Big 4 Banks. Weighted Big 4 average includes: WBC, ANZ, CBA and NAB 6 month moving average. Rankings are based on absolute NPS scores compared to ANZ, CBA and NAB				
St.George Consumer NPS	Net Promoter ScoreSM and NPSSM is a service mark of Bain & Company, Inc., Satmetrix Systems, Inc. and Mr Frederick Reichheld. Consumer NPS Source: Roy Morgan Research. Metric based on the six month rolling average. Consumer NPS = NPS of main financial institution, aged 14+. St.George - includes St.George Bank, Bank of Melbourne (from August 2011), BankSA, Advance Bank, Dragondirect and RAMS (from January 2012). Peer Group is the weighted average of the Big 4 Banks. Weighted Big 4 average includes: WBC, ANZ, CBA and NAB 6 month moving average. Rankings are based on absolute NPS scores compared to WBC, ANZ, CBA and NAB				
Business NPS	DBM Consultants Business Financial Services Monitor: 6 month average; Net Promoter Score is calculated by subtracting the percentage of Total Detractors (0-6) from the percentage of Promoters (9-10), who answer the following question: "Please use a scale ranging from 0 to 10, where 0 means 'extremely unlikely' and 10 means 'extremely likely'. How likely would you be to Recommend (MFI) to others for business banking? All businesses. SME NPS = NPS of main financial institution. All businesses with annual turnover under \$5 million (excluding Agricultural business). Commercial NPS = NPS of main financial institution. All businesses with annual turnover over \$5 million and under \$100 million (excluding Agricultural business)				
Capital					
Risk Weighted Assets or RWA	Assets (both on and off-balance sheet) of the Westpac Group are assigned within a certain category, amounts included in these categories are multiplied by a risk weighting, and the resulting weighted values added together to arrive at total risk weighted assets				
NCI	Non-controlling interests				
Capital ratios	As defined by APRA (unless stated otherwise)				

Asset qualit	e <b>y</b>					
TCE	Total committed exposure					
Stressed loans	Stressed loans are Watchlist and Substandard, 90 days past due well secured and impaired assets.					
Impaired assets	<ol> <li>Impaired assets can be classified as:</li> <li>Non-accrual assets: Exposures with individually assessed impairment provisions held against them, excluding restructured loans;</li> <li>Restructured assets: exposures where the original contractual terms have been formally modified to provide concessions of interest or principal for reasons related to the financial difficulties of the customer;</li> <li>90 days past due (and not well secured): exposures where contractual payments are 90 days or more in arrears and not well secured;</li> <li>other assets acquired through security enforcement; and</li> <li>any other assets where the full collection of interest and principal is in doubt</li> </ol>					
90 days past due - well secured	A loan facility where payments of interest and/or principal are 90 or more calendar days past due and the value of the security is sufficient to cover the repayment of all principal and interest amounts due, and interest is being taken to profit on an accrual basis					
Watchlist and substandard	Loan facilities where customers are experiencing operating weakness and financial difficulty but are not expected to incur loss of interest or principal					
Individually assessed provisions or IAPs	Provisions raised for losses that have already been incurred on loans that are known to be impaired and are individually significant. The estimated losses on these impaired loans will be based on expected future cash flows discounted to their present value and as this discount unwinds, interest will be recognised in the statement of financial performance					
Collectively assessed provisions or CAPs	Loans not found to be individually impaired or significant will be collectively assessed in pools of similar assets with similar risk characteristics. The size of the provision is an estimate of the losses already incurred and will be estimated on the basis of historical loss experience of assets with credit characteristics similar to those in the collective pool. The historical loss experience will be adjusted based on current observable data

Unless otherwise noted, financial information in this presentation is presented on a Cash earnings basis. Cash earnings is a non-GAAP measure. Refer to Westpac Full Year 2012 Results (incorporating the requirements of Appendix 4E) for the year ended 30 September 2012 available at www.westpac.com.au for details of the basis of preparation of Cash earnings. Refer to slides 34 and 35 for an explanation of Cash earnings and Appendix 1 slide 118 for a reconciliation of reported net profit to Cash earnings.

This presentation contains statements that constitute "forward-looking statements" within the meaning of Section 21E of the US Securities Exchange Act of 1934. Forward-looking statements are statements about matters that are not historical facts. Forward-looking statements include statements regarding our intent, belief or current expectations with respect to our business and operations, market conditions, results of operations and financial condition, including, without limitation, future loan loss provisions, financial support to certain borrowers, indicative drivers, forecasted economic indicators and performance metric outcomes.

We use words such as 'will', 'may', 'expect', 'indicative', 'intend', 'seek', 'would', 'could', 'continue', 'plan', 'probability', 'risk', 'forecast', 'likely', 'estimate', 'anticipate', 'believe', or similar words to identify forward-looking statements. These forward-looking statements reflect our current views with respect to future events and have been made based upon management's expectations and beliefs concerning future developments and their potential effect upon us. There can be no assurance that future developments will be in accordance with our expectations or that the effect of future developments on us will be those anticipated. Actual results may differ materially from those which we expect, depending on the outcome of various factors. Factors that may impact on the forward-looking statements made include those described in the section entitled 'Risk factors' in Westpac's Interim Financial Report for the half year ended 31 March 2012 available at www.westpac.com.au. When relying on forward-looking statements to make decisions with respect to us, investors and others should carefully consider such factors and other uncertainties and events. We are under no obligation, and do not intend, to update any forward-looking statements contained in this presentation.
