Understanding Options for Getting Ahead

I would like to pay half the monthly payment fortnightly

If your minimum monthly repayment is \$1,000 then half your monthly payment will be \$500 debited fortnightly. A normal fortnightly payment is calculated as follows (Monthly payment of \$1,000 x 12 months in a year, divided by 26 fortnights = \$461.55). Therefore, paying half the monthly payment fortnightly gets you ahead in repayments.

I would like to pay the minimum repayment plus a fixed extra amount of:

If your minimum repayment is \$500 per month and you always want to pay an extra \$40 per month, your total repayment will be \$540. If the interest rate changes, reducing your minimum repayment amount to \$480 per month, your total repayment will decrease to \$520 per month.

I would like to pay a set amount of:

If you choose to pay a set amount, it must be above your current minimum repayment amount. For example, if your minimum monthly repayment amount is \$1,400. Your set amount must be above \$1,400. If there is an interest rate change and your set amount falls below your minimum required repayment amount, we will automatically reset your repayment amount to the new minimum. We will provide you 30 days' notice in writing prior to doing this to notify you of the change.
